## Business Analytics Courses: Spring 2022

BZAN102101  
Operations Management Mitrofanov, Dmitry Spring 2022  
This course is an introduction to operations management. Operations, like accounting, finance, marketing, and human resources, is one of the primary functions of every organization. Operations managers transform human, physical, and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm. A strong emphasis will be placed on the development and use of quantitative models to assist decision making.

Credits: 3

**BZAN225501**  
Managing Projects Coakley, Charles E Spring 2022

This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

Credits: 3  
Room and Schedule: Fulton Hall 245 W 07:00PM-09:30PM Satisfies Core Requirement: None

**BZAN331001**  
Sports Analytics Neale, John J Spring 2022

This course will introduce you to the field of sports analytics. We will apply quantitative methods from statistics and management science in a sports context. Our focus will be on-field

analysis including player and team evaluation and game strategy. We will cover baseball, football, and basketball in depth with occasional references to other sports. We will also discuss concepts from behavioral economics and psychology that help explain the actions of players, coaches, and referees.

Credits: 3  
Room and Schedule: Fulton Hall 220 Tu 04:30PM-06:50PM Satisfies Core Requirement: None  
Prerequisites: A previous course in statistics (BZAN1135), management science (BZAN2235 or BZAN6604), and Excel (BZAN1037 or ISYS1021) plus familiarity with the rules of baseball, football, and basketball.  
Corequisites: None Cross-listed with: None  
Frequency: Every Fall, Every Spring Student Level: Undergraduate Comments: None

BZAN660201  
Forecasting Techniques Evren, Haydar E  
Spring 2022

The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model to model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, ARIMA modeling as well as combining models.

BZAN660401  
Management Science Ozer Guclu, Ipek Spring 2022

This course provides an overview of the concepts and methods of management science. Sometimes referred to as prescriptive analytics or decision analytics, management science is a subset of the larger field of business analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing.

Supply Chain Management  
Beebe, Jonathan R Spring 2022

A supply chain consists of all parties involved in fulfilling a customer request, including suppliers, manufacturers, distributors, and retailers. Over the last decade, firms have started focusing on supply chain management as a source of competitive advantage. There's a realization that no company can do better than its supply chain. This course will provide students with an overview of the concepts, models, and methods that are important for the design and operation of modern, global supply chains. Classes are hands-on, with many opportunities to analyze cases and play simulation games.

Operations Management Alev, Isil  
Spring 2022

Operations, like accounting, finance and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making.

Managerial Statistics VanderWerf, Pieter A Spring 2022

This course teaches the tools and techniques of statistics most commonly used in business. The major topic areas include: populations, random variables, distributions, and sampling; parameter estimation; hypothesis testing; and simple and multiple regression. All topics are taught by application to actual business problems using original data. The course provides the tools students will need for their functional courses, such as finance and marketing, as well as for core courses in business analytics.

BZAN770601  
Data Analytics 1: Model Building VanderWerf, Pieter A  
Spring 2022

This course focuses on the use of quantitative methods to support managerial decisions. Fundamental to this type of decision analysis is a model, which is a representation of reality. A child enjoys a model car or a model train. An engineer uses a model of an airplane wing in a wind tunnel. An architect uses a set of blueprints as a model to illustrate what is to be built. The National Weather Service uses computer models to predict the track of a hurricane. In this course we will see how mathematical models and modern spreadsheet software can be used to support managerial decision analysis. We will pay special attention to the assumptions and limitations of using mathematical models as part of the iterative process of making operational and strategic management decisions. Examples will be used to illustrate this process in real world situations.

# Business Law and Society

## Business Law and Society Courses: Summer 2021

BSLW660402

Law for the Entrepreneur DEPT

Summer 2021

This course examines the legal issues and challenges created by the migration of business applications to the internet. The intersection of law, business, and technology is explored in depth in this course. Students learn some aspects of entrepreneurship with practical application to business transactions. This course covers business' digital assets, in the form of intellectual property--trademarks, copyrights, patents, and trade secrets. Other topics surveyed include: contracts, licensing agreements, jurisdiction, tax, financing start-ups, privacy, speech, defamation, content control, filtering, information security, and crime. The course introduces students to critical high-tech issues necessary for effective managers of e-commerce enterprises.

BSLW110201

Law and Ethics DEPT

Fall 2021

This course examines the legal and ethical challenges faced by business people in today's global society, focusing on the interplay of legal and ethical obligations in the business environment, the extent to which they overlap, and the application of moral principles in the absence of legal requirements. While laws provide some guidance on the right course of action, individuals are not strictly constrained by legal principles. The emphasis throughout this course is on assisting students to develop the decision-making skills necessary for their future roles as responsible managers and leaders.

Real Estate Fundamentals Chazen, Edward

Fall 2021

This course serves as an introduction to the field of real estate. The course is structured around several themes that will seem more interconnected by the end of the course than at the start.

The course covers an overview of real estate and society; landlord-tenant relationship; numbers and capital in real estate; property development; market research and analysis; housing markets; environmental impact and sustainability; and risk management. The course uses various teaching and learning methods: class lectures; case study discussions; videos of interviews with experts and about illustrative projects; homework exercises and guest lectures.

Topics: Law and Economics Wesner, Thomas L

Fall 2021

Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

The State of Affordable Housing in the States Van Meter, Robert H

Fall 2021

Course offered for Sophomores only.. How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

Real Estate and Urban Action DEPT

Fall 2021

Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.

Credits: 3

Room and Schedule: None Satisfies Core Requirement: None

Prerequisites: The only prerequisite is an interest in any facet of real estate and urban action. Given the multidisciplinary tasks required to create viable communities, students from all schools at Boston College are welcomed to participate.

Urban Design for Complexity and Sustainability Littell, Matthew

Fall 2021

The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

Urban Action Lab

McCullagh, Neil P;Perkins, Taylor A Fall 2021

Urban Action Lab is a semester long class that provides students with first-hand experience working on projects that advance affordable housing and access to opportunity. Students will

develop and pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization.

Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies, the teaching team, and fellow students. The class will meet once per week and will occasionally require students to attend meetings off campus. Please schedule a meeting with professors to discuss.

Privacy and Internet Law Keener, Ellis B

Fall 2021

This course explores online privacy regulation and law, cybersecurity law, and Internet regulation. The goal is not to create Internet regulatory attorneys, but to give students a solid awareness of the Internet privacy regulation and the pitfalls of not being aware of those regulations. Students will also learn how to create crisis strategies for dealing with a major breach. During the course, we will read privacy regulations and privacy orders and study the significant FTC privacy and breach cases.

Real Estate Development Chazen, Edward

Spring 2022

This course employs various teaching and learning methods: class lectures; videos of interviews with experts and about illustrative projects; case study discussion; guest lectures; team-based virtual tours of Boston neighborhoods that have been transformed by large-scale real estate development; and, a capstone project of teams preparing a development plan for an actual site in the Boston areas.. This course is focused on what real estate development is and what it means to be a real estate developer. Students will gain an understanding of the process of real estate development, including design and construction; how developers engage with the public sector and the surrounding community to obtain approval for a development; how projects are financed; and, other important elements that contribute to completing successful real estate projects. Also learn about the legal aspects of developments; the ways that development is a catalyst for neighborhood improvement and local economic growth; and, trends in sustainable development.

Labor and Employment Law Twomey, David P

Spring 2022

Considerations pertaining to organized labor in society are examined including the process of establishing collective bargaining, representation, and bargaining status under the Railway Labor Act and the National Labor Relations Act. Discussion of leading cases relevant to the legal controls that are applicable to intra-union relationships and the legal limitations on employer and union economic pressures. The law of arbitration, public sector collective bargaining, and employee safety and health law are studied. Topics including laws prohibiting discrimination based on race, color, religion, gender, national origin, age, and disability are examined, as well as the developing law of employee privacy.

Securities Regulation

Spooner, Rachel S Spring 2022

Securities Regulation is the study of how the government regulates financial markets and their participants, whether a start-up seeking capital through a Kickstarter campaign, a multi-national public company disclosing news to its shareholders, or an investment banker advising a company in its IPO. The course focuses upon the key federal statutes that regulate securities and participants in the securities markets: Securities Act of 1933, Securities Exchange Act of 1934, Sarbanes-Oxley, Dodd-Frank Act of 2010, Foreign Corrupt Practices Act, and several criminal statutes. The students learn the role of the Securities and Exchange Commission and how the SEC will impact securities markets and their participants. The course covers the multitude of methods for raising capital within the confines of the Securities Act and the J.O.B.S. Act. Students learn how executives of public companies, and their auditors, lawyers, and bankers, decide when and how to make disclosures about the company. The course also examines financial scams and fraud, considering the ethical boundaries of the complex, fast-paced financial world. The class hosts guests ranging from SEC enforcement attorneys, to in-house counsel at a large bank, to defense counsel with specialties in insider trading and white-collar crime, Foreign Corrupt Practices Act, and the Bernie Madoff case. The class is intended for students interested in careers in finance, audit, leadership in public companies, or law.

BSLW118501

Topics: Law and Economics Wesner, Thomas L

Spring 2022

Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

BSLW220601

Real Estate and Urban Action McCullagh, Neil P

Spring 2022

Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed

income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.

BSLW220801

Urban Action Lab DEPT

Spring 2022

Urban Action Lab is a semester long class that provides students with first-hand experience working on projects that advance affordable housing and access to opportunity. Students will develop and pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization.

Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies, the teaching team, and fellow students. The class will meet once per week and will occasionally require students to attend meetings off campus. Please schedule a meeting with professors to discuss.

Real Estate Field Projects Chazen, Edward

Spring 2022

Each team will work under the supervision of the Instructor, with weekly team meetings to review the work plan, progress toward identified goals and practicing several presentations that form an important part of the learning experience. There will be three field projects planned..

This course is a complement to in-class learning and provides an experiential learning component to the real estate education at CSOM. The course consists of teams of 4-5 students each working on a field project for a real estate/developer investor, not-for-profit organization, or government agency. The field projects are "real world" real estate projects that involve extensive data collection/analysis, interviews with a range of experts and others that can influence the conclusions and recommendations of the team, and presentations to management of the sponsoring organization. The field projects typically include development proposals for a property; re-development plans for an existing property; and, real estate market research to assist an investor considering expansion into new geographic markets.

Law for the Entrepreneur Reder, Margo

Spring 2022

This course examines the legal issues and challenges created by the migration of business applications to the internet. The intersection of law, business, and technology is explored in depth in this course. Students learn some aspects of entrepreneurship with practical application to business transactions. This course covers business' digital assets, in the form of intellectual property--trademarks, copyrights, patents, and trade secrets. Other topics surveyed include: contracts, licensing agreements, jurisdiction, tax, financing start-ups, privacy, speech, defamation, content control, filtering, information security, and crime. The course introduces students to critical high-tech issues necessary for effective managers of e-commerce enterprises.

Public Speaking Schwartz, Stacy M Spring 2022

This course provides an introduction to basic concepts, theories, and principles of oral communications through the mode of public/in class speech performances. You will gain practical experience in exploring, discovering, and arranging ideas, using evidence and research to support claims, preparing organized outlines, and composing speeches while broadening your view of theoretical considerations in communications. This is an oral presentation class.

Each student will present varied styles of public speaking to his/her peers. Our class will also include lectures, discussions, video analysis, and oral exercises to alleviate speech anxiety.

Corporate Financial Strategies Hotchkiss, Edith

Fall 2021

This course examines how corporate financial managers create value for stakeholders through a broad range of financial transactions. We will first take an in-depth look at corporate valuation methodologies from both a theoretical and applied perspective. Then, using a combination of case studies, class presentations, and assigned readings, we will focus on applications of these methods in the context of various types of corporate restructurings.

Specific applications will include capital structure and financing decisions, M&A and other asset restructuring decisions, and more complex financial transactions including buyouts and distressed restructurings.

Real Estate Finance Chazen, Edward Fall 2021

This course focuses on how capital is applied to debt and equity financing of income-producing real estate. The course content covers private debt and equity and public securities markets for real estate finance. The course format includes lectures, case study discussions, financial modeling exercises, guest speakers, REIT stock analysis, discussion of selected readings and simulation of negotiations. The course covers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The primary student outcomes are the ability to value commercial property; understand risks; how to structure a financing of commercial real estate; know the diverse sources of capital in the real estate industry and analyze, discuss and present a professional financing for debt and equity.

MFIN226001

Active Portfolio Management Dahan, Arie M

Fall 2021

The course provides an introduction to portfolio management with focus on quantitative investment process and methods. The course balances theoretical foundations with practical applications. Primary topics include asset allocation, portfolio construction including optimization, risk modeling, and risk measurement and management. Instruction will combine lectures, case discussions, and workshops, providing opportunities for students to apply quantitative methods to real world problems in several of the explored areas. The course combines investment ideas with analytics, so prior study in any or all of the following areas will make the course more enjoyable: probability/statistics (e.g., normal distributions, regression analysis), linear algebra (e.g., matrix algebra), and introductory calculus (e.g., derivatives). In addition, workshops will include use of both Microsoft Excel and Python (e.g., Jupyter Notebooks). Basic competency in each is a minimum requirement, and of course, the greater your skills, the better.

Venture Capital Hession-Kunz, Andrew Fall 2021  
This course looks at the nature of the VC firm, its fundraising, and compensation. It explores the portfolio strategies, valuation, and corporate management issues. Of importance are the VC's exit strategies, term sheet negotiations, and syndicating. Course includes analyzing long

term financial projections as part of a simulation, in which you work with the Entrepreneurial Finance course to analyze early-stage deal terms and negotiate an investment round. One mandatory class meeting on April 13th from 4:30pm-6:50pm. This course is for people who are not taking nor plan to take MFIN2210 Entrepreneurial Finance.

Mergers and Acquisitions Marcus, Paul A  
Fall 2021  
This course will review the merger and acquisition process from the perspective of buyers and sellers of both private and public companies. Placing emphasis on the valuation of companies as well as the analysis of non-financial factors, the course will endeavor to provide the participants with a practical approach to analyzing and advising clients on the positive and negative aspects of an M&A transaction. Additional topics will include understanding the use of leverage, transaction structure, due diligence, and the concept of fairness. The class will be a combination of lectures and case studies presented in class by the participants.

MFIN666502  
Applied Fundamental Analysis Navaratnam, Arvind  
Fall 2021  
The objective of the course is to provide hands-on experience in financial statement analysis in a real-world setting. Students will be exposed to general tools of financial analysis, theoretical concepts, and practical valuation issues. By the end of the course, students should develop a framework for evaluating an investment opportunity by using a firm's financial statements to draw an understanding of their performance and provide a basis for making reasonable valuation estimates, as well as have an understanding of the challenges investor face in determining the earnings power of a company. Due to the overlap of material, graduate students can only enroll in one of the following classes to count towards their Master's degree in the Carroll School: either MFIN8869 (Fundamental Analysis) or MFIN6665 (Applied Fundamental Analysis).

MFIN668001  
Renewable Energy and Sustainable Investments Adamson, Seabron C;Raikar, Santosh G  
Fall 2021  
In this course we will examine how large scale renewable energy projects actually get financed and built, using the structures of modern non-recourse project finance. We will examine the economics of large-scale green power production, and how it fits into the U.S. and global energy industries. Through a mixture of lectures and real-life examples students will get to see how renewable energy project finance works in actual deals that mix finance, public policy, legal, engineering, and environmental issues. The skills developed in analyzing non-recourse cash flow-based finance will be generally applicable to students interested not just in green energy, but also more widely in private equity and infrastructure investing. The course is designed to introduce students to the theory and practice of project finance in the energy and renewables sector, complementing academic finance theory with the practical aspects of financing capital intensive energy projects.

Economics Uhlmann, Philipp A Fall 2021  
The course is intended to introduce the students to basic economic concepts such as supply and demand, market equilibrium, efficiency, opportunity costs, sunk costs, different market structures, gross domestic product (GDP), money, inflation, unemployment, and monetary policy. The course will be divided into two parts: (1) Microeconomics where the focus is on individual economic agents. In this part consumer demand, firm supply, market structure,

equilibrium, efficiency, opportunity costs, and sunk costs are covered. (2) Macroeconomics where the focus is the economy as a whole. In this part the topics are GDP, growth, money, inflation, and unemployment.

AIM1: Applied Investment Management Martens, David J  
Fall 2021  
This course provides an opportunity for students to utilize both theoretical and practical aspects of the investment management process by competing to actively manage a million dollar portfolio for the University. AIM1 teaches students about institutional portfolio management, asset allocation, risk assessment, investment manager evaluation, and fundamental equity analysis. Students are placed in investment teams to respond to a Request for Proposal (RFP) in which they develop a framework for identifying and evaluating equities and bonds and managing a diversified risk-adjusted portfolio. Winning teams will be selected based on final presentations to a board of professional institutional investors and given the opportunity to manage live accounts in AIM2 during the spring semester.

MFIN883501  
Real Estate Finance Chazen, Edward Fall 2021  
This course focuses on how capital is applied to debt and equity financing of income-producing real estate. The course content covers private debt and equity and public securities markets for real estate finance. The course format includes lectures, case study discussions, financial modeling exercises, guest speakers, REIT stock analysis, discussion of selected readings and simulation of negotiations. The course covers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The primary student outcomes are the ability to value commercial property; understand risks; how to structure a financing of commercial real estate; know the diverse sources of capital in the real estate industry and analyze, discuss and present a professional financing for debt and equity.

**MFIN220701**  
Real Estate Finance Chazen, Edward Spring 2022  
This course focuses on how capital is applied to debt and equity financing of income-producing real estate. The course content covers private debt and equity and public securities markets for real estate finance. The course format includes lectures, case study discussions, financial modeling exercises, guest speakers, REIT stock analysis, discussion of selected readings and simulation of negotiations. The course covers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and

equity investors). The primary student outcomes are the ability to value commercial property; understand risks; how to structure a financing of commercial real estate; know the diverse sources of capital in the real estate industry and analyze, discuss and present a professional financing for debt and equity.

Introduction to the Investment Banking Industry Cramer, Robert E

Spring 2022

This course provides an overview of investment banking. We will study the investment banking industry with a specific focus on the role of investment bankers in capital markets and recent regulatory changes. Provide both an institutional perspective on the investment banking industry and an opportunity to apply financial theories and models. Some of the specific topics that we will cover are stock underwriting and valuation, fixed-income securities underwriting, including junk bonds, asset securitization, merchant banking and private equity firms, money

management and mutual funds, structuring deals, including mergers, acquisitions, and divestitures, global financial markets, securities regulations, and ethics.

Equity Securities Analysis Azevedo Duarte Silva, Ernesto T Spring 2022

The equities securities analysis and valuation course will teach a highly rigorous approach to equities securities analysis and valuation with a heavy emphasis on in-class discussion and case study analysis. Initially, the course will focus on financial theory that underpins equity security valuation, and then move on to understand how industry structure and a company's competitive advantage influences an investor's decision making and valuation. Financial statement analysis, modeling, and different valuation techniques will be explored in detail.

Where appropriate, guest lecturers will be brought in to share their specific expertise and perspectives as an investor. By the end of the course, the goal will be to have every student be able to analyze a company as a potential investment and understand its valuation.

Private Equity Gasperoni, James H Spring 2022

This course is the study of Private Equity as an asset class and its various components. Private Equity involves the investment of capital into companies and assets that are not publicly traded on stock exchanges. The objective of the course is to provide a basic understanding of the Private Equity ecosystem: private equity companies, underlying investments in companies (or assets) and the investors that provide financing for deals. A primary focus of the class will be traditional buyout investments: an area of the capital markets that is growing in both size and opportunity as well as increasing interest from investors. In addition, the course will consider the similarities and differences between typical buyouts and other private equity styles.

Economics DEPT

Spring 2022

The course is intended to introduce the students to basic economic concepts such as supply and demand, market equilibrium, efficiency, opportunity costs, sunk costs, different market structures, gross domestic product (GDP), money, inflation, unemployment, and monetary policy. The course will be divided into two parts: (1) Microeconomics where the focus is on individual economic agents. In this part consumer demand, firm supply, market structure, equilibrium, efficiency, opportunity costs, and sunk costs are covered. (2) Macroeconomics where the focus is the economy as a whole. In this part the topics are GDP, growth, money, inflation, and unemployment.

Spring 2022  
Students in AIM2 will actively manage a million dollar portfolio for the University during the spring semester. Teams will implement strategies that they formulated during the fall semester. Students are expected to fundamentally analyze stocks, develop buy/sell recommendations, and monitor company news that may result in material changes to target prices. This hands-on learning builds competency in the areas of portfolio management, investment research, sales and marketing, back-office operations, portfolio accounting, custody platforms, trading, and settlement procedures.

Ph.D. Seminar: Asset Pricing Balduzzi, Pierluigi  
Spring 2022  
This course is for second year Ph.D. students of finance.. The course is intended to generate enthusiastic, high quality intellectual activity around the course material. Focuses on the development of skills that will help students become conversant enough with basic theory and the current literature on asset pricing that would permit them to read critically and analyze papers in this area, develop enough expertise in selected empirical methods in finance that they will be able to use these techniques in their research, and to find potential thesis topics.

ISYS216001

Intro to Programming using Swift for iOS App Development Gallagher, John M  
Fall 2021

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects.

This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.

ISYS217001

Physical Computing - Interactive Art, Robotics, and Tech for Good Gallagher, John M  
Fall 2021

Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to create technical projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheel-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates.

Technology and Culture Griffith, William  
Fall 2021

This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Design Thinking and Strategy Dickinson, Kristine D  
Fall 2021

"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts.

The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

TechTrek

Doyle, Jeremiah T;Kane, Gerald C Fall 2021

Enrollment is limited and admission is competitive. Interested students should see [www.bc.edu/techtrek](http://www.bc.edu/techtrek) for application and course details. An entrepreneurial mindset is a critical component for new ventures, innovation within large companies, starting social initiatives, and developing a rewarding and impactful career in an ever-changing world. This course introduces students to the entrepreneurial mindset and is open to and intended for undergrads enrolled in any undergraduate program at BC (e.g. CSOM, MCAS, LSOE). The course combines traditional classroom elements with a series of Zoom meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. In the past year, students have met with senior leaders at companies like Google, Facebook, Airbnb, Uber, Salesforce, Goldman Sachs, Tesla, Dropbox, Fanatics, Twitter, numerous venture capital firms, and startups of all shapes and sizes. Course work and visits have an entrepreneurial focus, covering topics such as venture capital, entrepreneurial management, artificial intelligence, blockchain/ cryptocurrencies/ NFT, social media and platform strategies, cloud computing, and the social/ ethical implications of digital technologies. We also spend class time reflecting on our visits with entrepreneurs, discussing what implications the visit has for our understanding of business strategy and our own careers. The class is intended to help students identify and explore their own interests in relation to the increasing digitalization of the business environment and what these interests mean for their career trajectory. Enrollment is limited. Admission is competitive, and applications are available at [www.bc.edu/techtrek](http://www.bc.edu/techtrek). This class will be a prerequisite for a 1-credit travel study to NYC and/or SF anticipated for Spring 2022 and beyond.

Data Analytics in Practice Kokkodis, Marios

Fall 2021

Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data generated by modern information systems. Data analytics capitalizes on this data by processing, transforming it, and subsequently applying statistical and quantitative analysis and explanatory and predictive modeling. Managers can explore patterns, predict future trends, and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course will familiarize you with the capabilities and limitations of emerging analytics techniques, essential knowledge about data analytics programming and tools, and a core understanding required to be an intelligent manager and consumer of analytics. Upon completion of this course, you will be able to: perform basic data analytics tasks including: data profiling and feature engineering, data collection, transformation, and use of API, text transformation, data visualization, predictive modeling; understand biases in data and be a savvy consumer of analytics; justify decisions on the basis of analytics and identify opportunities; define problems that analytics can solve and provide data-driven solutions; use the ideas, concepts, and terminology of analytics appropriately to communicate with both business and data professionals. ISYS336001

Machine Learning and Artificial Intelligence Ransbotham, Samuel

Fall 2021

Machine Learning and Artificial Intelligence won't replace managers in the near term, but managers who use ML and AI will replace those who don't. Organizations now have too much data and not enough time for managers to consume in spreadsheets. Instead, the future of work involves managers working with machines to design algorithms that, for example, segment customers, forecast sales, schedule preventative maintenance, or predict markets. This course addresses both the technical and managerial aspects of these applications. Technically, the course applies a variety of classifiers, networks, and trees to machine learning contexts.

Students then evaluate and tune these models in supervised and unsupervised scenarios.

Examples will use R; students need to have a basic understanding of R. Managerially, this course examines how organizations create value through AI applications.

Social Media, Emerging Technologies, and Digital Business DEPT  
Fall 2021

The past few years have witnessed the rapid rise of a number of new types of information technologies, such as social media, so-called "sharing economy" platforms, artificial intelligence, blockchain, internet of things, virtual and augmented reality, just to name a few. These new tools both present immense opportunities and pose considerable threats for businesses of all sizes and across industries. This course explores the impact that these tools are having on the competitive environment, as well as the characteristics that companies, leaders, and employees will need to possess in order to thrive in this new environment increasingly defined by digital tools. Additionally, this course both learns about and learns with these information technologies in novel ways.

ISYS662501  
Geographic Information Systems for Planning and Decision-Making Cohen, Will W  
Fall 2021

Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: 1) collecting and organizing data, 2) analyzing this data for appropriate patterns, and 3) using software to represent data on maps to support decision making.

Cybersecurity Strategy and Management Evenchik, Leonard N  
Fall 2021

The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge.

ISYS665501  
Introduction to Blockchain and its Business Applications Collen, Bennett I  
Fall 2021

The objective of this course is to introduce the business of blockchain—a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency's game-changing potential, be able to separate fact from hype, and be effective leaders in the space.

Data Analytics 2: Data Management for Analytics Evenchik, Leonard N  
Fall 2021

Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology.

Digital Transformation Kane, Gerald C  
Fall 2021

Many legacy organizations are seeking to modernize their digital infrastructure to adapt to an increasingly digital competitive environment. Yet, oftentimes the technology is only half the battle, and effective digital transformation requires fundamental changes to culture, organizational structure, leadership style, talent models, and the like. This course provides a conceptual managerial overview of key digital technologies in today's business environment (e.g. cloud computing, machine learning, blockchain, enterprise social media, cybersecurity) as well as the organizational changes necessary to take advantage of them. This class also makes use of many of these tools in the classroom to enable an innovative interactive educational experience that will give students hands-on experience working within a more digitally enabled environment.

## Information Systems Courses: Spring 2022

ISYS102102

Digital Technologies: Strategy and Use Gu, Yuan  
Spring 2022

Information systems play a vital role in management. Future business professionals need to be able to assess, evaluate, and apply emerging technology to business. In this course, we approach the subject in two ways. First, students learn how professionals use technology in practice. Through various hands-on tech workshops, students will get a better understanding of how to apply technologies in business fields such as marketing, finance, operations. Second, students learn strategic management through the lens of technology. Students examine the role of technology in promoting innovation and organizational competitiveness across the functional areas of the firm. Through business case studies, students get a better understanding of how organizations use information systems to gain and sustain competitive advantage. Note: This class no longer teaches Excel. It is now taught in: BZAN1037 Excel for Business Analytics.

ISYS216001

Intro to Programming using Swift for iOS App Development Gallagher, John M  
Spring 2022

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a

series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). While this course is rigorous, challenging, and covers a broad set of topics at a rapid pace, the course assumes no prior programming experience. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects.

This course can be used in place of ISYS 2157 Programming for Management for credit toward the Information Systems concentration.

ISYS217001

Physical Computing - Interactive Art, Robotics, and Tech for Good Gallagher, John M  
Spring 2022

Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to create technical projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheel-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates.

Technology and Culture Griffith, William  
Spring 2022

This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Design Thinking and Strategy Dickinson, Kristine D  
Spring 2022

"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts.

The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

TechTrek West--Undergraduate Doyle, Jeremiah T;Kane, Gerald C Spring 2022

Enrollment is limited. Admission is competitive, and applications are available at

[www.bc.edu/techtrek](http://www.bc.edu/techtrek). Interested students can contact the instructor for application details.

TechTrek West is a 3-credit field-study course combining class work and due to the COVID situation one-hour in-person or Zoom meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. The class focuses on developing an entrepreneurial mindset, which is critical for numerous fields both in the wake of COVID and with the increasing digitalization of work and society. TechTrek should appeal to all majors. The class

will meet in a cohort model, with students attending in-person classes every other week and an average of 2-3 Zoom meetings each week outside of class time. Students must also reserve an additional time slot (Monday 3 4:15) for Zoom visits in addition to class time. Course work and visits will have an entrepreneurial focus, helping students identify and explore their interests concerning the increasing digitalization of the business environment. Applications are available at [www.bc.edu/techtrek](http://www.bc.edu/techtrek), and students will be admitted on a rolling basis during registration. Further details can be found in a slide deck at <https://docs.google.com/presentation/d/1RCpuic9MmM5XqUsPa4dvlmM-ac3hiZxU/> or an informational video at [https://drive.google.com/file/d/1RA2qMw8329kBNipmQtPJ-5Vq\\_1QbL3Z](https://drive.google.com/file/d/1RA2qMw8329kBNipmQtPJ-5Vq_1QbL3Z)

Managing Digital Innovation Fichman, Robert  
Spring 2022

The steady march of Moore's Law has accelerated the introduction of new products, processes, and business models enabled by digital technology. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. This course will provide students with the concepts and frameworks they will need to: (1) understand the nature of digital innovations and the factors affecting their emergence and diffusion, (2) identify and evaluate digital innovation opportunities (and threats), (3) manage the digital innovation process in organizations, and (4) evaluate the effects of digital innovation on business and society.

ISYS334001  
Data Analytics in Practice Teodorescu, Mike  
Spring 2022

Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data generated by modern information systems. Data analytics capitalizes on this data by processing, transforming it, and subsequently applying statistical and quantitative analysis and explanatory and predictive modeling. Managers can explore patterns, predict future trends, and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course will familiarize you with the capabilities and limitations of emerging analytics techniques, essential knowledge about data analytics programming and tools, and a core understanding required to be an intelligent manager and consumer of analytics. Upon completion of this course, you will be able to: perform basic data analytics tasks including: data profiling and feature engineering, data collection, transformation, and use of API, text transformation, data visualization, predictive modeling; understand biases in data and be a savvy consumer of analytics; justify decisions on the basis of analytics and identify opportunities; define problems that analytics can solve and provide data-driven solutions; use the ideas, concepts, and terminology of analytics appropriately to communicate with both

business and data professionals. Course trailer:

Systems Analysis and Design Sterpe, Peter J  
Spring 2022

This course is required for Information Systems concentrators.. The course studies information systems (IS) development including requirements, analysis, design, and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (ISYS3257/CSCI1157) must be completed prior to taking this course.

Geographic Information Systems for Planning and Decision-Making Cohen, Will W  
Spring 2022  
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic

Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: 1) collecting and organizing data, 2) analyzing this data for appropriate patterns, and 3) using software to represent data on maps to support decision making.

New Media Industries McNealy, Paul-Jon Spring 2022

This course is designed to introduce the changing business models of new media (video games, music, TV and film, and journalism) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and around the world, consumer behaviors, as well as legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution. This class will be a combination of in-class and Zoom sessions during class time, and will have an emphasis on influential guest speakers from various industries.

Cybersecurity Strategy and Management Evenchik, Leonard N

Spring 2022

The challenges and issues of cybersecurity are everywhere, and today, these are not just technical issues, but critically important business issues for all levels of management. The goal of this course is to develop an understanding of cybersecurity principles, procedures, tools and technology from a managerial perspective. The first part of this course is a discussion of why cybersecurity is a difficult and pervasive problem. We then learn about the different types of threats and study the tools and techniques that society, organizations, and individuals have to mitigate them, with a focus on risk management and internal controls. We will also explore a number of new areas of work including cryptocurrency and the security requirements for the Internet of Things (IoT). An important part of the course will be team projects at the end of the term, where students apply the concepts and techniques we have studied to a real-world management problem or challenge.

Introduction to Blockchain and its Business Applications Cathcart, Graham T

Spring 2022

The objective of this course is to introduce the business of blockchain--a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency's game-changing potential, be able to separate fact from hype, and be effective leaders in the space.

Data Analytics 2: Data Management for Analytics Evenchik, Leonard N

Spring 2022

Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology.

Digital Transformation DEPT

Spring 2022

Many legacy organizations are seeking to modernize their digital infrastructure to adapt to an increasingly digital competitive environment. Yet, oftentimes the technology is only half the battle, and effective digital transformation requires fundamental changes to culture, organizational structure, leadership style, talent models, and the like. This course provides a conceptual managerial overview of key digital technologies in today's business environment (e.g. cloud computing, machine learning, blockchain, enterprise social media, cybersecurity) as well as the organizational changes necessary to take advantage of them. This class also makes use of many of these tools in the classroom to enable an innovative interactive educational experience that will give students hands-on experience working within a more digitally enabled environment.

MGMT211001  
Human Resources Management Gordon, Judith R  
Fall 2021

This course surveys the functions, processes, and techniques of human resource management. It examines human resource management from the perspective of human resources systems implemented by managers and human resources professionals. The development of programs to reduce turnover, forecast personnel needs, and create career tracks is critical to the success of companies competing in the international arena. Just as it would be unthinkable for a modern manager to be computer illiterate, it is extremely difficult for a manager to succeed without a solid background in human resources management.

Managing Change Leduc, Steven M Fall 2021

What makes change agents effective? This course addresses this question with a focus on change leadership tools and approaches. This course helps prepare students to diagnose and implement successful change both when they are in charge and when they must work through others. Students will also understand the driving forces that organizations and consultants face in managing change and the challenges in responding to those forces. This course is designed to educate the students on the realities of change management in the workforce, provide practical application of change management strategies, engage in theoretical discussions on the subject, and provide a clearer understanding of the consultancy process as it relates to change management. Students are provided with hands-on experience in using tools and techniques involved in diagnosing and implementing change management. This course is particularly relevant for those wishing to develop their leadership and consultation capabilities.

Social Impact and Entrepreneurship Frechette, Edward K

Fall 2021

Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in

her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

International Management Maritan, James G

Fall 2021

This course provides students with an in-depth survey of the issues related to behavioral aspects in organizations in a non-domestic environment. A focus of the course is the examination of culture and ways in which it influences organizational behavior. This course will give students a solid understanding of effective human resource management practices in an international context and prepare them to lead in a global environment.

Idea Work: Making Things That Matter Rouse, Elizabeth D

Fall 2021

Any change, innovation, or new thing begins with an idea. While one person might come up with an initial idea, the idea, and the thing it consequently turns into, has the potential to become better when built upon by other people. The purpose of this course is to learn how to effectively develop and work with ideas to innovate and enact change in the context of organizations and beyond. Building from research on organizational creativity, innovation, collaboration, and entrepreneurship, students will learn frameworks for understanding the influence of individuals, social processes, and context on creativity and innovation and apply these frameworks throughout the course. Students will practice the key skills of idea work--generating, connecting, communicating, evaluating, and reshaping ideas--so that they can make things that matter.

Entrepreneurial Management Shaw, Douglas J

Fall 2021

This course focuses on the fundamentals of building a business either as a start-up or within a larger organization. Entrepreneurial Management introduces conceptual frameworks and tools that help students to identify, evaluate, launch and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Course goals include: Help you to understand the major issues entrepreneurs face when starting, growing and capturing the value of their ventures. Develop the analytical skills required for the environment in which entrepreneurs operate high uncertainty, rapid growth, ongoing change and limited resources. Be able to compare and contrast the major sources of capital available to entrepreneurs and the expectations of investors. Better understand the role that entrepreneurship will play in your career. Entrepreneurial Management requires strong qualitative and quantitative analysis skills. There are no official prerequisites. To evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements which will be reviewed during the initial classes.

Globalization, Culture, and Ethics Spinello, Richard

Fall 2021

This course helps students learn how to manage responsibly across different countries and cultures. The spread of capitalism and expansion of markets around the globe provoke challenging questions about socially responsible management. Managers must decide whether strategies and ethical principles that make sense in one culture can be applied to others.

Central to the course will be the difficult choice between adapting to prevailing cultural norms or initiating a cultural/moral transformation. The course considers a number of cases set in different cultural contexts. There are selected readings about the beliefs, ideals, and values at the core of these different cultures.

Strategic Management Montes, Juan

Fall 2021

This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Capstone: Leadership and Mindfulness Waddock, Sandra A  
Fall 2021

Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. No matter what your major, you will participate in groups and organizations that will consistently ask or expect you to lead. The best leader is authentic, has integrity, is self- and other-aware, and acts with this awareness firmly in mind. Good leaders, that is, act mindfully with respect for the people and world around them. This course explores your development as a mindful focusing inward and outward, reflecting on where you have come from and where you are going, what type of world you want to live in, your relationships with others, and how you can be an effective leader.

Managing Business in Society Smith, Katherine V  
Fall 2021

This course deals with the complexities of managing corporate sustainability and responsibility (new CSR) in today's dynamic and ever-more difficult world. Emphases include the integration of issues related to business in society, ethics, responsibility, accountability, transparency, governance, and ecological sustainability into corporate strategies and practices. We use a strategic management lens to learn the potential sources of strategic and competitive advantage that can derive from CSR, and explore some of the problems associated with poor responsibility practices.

Mergers and Acquisitions Mucci, Richard L  
Fall 2021

This course provides an overview of the various stages of the M&A process, and the key decision points which help guide it. This course is meant to be a survey class, covering a wide range of M&A topics. It is recommended for participants pursuing careers requiring the formulation of inorganic growth options for businesses (e.g., general management, business development, or consulting) or the assessment of business investment opportunities (e.g., investment banking, venture capital, or private equity). A broad overview of each typical stage in an M&A process will be discussed to include strategy, target identification, valuation, due diligence, financing, deal structure, negotiating an agreement, closing, and integration. Armed with an understanding of each stage of the M&A process, possible decision frameworks will be formulated and discussed.

Qualitative Research Methods Pratt, Michael G  
Fall 2021

Open to current Ph.D. students only (not available for MBA students).. The purpose of this course is to help you better understand qualitative research methods so as to enable you to be a better researcher and reviewer of work that employs these types of methodologies. Given the variety of methods that fall under the rubric of "qualitative methods," some classes will discuss general issues or skills (e.g., gaining access, interviewing, observing) that are applicable to several different methodological approaches, while others will focus more specifically on a particular approach (e.g., ethnography, case studies, grounded theory). Skill development is essential to the course, and there will be opportunities to practice specific methodological techniques and to critique exemplary qualitative research.

## Management and Organization Courses: Spring 2022

MGMT102101  
Organizational Behavior Grubb, Anita R  
Spring 2022

Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students.. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Organizational Behavior DEPT  
Spring 2022

Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students.. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to

institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Ethical Leadership Skills Nielsen, Richard P Spring 2022

This course focuses on ethics leadership and engagement methods in different types of pre-modern, modern, and postmodern organizational and political-economic contexts. What are our visions of ethical leadership, relationships and organization? What were we doing when we were at our best in leading meaningful and effective change and problem resolution in our relationships with family and friends and in our work and citizenship lives? What have been the individual, organizational, and environmental obstacles that made it difficult for us to lead meaningfully and effectively? What are different types of methods in trying to intervene and lead ethical change?

Negotiation Nielsen, Richard P Spring 2022

Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

Leadership

Leduc, Steven M Spring 2022

In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

Managing Change Ritchie-Dunham, James L Spring 2022

What makes change agents effective? This course addresses this question with a focus on change leadership tools and approaches. This course helps prepare students to diagnose and implement successful change both when they are in charge and when they must work through others. Students will also understand the driving forces that organizations and consultants face in managing change and the challenges in responding to those forces. This course is designed to educate the students on the realities of change management in the workforce, provide practical application of change management strategies, engage in theoretical discussions on the subject, and provide a clearer understanding of the consultancy process as it relates to change management. Students are provided with hands-on experience in using tools and techniques involved in diagnosing and implementing change management. This course is particularly relevant for those wishing to develop their leadership and consultation capabilities.

Social Impact and Entrepreneurship Frechette, Edward K Spring 2022  
Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

MGMT217001  
Entrepreneurial Management Shaw, Douglas J Spring 2022  
This course focuses on the fundamentals of building a business either as a start-up or within a larger organization. Entrepreneurial Management introduces conceptual frameworks and tools that help students to identify, evaluate, launch and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Course goals include: Help you to understand the major issues entrepreneurs face when starting, growing and capturing the value of their ventures. Develop the analytical skills required for the environment in which entrepreneurs operate high uncertainty, rapid growth, ongoing change and limited resources. Be able to compare and contrast the major sources of capital available to entrepreneurs and the expectations of investors. Better understand the role that entrepreneurship will play in your career. Entrepreneurial Management requires strong qualitative and quantitative analysis skills. There are no official prerequisites. To evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements which will be reviewed during the initial classes.

MGMT217501  
Thinking Strategically Integrative Strategy Simulation Montes, Juan Spring 2022  
This course prepares students to make executive-level decisions by participating and competing in business simulation. The course utilizes a sophisticated, market-leading simulation platform calls "Global DNA" to create a realistic, hands-on learning experience. The course allows students to manage a company and see the results of specific functional and team decisions, integrating all management areas: marketing, organizational behavior, operations, accounting, and finance. The course is based around the concept of experiential learning, and student teams have a high degree of freedom to follow different strategies. The competitive nature of the simulation shows and compares the results of each company in every round, with a high level of detail (i.e., sales and production reports, financial information), teaching teams to effectively analyze quantitative business information. Students learn to think strategically by incorporating the potential scenarios of what other teams can do during the simulation in their own decisions.

MGMT217901  
Digital Strategy Subramaniam, Mohan Spring 2022  
Over the years, industry structures and its boundaries have largely framed our strategic thinking. Accordingly, finding and maintaining attractive positions within industries, building barriers to entry around its boundaries, and jockeying with established industry rivals have remained some of the dominant tenets for competitive strategy. We have also largely assumed that the primary impetus for competitive advantage comes from a firm's internal assets and its core competencies. Indeed, firms have overwhelmingly relied on its core competencies to grow either through increasing market shares within its existing industries or by diversifying into new but related industries wherein its competencies are relevant. More recently, however we are witnessing a radical shift in these core assumptions for growth and competitive advantage. Reasons for this shift include an unprecedented expansion of digitization in the business world and the emerging significance of new informational rather than traditional physical assets for competitive advantage. Tech companies such as Uber, Amazon, Facebook, and Airbnb exemplify this shift, showing how digitization can be harnessed to build powerful platforms, directly connect with millions of customers, understand the intricacies of how products and services are consumed rather than produced, draw on the inputs of thousands of third-party organizations, and broaden their business environments from industries to ecosystems. In such ecosystems, the core drivers of competitive advantage and growth are proving to be different from what traditional industrial companies have long relied on. This course delves into how firms should craft their digital strategy in this changing environment. The focus specifically is on traditional firms that are accustomed to crafting competitive strategies tailored to their industries. This course focuses on how they can transition their competitive strategies and make them relevant for the modern digital era.

Leadership and Corporate Accountability Spinello, Richard Spring 2022  
This course is designed to provide an overview of the economic, legal, and ethical responsibilities of companies and their leaders. Through a series of case studies, it will demonstrate the acute challenges of ensuring that a company's conduct conforms to those responsibilities. A major portion of the course will review the principal obligations of corporations to five primary stakeholder groups: investors and shareholders, customers, employees, suppliers, and the general public. Insider trading, fiduciary duties, disclosure of health risks, fairness in pricing, power asymmetries, affirmative action, international labor rights, market failures, privacy rights, environmental sustainability, and corporate citizenship represent some of the issues to be discussed in this segment of the course. A secondary theme is corporate governance. Several cases will explore the proper role of management, the Board of Directors, financial intermediaries, and external regulators.

Strategic Management Montes, Juan Spring 2022  
This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

**MGMT810901**  
 Digital Strategy Subramaniam, Mohan Spring 2022  
 Digital technologies are revolutionizing traditional interdependencies among businesses. Managers have hence begun to recognize their business environments as digital ecosystems. But for firms accustomed to framing their business environments as industries, this is a significant shift in perspective, requiring an understanding of fresh strategic initiatives necessary to compete in the digital era. This course will elaborate on what is new and different about digital ecosystems for firm strategy. The course will offer frameworks that explain how digital ecosystems provide firms with new sources of value and new avenues for growth and highlight new strategic options for firms to compete in the new digital era.

 Negotiating DiOrio, Chris M Spring 2022  
 Have you found yourself limited in your performance because you lacked the ability to effectively negotiate for more resources, including staff, money, or time? Do you experience difficulty in handling conflict in organizations? Are you anxious to improve your ability to take a problem-solving approach to organizational dilemmas? This course assists students in becoming more effective negotiators in a range of organizational situations. Students learn the different types of negotiating approaches and practice their use in a variety of situations.

 Strategic HR Kierner, Agnieszka D Spring 2022  
 Whether leading a start-up or a team in a large organization, after this course you will have the skills needed to effectively design and execute strategies to manage people in such a way that they support long term business goals and outcomes. The course will help you think systematically about critical aspects of managing human assets and provide practical examples on how these strategies need to be implemented to achieve competitive advantage. Through a mix of lecture, case study analysis, in-class simulation and discussion we will take a journey around key issues leaders need to tackle: data driven HR, recruiting and onboarding, talent management, dealing with high and low performers, benefits and compensation, managing in diverse and multicultural environments. The course will draw upon personal experiences of the instructor from leading technology start-ups, advising and driving change in large organizations, as well recent literature on these topics.

 Business Wars: Leading Through Change and Disruption Kierner, Agnieszka D  
 Spring 2022  
 In a world where the average lifespan of a company has significantly decreased, leaders find themselves in constant change and disruption management. Each class will take you to an analysis of a real story of what drives these companies and their leaders, investors, and employees to new heights or to ruin. We will analyze and discuss specific situations of a defining time for a company that needs to manage through a disruption in their industry. We will then understand and analyze the business context and learn about leadership behaviors needed to survive and thrive as an executive or employee of a company undergoing such a fascinating change. After finishing the course you will be able to shape your own perspective and behaviors helping you and your firm thrive in our fast-paced world.

MKTG311401

Pricing and Demand Analytics Engel, Samuel

Fall 2021

How do companies decide what prices to set for a COVID vaccine? A new model Tesla?

Investment fees for a Fidelity mutual fund? A Disney+ subscription? A new financial planning service by Charles Schwab? A new Apple iPhone? Or the Amazon cloud? There are ethical questions about pricing, like Uber's surge prices that fluctuate with demand, or congestion pricing on highways or to enter cities. And there is puzzling pricing, like why Taylor Swift or Bruce Springsteen sell their concert tickets at lower prices even though Stub-Hub sells them for way more in the open market. Pricing is one of the most fascinating, and most important skills for anyone entering a management career--in finance, marketing, sales, accounting, retailing, e- commerce, or business analytics. In this course you will learn about value-based pricing based on the value customers perceive, the psychology of pricing (\$9.99 versus \$10), segmented pricing (for different segments in the marketplace), using cost accounting to estimate customer cost-to-serve and customer profitability, and how to set prices for really new products (like new innovations). In addition, you will learn demand analytics and dynamic pricing used by airlines, destination theme parks like Disney, and the digital economy. The instructor is a leader in pricing innovation for an aviation pricing consulting firm.

Services Marketing Samaras, Xanthe P Fall 2021

The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers.

Digital Marketing O'Hern, Matthew S Fall 2021

In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

Digital Marketing O'Hern, Matthew S Fall 2021

In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

Heritage Marketing DEPT  
Fall 2021

This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

Design Thinking and Strategy Dickinson, Kristine D  
Fall 2021

"Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts.

The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

Sports Marketing Lev, Mark T  
Fall 2021  
The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

Social Media, Emerging Technologies, and Digital Business DEPT  
Fall 2021  
The past few years have witnessed the rapid rise of a number of new types of information technologies, such as social media, so-called "sharing economy" platforms, artificial intelligence, blockchain, internet of things, virtual and augmented reality, just to name a few.

These new tools both present immense opportunities and pose considerable threats for businesses of all sizes and across industries. This course explores the impact that these tools are having on the competitive environment, as well as the characteristics that companies, leaders, and employees will need to possess in order to thrive in this new environment increasingly defined by digital tools. Additionally, this course both learns about and learns with these information technologies in novel ways.

MKTG800301

Product Planning and Strategy Bright, James P Fall 2021

This course focuses on the challenge of creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company, or in starting their own business at some point. The course is built on the concept of learning by doing, as small student teams go through the full process of coming up with their own new product or service ideas, evaluating them, doing market research, and developing launch plans. We also assess a number of current new product ideas, analyze cases from a range of industries, and have one or two outside speakers. There is a heavy emphasis on discussion and practicality.

Consumer Behavior Hagtvedt, Henrik Fall 2021

This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

MKTG801401

Strategic Pricing Management Smith, Gerald Fall 2021

This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

MKTG801901

Entrepreneurial Marketing Strategy Neeson, John J Fall 2021

This course focuses on how to develop an integrated marketing plan for a new company. The class will teach techniques and skills for developing a marketing strategy for a startup, including prioritizing market segments, positioning and messaging approaches, sales model and capacity planning for marketing, and developing an integrated marketing model to help scale the new endeavor. Startups are unique, requiring an agile marketing approach, the ability to scale quickly, and the requirement to build a new category or quickly enter an existing one. Classes will incorporate a combination of lectures, projects, guest speakers, and the development of a marketing plan for a new or early stage startup.

## Marketing Courses: Spring 2022

MKTG102101

Marketing Principles Hudson, Bradford T Spring 2022

This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

Consumer Behavior Aksu, Gunben Ceren Spring 2022

This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

Services Marketing Samaras, Xanthe P Spring 2022

The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers.

MKTG315301

Multichannel Retailing Seiders, Kathleen Spring 2022

This class focuses on the necessary concepts and principles of retailing involved in making retail and wholesale decisions. The course looks at retailing from both a consumer perspective (e.g., why does a consumer shop a particular retail outlet?) and a business-to-business perspective (e.g., how does the retailer decide which supplier to use?). Additionally, the course examines the various methods of retailing (e.g., bricks and mortar, bricks and clicks) and how these methods have evolved and will evolve in the future.

Integrated Marketing Communications Nenkov, Gergana Y Spring 2022

This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P's) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

Digital Marketing O'Hern, Matthew S Spring 2022

In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

**Product Planning and Strategy DEPT**  
**Spring 2022**  
 With the growing concern over the success rate of new products, an intense effort is being employed by marketers to establish more effective new product development and management strategies. Using lectures and case studies, this course will focus on the process of conceiving new products, developing an effective organization, and designing and implementing effective marketing strategies and policies over the course of the product life cycle. Class material will provide the student with insight into new product development across a wide variety of industries.

**Strategic Brand Management Fisher, John H**  
**Spring 2022**  
 This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

**Heritage Marketing Hudson, Bradford T Spring 2022**  
 This course explores the interaction of marketing and history in the consumer marketplace. Heritage marketing is a strategic approach to capitalize on the historical status of older brands in the present and future. It uses the entire marketing system to develop a strategic position based on heritage, activate powerful dynamics in consumer behavior such as nostalgia, communicate relevant messages, and monetize the past. Business history and archival collections provide the content and inspiration for related communications and new product development. The primary classroom activity will be the analysis and discussion of business case studies from various industries. The pre-requisites are Marketing Principles and any course from the History core sequence.

**Design Thinking and Strategy Dickinson, Kristine D**  
**Spring 2022**  
 "Design thinking is a human-centered approach to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success." -Tim Brown, CEO of IDEO. Strategic design thinking is an integral driver of innovation and a significant factor in a business' ability to foresee and adapt to customer needs. Companies like Apple, IDEO, and Pixar are all pioneers in the field, and this course will draw directly from their proven methods. Students will learn the various phases of design thinking, and how to apply a customer-centric approach to products and services in a range of industries. Students will delve into topics such as user experience (UX) product design, creative problem-solving, strategic storytelling, and customer-centric business decision making. Course content will include team projects, case studies, and occasional guest lectures from industry experts.  
 The class will be highly focused on practical experimentation and is directly relevant for students interested in product and brand management, marketing strategy, entrepreneurship, and beyond.

**TechTrek West--Undergraduate Doyle, Jeremiah T;Kane, Gerald C Spring 2022**  
 Enrollment is limited. Admission is competitive, and applications are available at [www.bc.edu/techtrek](http://www.bc.edu/techtrek). Interested students can contact the instructor for application details. TechTrek West is a 3-credit field-study course combining class work and due to the COVID situation one-hour in-person or Zoom meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. The class focuses on developing an entrepreneurial mindset, which is critical for numerous fields both in the wake of COVID and with the increasing digitalization of work and society. TechTrek should appeal to all majors. The class will meet in a cohort model, with students attending in-person classes every other week and an average of 2-3 Zoom meetings each week outside of class time. Students must also reserve an additional time slot (Monday 3 4:15) for Zoom visits in addition to class time. Course work and visits will have an entrepreneurial focus, helping students identify and explore their interests concerning the increasing digitalization of the business environment. Applications are available at [www.bc.edu/techtrek](http://www.bc.edu/techtrek), and students will be admitted on a rolling basis during registration. Further details can be found in a slide desk at <https://docs.google.com/presentation/d/1RCpuic9MmM5XqUsPa4dvnM-ac3hiZxU/> or an informational video at [https://drive.google.com/file/d/1RA2qMw8329kBrnimpQtPJ-5Vq\\_1QbL3Z](https://drive.google.com/file/d/1RA2qMw8329kBrnimpQtPJ-5Vq_1QbL3Z)

**Digital Agency Experience O'Hern, Matthew S**  
**Spring 2022**  
 In today's business environment, marketers must be adept at creating highly targeted promotional messaging that resonates with their customer base. In this course, through hands-on exercises and by working on campaigns for real-world clients, students will develop a deeper understanding of how to create effective social media campaigns, how to use social listening technologies to assess customer needs, and how to increase online effectiveness via enhanced search engine optimization (SEO) and website optimization techniques. In addition, this course will help prepare students for entry-level positions in digital marketing agencies by introducing them to the challenging processes associated with onboarding clients, developing an appropriate scope of work, creating collateral for client pitch meetings, responding to client feedback, creating high impact creative assets, and creating an effective social media calendar.

Strategic Selling and Persuasion Westman, John C  
Spring 2022  
Two fundamentals of business: someone must get the goods and services out the door, and someone must get the cash to come in the door. Sales is the function that does the latter. It, and its management, will be covered in this course. We will study the art of persuasion, modern day Rhetoric in actual practice. The discipline will be addressed biologically. We will dissect real industry practitioners when they visit class, and actual sales calls in the field as a research paper. Upon course completion, students will have a complete understanding of both the selling and sales management process.

New Media Industries McNealy, Paul-Jon Spring 2022  
This course is designed to introduce the changing business models of new media (video games, music, TV and film, and journalism) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and around the world, consumer behaviors, as well as legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution. This class will be a combination of in-class and Zoom sessions during class time, and will have an emphasis on influential guest speakers from various industries.

Marketing Kerbs, Jon W Spring 2022  
This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

Customer Research and Marketing Decisions Ordbayeva, Nailya  
Spring 2022  
The current business environment rewards companies that respond to consumer demand faster than their competitors, and marketing research is a key route for companies to learn about their target markets. This course seeks to make you both a smarter producer and consumer of marketing research. Topics covered include formulating project-based research questions, the major styles of marketing research, and fundamental research design such as measurement theory and sampling. SPSS and data analysis are covered from a managerial perspective, and you will learn how to conduct and interpret common forms of data analysis seen in marketing research reports.

Integrated Marketing Communications Nenkov, Gergana Y  
Spring 2022  
This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P's) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

MKTG801402  
Strategic Pricing Management Engel, Samuel  
Spring 2022  
This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

MKTG801501  
Strategic Brand Management Fisher, John H  
Spring 2022  
This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

MKTG801901  
Entrepreneurial Marketing Strategy Neeson, John J  
Spring 2022  
This course focuses on how to develop an integrated marketing plan for a new company. The class will teach techniques and skills for developing a marketing strategy for a startup, including prioritizing market segments, positioning and messaging approaches, sales model and capacity planning for marketing, and developing an integrated marketing model to help scale the new endeavor. Startups are unique, requiring an agile marketing approach, the ability to scale quickly, and the requirement to build a new category or quickly enter an existing one. Classes will incorporate a combination of lectures, projects, guest speakers, and the development of a marketing plan for a new or early stage startup.

MKTG802101  
Programming and Data Analysis for Marketing Cirik, Ali A  
Spring 2022  
Data-driven marketing has revolutionized the marketing world and become a fundamental factor of competitive advantage. This marketing course primarily focuses on using programming, data analysis and data visualization techniques to make data-driven marketing decisions. The course builds on 3-course Data Analytics Sequence by providing hands-on, and practical learning experience. By the end of this course, you will learn how to clean, merge, analyze, and visualize data using various technologies such as Python libraries to understand consumer behavior, conduct market analysis, and more. The classes will incorporate a combination of lectures, class discussions, and in-class coding sessions.

Portico

DEPT Fall 2021

This course is required for all Carroll School students and must be taken in the fall semester of their first year at BC. Portico fulfills the Carroll School ethics requirement. This is the introductory course for Carroll School of Management's first year students. Topics will include ethics, leadership, globalization, economic development, capitalism, innovation, entrepreneurship, vocational discernment, and the functional areas of business. This will be an interactive three-credit seminar, serving as one of the five courses in the fall semester and fulfilling the ethics requirement for the Carroll School. The instructor will serve as academic advisor during the student's first year.

Senior Seminar in Business Ethics

Smith, Michael J Fall 2021

The purpose of this course is to provide Portico Teaching Assistants a greater depth of understanding of the philosophical issues covered in Portico, and to offer an introduction to the core pedagogical techniques involved in teaching applied ethics. Participating TAs will study the course material on a second-order level by considering the evolution of their understanding of the course material over their undergraduate career, and by exploring pedagogical best-practices to improve teaching outcomes. The structure of the course will thus run concurrently with that of Portico. While primarily directed towards enriching the experience of the TAs, the course will simultaneously aim to facilitate the goals of Portico itself by providing TAs with additional tools and resources for engaging with their students and creating a more cohesive and impactful classroom community.

The Good Life: Life, Money, and Generosity

Bagnani, Elizabeth S Fall 2021

This course is about becoming. It encourages students to reflect on the type of person they are becoming and the type of person they want to become. First part considers the question "what is a good life?" and revisits some themes from Portico. Students also reflect on their assumptions about and tensions around money. Second part narrows to consider some tools relating to budgeting and debt. Final part considers "what does it mean to be generous?" and questions that consider a life that includes both money and much more. In use: reflections, reading quizzes, interview, first-post-graduation-year budget, and final paper.

## Portico Courses: Spring 2022

PRTO100001

Portico Corbin, Ian M Spring 2022

This course is required for all Carroll School students and must be taken in the fall semester of their first year at BC. Portico fulfills the Carroll School ethics requirement.. This is the introductory course for Carroll School of Management's first year students. Topics will include ethics, leadership, globalization, economic development, capitalism, innovation, entrepreneurship, vocational discernment, and the functional areas of business. This will be an interactive three-credit seminar, serving as one of the five courses in the fall semester and fulfilling the ethics requirement for the Carroll School. The instructor will serve as academic advisor during the student's first year.

Free Markets, Faith, and the Common Good

Cioni, Joseph R Spring 2022

If sharing our gifts, pursuing justice, and acting on our concern for the poor and marginalized of society are core values of Jesuit-trained students, to what extent is free market capitalism a good "fit" for helping us meet those goals? In this course, we will explore several key moral and philosophical foundations of free market capitalism. These arguments will then be placed in dialogue with central insights contained in Catholic social teaching, especially the principles of human dignity, solidarity, the preferential option for the poor, and the common good.

Happiness in a Commercial Society

Evans, Jeremy A; Smith, Michael J Spring 2022

The aim of this course is to introduce students to the interdisciplinary study of human well-being as it applies to the domains of contemporary business and commercial life. The course will include philosophical, psychological, and social scientific inquiries into human flourishing, as well as the nature of meaningful work, the relationship between wealth and happiness, and the application of well-being measures to thriving economic and political institutions.

Special Topics: The Ethics and Politics of Capitalism

Evans, Jeremy A; Smith, Michael J Spring 2022

This course explores the philosophical basis and moral implications of contemporary commercial life. Along the way, we will consider the role of business in society, the relationship between capitalism and democracy, the ethics of consumption, among other issues where market values intersect public and private virtues.

Perspectives on Management Clavin, John C;Doyle, Jeremiah T Fall 2021

This course, taught by practitioners John Clavin (BC '84) and Jere Doyle (BC '87), provides BC students with an excellent opportunity to explore the functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors

Case Competition Cohort La Combe, Amy M

Fall 2021

Reserved for Sophomores and Juniors in the Carroll School, with permission of the instructor. This course is for Sophomore and Juniors in the Carroll School of Management who are interested in learning how to better prepare for strategy and ethics case competitions. The class will meet weekly for one hour with the objective to develop skills in the following areas: be able to effectively analyze an ethics case and a strategy case, determine feasible alternatives, craft a recommendation, implement recommendations, and prepare for judges' questions. The course will also help students with a PowerPoint presentation for case competitions and oral tips for such a competition. The 10-week course will end with an internal case competition where winning groups will be chosen to attend competitions and represent the Carroll School nationally in the spring and subsequent fall (juniors who are abroad in the spring will not be eligible to take the course).

# Connell School of Nursing

## Nursing Courses: Summer 2021

NURS749201

Basic Principles of Nurse Anesthesia Practice Thomas, Allan C Summer 2021

This course is an introduction to the clinical application of nurse anesthesia practice. An historical perspective of the nurse anesthetist role will be explored and current anesthesia practice and techniques will also be described. Students will be introduced to anesthesia delivery systems and to concepts of patient safety and advocacy. Specific local and national legal aspects of nurse anesthesia practice will be examined.

Credits: 3

Room and Schedule: Carney Hall 306 M 01:00PM-04:00PM Satisfies Core Requirement: None Prerequisites: NURS7490 and NURS7491 Corequisites: NURS7493 and NURS7494 Cross-listed with: None

NURS749301

Pharmacology of Anesthetics and Accessory Drugs Emery, Susan A Summer 2021

This course is a study of the pharmacologic theories as they relate to nurse anesthesia practice. The application of pharmacokinetic and pharmacodynamic principles as they relate to specific anesthetic and adjunct drugs used in anesthetic practice will be explored. Integration of theory into practice will be emphasized through the use of case studies. Ethical, legal and economic considerations of drug selection will also be discussed as the student learns to develop an anesthesia plan of care.

NURS749401

Physiologic Variables for Nurse Anesthesia II--Card Emery, Susan A Summer 2021

This course builds on basic concepts of the anatomy, physiology, and pathophysiology of the cardiovascular system and provides in-depth information about the cardiovascular system and anesthesia. The impact of anesthesia on the structure and function of the heart as a pump as well as the characteristics of both systemic and pulmonary circulation will be explored. Measures to evaluate cardiovascular function, including electrocardiography, cardiac output, blood volume and arterial and venous pressures, will be described using clinical examples. Alterations in normal anatomy and physiology and implications for the anesthetic plan for both non-cardiac and cardiac surgery will be discussed.

NURS759501

Nurse Anesthesia III Thomas, Allan C Summer 2021

This course focuses on the delivery of anesthesia care within advanced nursing practice in a broad range of clinical situations for patients with multiple, complex health problems. Through the refinement of assessment and management skills, critical thinking is further developed. With supervision, students assume more overall responsibility for anesthetic management. Through seminar participation students explore the anesthetic management of diverse populations and specialty situations. Likewise, simulation is focused on the management of complex and specialty situations. Concurrent with this semester, students begin a student-directed review of didactic content in advance preparation for the National Certification Exam.

NURS759502

Nurse Anesthesia III DEPT Summer 2021

This course focuses on the delivery of anesthesia care within advanced nursing practice in a broad range of clinical situations for patients with multiple, complex health problems. Through the refinement of assessment and management skills, critical thinking is further developed. With supervision, students assume more overall responsibility for anesthetic management. Through seminar participation students explore the anesthetic management of diverse populations and specialty situations. Likewise, simulation is focused on the management of complex and specialty situations. Concurrent with this semester, students begin a student-directed review of didactic content in advance preparation for the National Certification Exam.

NURS871401

Nursing Ethics and Professional Responsibility in Advanced Practice Uveges, Melissa K Summer 2021

The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

NURS871601

Health Care Policy for Nursing Leaders Conahan, Catherine;O'Reilly-Jacob, Monica K Summer 2021

This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

Epidemiology

Horrell, Lindsey N;Nguyen, Tam H Summer 2021

Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

NURS973001

Advanced Physiology and Pathophysiology across the Lifespan Faulkner, Kenneth Summer 2021

This course focuses on physiologic and pathophysiologic processes that affect individuals across the lifespan. The emphasis is on central concepts of physiology and pathophysiology, including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation, hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

Pharmacotherapeutics in Advanced Practice Nursing LaPierre, Kellie L;Wood, Lisa J Summer 2021

This course will provide the advanced practice nursing student with the fundamental pharmacologic principles necessary to support pharmacotherapeutic decision making in collaboration with patients across the lifespan. The interrelationship of physical, psychosocial, cultural, pharmacogenomic, economic, ethical, and legal factors will be explored. The student will develop evidence-based, cost effective interventions to promote optimal person-centered drug therapy. Application of these principles to various real world clinical situations and individual responses will be emphasized.

Advanced Health/Physical Assessment across the Lifespan Connolly, Maureen A;White, Laura S Summer 2021

This course uses a holistic approach and risk appraisal frameworks as a basis for health assessment across the lifespan. Building on knowledge of basic health assessment, the APRN student performs comprehensive health histories and physical and mental health examinations. Students will incorporate subjective and objective data to evaluate healthy individuals and those with acute and/or chronic disease. The course utilizes learning laboratory experiences, high-low fidelity simulation, and standardized patients to facilitate students' learning. Health promotion, health maintenance and harm reduction concepts are emphasized and applied, taking into consideration life circumstances and cultural, ethnic, and developmental variations.

NURS986401

Chemistry, Biochemistry, and Physics for Nurse Anesthesia Practice Emery, Susan A Summer 2021

This course is an integrated study of chemistry, biochemistry, and physics underpinning nurse anesthesia practice. The chemical structure of compounds and chemical reactions are examined as they apply to pharmacokinetics and pharmacodynamics of anesthetic agents. Concepts of solubility, diffusion, and osmosis are described as well as the role of acid-base balance in maintaining the body's internal milieu. Metabolic pathways responsible for energy production are examined. Gas laws and other laws of physics as they pertain to nurse anesthesia practice are illustrated with specific examples. The emphasis is placed on integration of scientific theory into practice.

NURS121001  
Public Health in a Global Society Edmonds, Joyce K;van de Water, Brittney Fall 2021  
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

NURS208001  
Pathophysiology Hurley, Dorean L Fall 2021  
Pathophysiology offers an integrated approach to human disease. The course builds on the underlying concepts of normal function as they apply to the basic processes of pathogenesis. Biological variations of age, gender, and cultural differences are integrated into the course content where applicable. Common acute and chronic health problems are introduced to explore the interrelatedness of a variety of stressors that affect physiological function. Successful completion of Pathophysiology facilitates the student's transition into clinical nursing practice.

**NURS212201**  
Nursing Assessment of Health Across the Life Span Marshall, Alison O;Sly, Jacqueline R  
Fall 2021  
This course introduces the concepts of health, health promotion, and growth and development across the lifespan. The interactions of underlying mechanisms such as environment, culture, ethnicity, family, genetics, and gender that are foundational to the development and individual health will be explored. Theories and principles that address physical, cognitive, and psychosocial growth and development will guide understanding of the complex healthy human, from birth to geriatrics and death. Principles and theories of health promotion will be analyzed and applied from a nursing perspective to support the individual's desire to increase personal and/or family health potential and well-being.

Principles of Evidence-Based Nursing Nguyen, Tam H  
Fall 2021  
This course seeks to develop an applied understanding of evidence-based practice as it relates to the science of nursing. Through exploring components of the research process, an appreciation of the various types of evidence used by nurses and an understanding of the importance of evidenced-based research to improve clinical practice will be fostered. The ethical considerations related to evidence-based practice will be discussed. At the conclusion of the course, students are prepared to be to be critical consumers of research used in evidence-based practice.

Adult Health Nursing Theory II Barone, Stacey H;Repsha, Christine L Fall 2021  
This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

NURS324501

Clinical Laboratory of Childbearing Theory Capotosto, Melissa K  
Fall 2021

Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities.

Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

Psychiatric Mental Health Nursing Theory Hanan, Diana M

Fall 2021

This course builds upon the standards of practice from APNA-ISP, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment

modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

NURS426001

Population Health Nursing Theory Horrell, Lindsey N

Fall 2021

This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

NURS426401  
Actualizing the Role of Professional Nurse Cullinan, Donna L;Simonelli, Mary C  
Fall 2021  
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

Ethical Issues in Advanced Practice Nursing Uveges, Melissa K

Fall 2021

The focus of this course is to explore the boundaries of Advanced Practice Nurses' (APNs) ethical responsibilities to individuals, groups, and society in an intra- and interdisciplinary, collaborative health care environment. The philosophical and theoretical foundations of ethical practice are critically examined for their ability to enhance decision-making that best serves the interests of current and future patients and meets societal needs. An emphasis is placed on developing the skills needed to address challenges and obstacles to ethical practice in advanced practice roles and settings. Strategies to influence health policy related to various specialty populations are explored.

NURS743701

Advanced Practice Psychiatric Nursing Across the Life Span I Marchetti, Carol A;Petreca, Victor G

Fall 2021

In this combined didactic and clinical course, students learn to conduct mental health evaluations, to formulate psychiatric and nursing diagnoses, and to plan and implement short-term/initial treatment, case management, referral plans, and client services for adults, children, and families. Clinical placements (20 hours/week) are individualized to match students' interests in a variety of psychiatric-mental health (PMH) settings including mental health outpatient services and forensic practice settings. Faculty and agency preceptors assist students to develop essential evaluation and diagnostic skills and to provide individualized, culturally sensitive nursing care and clinical services to diverse client populations.

Women and Children's Health Advanced Practice Theory St Pierre, Sherri B

Fall 2021

This course focuses on theoretical knowledge for the indirect and direct roles of the advanced practice nurse in health care of women and children. Content will address use, analysis, and synthesis of theories and research with attention to the impact of culture, ethnicity, race, socioeconomic status, and family structures. Psychosocial influences on women's health, parenting, and child development are explored. Students will interpret the roles of the advanced practice nurse in MCH as these affect and are affected by health care and health care delivery systems at the national level.

NURS745701

Pediatric Primary Care/Advanced Practice Nursing I St Pierre, Sherri B;White, Laura S

Fall 2021

This clinical course is the first of two advanced practice specialty nursing courses for preparing pediatric nurse practitioners. This course focuses on health promotion and maintenance and prevention of illness and disability, as well as assessment, diagnosis, and management of common pediatric problems/illnesses. Anatomical, physiological, psychological, cognitive, socioeconomic, and cultural factors affecting a child's growth and development are analyzed. Parenting practices, family life styles, ethical issues, and environmental milieu are also explored. Students engage in precepted clinical practice (20 hours/week) where they apply their cognitive, affective, and psychomotor skills and are guided by critical thinking and clinical decision making.

Primary Care of Adults and Older Adults Theory I Howard, Elizabeth P

Fall 2021

First AG health course focusing on primary care of adult and older adults, exploring advanced practice in context of nursing knowledge and concepts from other disciplines. Includes integration of concepts in health promotion, prevention, identification of risk factors that potentially threaten health of adults. Variables include health status, age, development, gender, ethnicity, socio-economics and cultural characteristics associated with health behaviors across group settings are studied as they impact health and related behaviors. Emphasis on related concepts. Discussions integrate role of APN as leader in health care reform and articulation of nursing contributions to interdisciplinary adult and older health care outcomes.

NURS746301

Primary Care Adult and Older Adult/Advanced Practice Nursing I LaPierre, Kellie L

Fall 2021

This first course in the adult-gerontology health practicum series concentrates on the application of the clinical reasoning process used to assess, diagnose, and treat common primary care and chronic illness problems of the adult population throughout the lifespan. Emphasis is placed on the integration of epidemiologic, genetic, environmental, social-political, and cultural determinants that contribute to alterations in the health status of young, middle, and older adults. Health promotion, evidence-based practice, and holistic health strategies are integrated to promote the optimal level of being and functioning of adults across the life span.

Credits: 6

Primary Care of Families/Advanced Practice Nursing I Marshall, Alison O

Fall 2021

This combined didactic and practicum course focuses on the assessment, diagnosis, and management of selected primary health care problems in individuals and families using critical thinking and diagnostic reasoning. Incorporation of health promotion, health maintenance, and delivery of care strategies as they relate to individuals and families are emphasized. Students practice 20 hours per week in a variety of clinical settings including health departments, health centers, homeless clinics, health maintenance organizations, private practices, and occupational health clinics.

**NURS759001**  
**Physiologic Variables for Nurse Anesthesia III Emery, Susan A**  
**Fall 2021**  
This course builds upon the clinical physiology of the neurological, endocrine, and renal systems. The focus of discussion will be on the anatomy and physiology of the nervous system, including nerve action potential, neuromuscular transmission, the autonomic nervous system, neurotransmitters, and cerebral blood flow. Also, normal physiology of the endocrine and renal system will be studied, including the more commonly seen alterations in these systems. Emphasis will be placed on the anesthetic implications of caring for patients with high risk conditions.

**Nurse Anesthesia I Thomas, Allan C Fall 2021**  
This course provides the opportunity for students to integrate theory into practice within the clinical setting. The focus is on the development of diagnostic, therapeutic, and ethical judgments for the patient undergoing surgery and anesthesia. During the first semester of clinical anesthesia practice the emphasis is on the development and implementation of a patient specific plan of anesthesia care for healthy patients undergoing minimally invasive surgical procedures. Synthesis of theoretical knowledge with clinical practice is enhanced by weekly seminars, case presentations, care plan exemplars, and high fidelity simulation.  
Credits: 5

**Healthcare Information Technology Stettheimer, Timothy D**  
**Fall 2021**  
This course explores the critical role of e-health and information systems in the planning, operation, & management of healthcare organizations. Students will learn how to assess and evaluate health information systems and business requirements in a variety of settings such as health systems, hospitals and medical practices. Students will develop skills in healthcare technology implementation design that addresses such industry-specific requirements as translating HIPAA and other regulations into specific technology decisions while implementing medical systems (EMR, lab, clinical services, medical database providers, etc.). Students will also learn how to manage multi-institutional relationships as they are expressed in technology implementations, including the many vendor configurations but also cross-provider organization relationships. Specific topics include data & systems integrations, communications protocols, security standards, procurement, and authentication and authorization.

NURS871401  
Nursing Ethics and Professional Responsibility in Advanced Practice Uveges, Melissa K  
Fall 2021  
The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

Nursing Leadership in Complex Health Care Settings Reid Ponte, Patricia A  
Fall 2021  
This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

Secondary Analysis of Health-Related Datasets Qiu, Mei R  
Fall 2021  
In this course, students apply concepts from earlier methods and statistics courses to the secondary analysis of large datasets to answer health-related research questions of interest. Students may choose to work with one of the datasets available for use in the course or, with permission, work with a faculty member on one of his/her datasets. Students are expected to: a) delineate a research question; b) select an appropriate dataset and analytic approach to answer the question; c) execute the analysis; d) discuss the strengths and limitations of the approach and the results; and e) disseminate findings through publications or presentations.

Epidemiology  
Edmonds, Joyce K;Nguyen, Tam H Fall 2021  
Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

Philosophical Inquiry for Knowledge Development in Nursing Flanagan, Jane M  
Fall 2021  
Movements in the history and philosophy of science are reviewed for appreciating nursing's epistemological development. Contemporary understandings of philosophy and philosophy of science and their influences on knowledge development and nursing are examined. A focus is on understanding the relationship of the epistemological foundations of nursing to those of

the health and social sciences. The course aims to develop scholars who can critically evaluate scientific initiatives and their relevance for nursing practice and emerging societal needs. Emphasis is on integrating knowledge of movements in philosophy of science and nursing epistemology with themes developed in Strategies for Knowledge Development in Nursing.

Bridge to Primary Care Advanced Practice Nursing Kelly-Weeder, Susan A;Underwood, Patricia  
Fall 2021  
This is the first in a series of clinical reasoning and decision-making courses required for all primary care DNP students. Building on the skills acquired in Advanced Health/Physical Assessment across the Lifespan, the course will focus on communication and clinical decision-making for DNP students. Specific consideration will be given to wellness and health promotion across the lifespan, screening procedures, ordering and interpretation of diagnostic tests, health behavior change interventions, as well as problems frequently encountered in primary care. The combination of didactic, clinical, and simulated learning experiences will prepare the student for subsequent specialty clinical course work and experiences.

Advanced Practice Nursing Role Conahan, Catherine  
Fall 2021

This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social and professional issues relevant to advanced practice nursing.

NURS981601  
Population Health Principles, Program Planning, and Evaluation Ryan, Kathleen M  
Fall 2021  
The course focuses on care at the aggregate level and examines the multiple determinants of health. The principles of population health and population health management will be explored. Health promotion theories will be analyzed and evaluated. Building on these theories and epidemiologic principles, students will assess and identify health care needs at the population level. Students will design theory-driven, evidence-based interventions to improve population outcomes. Program planning and evaluation in partnership with community stakeholders will be emphasized.

Adult-Gerontology Primary Care Advanced Practice Nursing II LaPierre, Kellie L  
Fall 2021  
The second of three in the Adult-Gerontology Primary Care Advanced Practice Nursing series, this course focuses on the management of chronic conditions across the adult-gerontology age spectrum. Critical analysis of data, integration of theory, and evidence-based, cost-effective, high quality, and safe approaches to care coordination are emphasized. The broader health care system, interprofessional collaboration, influences of culture, and social determinants of health are considered. The leadership role of the Adult-Gerontology Primary Care Advanced Practice Nurse in identifying and addressing barriers to optimal care is integrated throughout the course.

NURS983401  
Developmental-Behavioral and Mental Health in Pediatrics White, Laura S  
Fall 2021  
This course features a case-based approach that emphasizes early problem identification, advanced evaluation, intervention, and collaborative care for children through young adults with developmental-behavioral or mental health (DBMH) concerns. A biopsychosocial, developmental, interdisciplinary approach is used as the foundation for explicating family-based psychotherapeutic interventions and indications for referral of patients with complex DBMH concerns. Students will build skills to identify and evaluate a variety of multidisciplinary resources to enhance quality DBMH services and promote optimal socioemotional development and functioning. Sociocultural influences are critically analyzed and considered as a basis for advocacy and policy development.

NURS983701  
Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan I Marchetti, Carol A;Petreca, Victor G  
Fall 2021

The first of three in the Psychiatric-Mental Health Advanced Practice Nursing series, this course focuses on promoting optimal mental health treatment for populations in diverse settings through practice, leadership, and advocacy that is evidence-based, reflective, and ethical. Students examine neurobiological, psychosocial, developmental, and nursing frameworks to conduct mental health evaluations and risk assessments; formulate diagnoses; and implement evidence-based, patient-centered care across the lifespan. Societal influences on mental health, such as race, ethnicity, gender, poverty and violence are explored; and factors related to mental health promotion and treatment are identified.

NURS983801  
Individual Psychotherapy for Advanced Practice Nursing Marchetti, Carol A  
Fall 2021

This course examines major approaches to individual psychotherapy, including psychodynamic, humanistic, interpersonal, behavioral, cognitive, dialectical behavioral, brief, and multicultural perspectives. Commonalities and differences among the processes and techniques are explored. Selected theorists and their approaches to psychotherapy will be evaluated as examples of major schools of thought concerning the nature of the psychotherapeutic relationship. Applications among diverse individuals and populations across the lifespan are critically examined.

NURS984101  
Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan III Petreca, Victor G  
Fall 2021

The final of three in the Psychiatric-Mental Health (PMH) Advanced Practice Nursing (APN) series, this course focuses on management of high-risk individuals with complex PMH problems. Special attention is given to the sources and impact of complex PMH problems on individuals, families, communities, and populations, including diverse and disadvantaged groups.

Theoretical, evidence-based, cost-effective, high quality clinical approaches, including use of information technology, are integrated into the management of complex PMH problems. During a 375-hour, supervised clinical practicum, students prepare for increasingly autonomous practice to assume APN and leadership roles, in consultation with clinical site preceptors and faculty.

NURS984201  
Psychobiology of Mental Health and Illness Marchetti, Carol A  
Fall 2021

This course focuses on the biological and psychological correlates of major psychiatric disorders across the lifespan, as referenced in the Diagnostic and Statistical Manual of Mental Disorders-5 (DSM-5). The central, autonomic, and peripheral nervous systems are examined from cellular, neurotransmitter, circuit, and system perspectives. Behaviors and disorders are understood in light of genetic, anatomical, physiological, neurochemical, and neuroendocrine influences.

Scientific, neurobiological, biopsychosocial, and nursing theories about psychological symptom formation and resolution and strategies to recognize and distinguish the presence of physical and mental illness are evaluated.

NURS986201  
Foundations of Nurse Anesthesia Practice Thomas, Allan C  
Fall 2021

This course introduces the student to fundamental knowledge crucial to nurse anesthesia practice. Discussion of patient safety begins in this course, along with legal aspects of nurse anesthesia practice. Key concepts related to patient assessment and fluid management are considered, as are equipment and technology basic to nurse anesthesia practice. Strategies for airway assessment and management and specific anesthesia techniques are reviewed. The importance of provider wellness is emphasized.

NURS986801  
Cardiovascular Physiology and Pathophysiology for Nurse Anesthesia Practice DEPT  
Fall 2021

This course builds on basic concepts of the anatomy, physiology, and pathophysiology of the cardiovascular system. A detailed examination of the anatomy and physiology of the heart and circulatory system forms the basis for discussion of common and uncommon diseases of the cardiovascular system. Key components of the history and physical exam together with diagnostic testing inform pre-anesthesia assessment. Anesthetic implications for the patient with cardiovascular system co-morbidities form the basis for the development of an individualized plan of anesthesia care, including the need for specific monitoring modalities.

## Nursing Courses: Spring 2022

NURS121001

Public Health in a Global Society  
Camp, Lindsey N;Ryan, Kathleen M;Sabbath, Erika L Spring 2022  
This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.  
Credits: 3  
Room and Schedule: Integrated Science Building 107 TuTh 01:30PM-02:45PM Satisfies Core Requirement: Social Science

NURS207001

Introduction to Professional Nursing Connolly, Maureen A  
Spring 2022  
This course provides an introduction to professional nursing, exploring nursing's history and the development of nursing knowledge grounded in theory and evidenced-based practice. The course places the study of socially just nursing practice within the tradition of liberal arts education. Engaging in critical self-reflection, students apply new value-based self-awareness to culturally congruent nursing care. Ethical reasoning processes are applied, utilizing clinical and population-based case studies. Therapeutic communication with individuals across the lifespan is introduced. Nursing education, practice, and professional careers as well as the influence of current health care environmental factors on health and evidenced-based nursing practice are discussed.

NURS209001

Sophomore Formation Seminar  
Gonzalez-McLean, Julianna A;Simonelli, Mary C Spring 2022  
The SCRUBS weekend retreat fulfills the NURS2090 requirement. Attendance at the full retreat is mandatory and an expectation of all sophomore students. Any absences should be discussed as soon as possible with the Teacher of Record (the Associate Dean), who will make decisions regarding activities that will be required to earn credit. This course is required for sophomore undergraduate nursing students and will involve guided review and reflection to reinforce the inherent professional values of altruism, human dignity, integrity, and social justice fundamental to the discipline of nursing. Activities in the weekend long retreat will be guided by the Ignatian formation principles and student's values and beliefs as they relate to professional practice, development as individuals and as members of caregiving teams. The goal is to build a foundation for professional leadership as nursing students become aspiring members of the nursing profession and productive and committed citizens of society at large.

Adult Health Nursing Theory I  
Barone, Stacey H;Bond, Stewart;Repsha, Christine L Spring 2022  
This course focuses on the theoretical basis of the nursing care of adults across the life span with altered states of health. Emphasis is placed on beginning application of the clinical reasoning process with a focus on frequently occurring nursing diagnoses, interventions, and outcomes for adults, in particular older adults. Evidence-based practice and standards of care are integrated throughout the course. The role and responsibilities of the nurse in the acute care setting including those related to quality, safety, ethics, and legal issues are emphasized. Cultural awareness is incorporated throughout the course.

Principles of Evidence-Based Nursing Park, Jinhee  
Spring 2022

This course seeks to develop an applied understanding of evidence-based practice as it relates to the science of nursing. Through exploring components of the research process, an appreciation of the various types of evidence used by nurses and an understanding of the importance of evidenced-based research to improve clinical practice will be fostered. The ethical considerations related to evidence-based practice will be discussed. At the conclusion of the course, students are prepared to be to be critical consumers of research used in evidence-based practice.

Adult Health Nursing Theory II Barone, Stacey H;Repsha, Christine L Spring 2022

This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

NURS324401  
Childbearing Nursing Theory Capotosto, Melissa K  
Spring 2022

The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

Clinical Laboratory of Childbearing Theory Capotosto, Melissa K  
Spring 2022

Application of childbearing theory to the diagnoses, interventions, and outcomes for the care of families in structured clinical settings. Focus is on prenatal, perinatal, and post-natal activities.

Students work collaboratively with the multidisciplinary team in applying evidenced-based practice derived from current multidisciplinary research to the childbearing family. Supervised by nursing faculty, the students are mentored to extend their skills in critical thinking and clinical judgment to meet the physical, psychosocial, cultural, and spiritual needs of their clients and families. Emphasis will be placed on QSEN, AACN Essentials for baccalaureate education, AWHONN and ACOG standards of care.

NURS425201  
Psychiatric Mental Health Nursing Theory Dunne, Julie P  
Spring 2022

This course builds upon the standards of practice from APNA-ISPAN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment

modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

Psychiatric Mental Health Nursing Clinical Laboratory Dunne, Julie P  
Spring 2022

Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidenced-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age, and gender) who are in treatment for mental illness.

NURS426001  
Population Health Nursing Theory Camp, Lindsey N; Ryan, Kathleen M Spring 2022  
This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

Actualizing the Role of Professional Nurse  
Cullinan, Donna L;Hurley, Dorean L;Simonelli, Mary C Spring 2022  
Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

NURS742601  
Advanced Psychopharmacology Across The Life Span Petreca, Victor G  
Spring 2022  
This course builds upon the standards of practice from APNA-ISPN, AACN, NONPF, and APA. The legal, ethical, and therapeutic role of the advanced practice nurse in prescribing psychotropic medications for individuals with psychiatric disorders is examined across the lifespan. The evidence based prescription of psychopharmacological agents according to practice guidelines will be a focus in each class. The course will review neurobiology, the action of central nervous system medications, and the implications for ethno-psychopharmacology. Standardized tools to evaluate treatment efficacy and diagnostic criteria will be identified. Collaborative practice models, indications for referral, and monitoring to enhance treatment adherence are reviewed.

Research Methods for Advanced Practice Nursing  
Difazio, Rachel L Spring 2022  
Open to upper-division R.N. and B.S. nursing students, and non-matriculated nursing students.. The focus of this course is the formal process of acquiring and evaluating evidence that supports nursing practice. Quantitative and qualitative methods of inquiry are examined. Quality considerations of various research designs are explored. Levels of evidence are identified in relation to existing research outcomes. Evaluation of existing research outcomes as evidence to support clinical practice, demonstrate quality improvement (QI), and advance nursing knowledge is a major emphasis of the course.

NURS753701  
Advanced Practice Psychiatric Nursing Across Life Span II Petreca, Victor G  
Spring 2022  
In this second Family PMHNP course, students build on the theoretical frameworks of NURS7437 to continue to examine major DSM-5 diagnoses that occur in childhood, adolescence, and throughout adulthood. Students apply models of individual, family and group psychotherapy from NURS7438 Advanced Practice Theories of Psychotherapy and NURS7538 Advanced Theories of Family and Group Psychotherapies, and pharmacologic approaches from NURS7420 Advanced Pharmacology and NURS7426 Advanced Psychopharmacology. Crisis management, prevention/health promotion, continuous quality improvement, and allocation of services including case management, collaboration, consultation, and referral are analyzed. In the clinical practicum (minimum 250 hours) students synthesize their diagnostic and clinical reasoning abilities and advance their treatment skills as members of the multidisciplinary team.

Current Issues in Sexual Health Care DEPT

Spring 2022

Sexual health is a critical component of well-being across the lifespan. Current research reveals that gender and sexual health identity and orientation are key factors in understanding patterns of sexual health behaviors and risks, and experiences of health, wellness, and illness. This course examines current and emerging issues affecting sexual health and strategies to inform clinical practice, including: the nurse-patient relationship and its influence on sexual well-being; health disparities linked to societal stigmas, prejudices, and discrimination; and ways to improve access to quality health care for populations disproportionately at risk for or affected by STIs including HIV/AIDS.

Women's Health Advanced Practice Nursing II Murphy-Swenson, Erin E

Spring 2022

This course builds on Women and Children's Health Advanced Practice Theory and Women's Health Advanced Practice Nursing I. It concentrates on the role of the nurse in advanced practice with women across the lifespan, focusing on the development and evaluation of management strategies to promote optimal functioning in women seeking obstetrical and gynecological care as well as the indirect role functions in advanced practice as Clinical Nurse Specialists/Nurse Practitioners. Theories and research from nursing and other disciplines are applied and integrated through seminars, clinical conferences, clinical experiences (20 hours/week), and course assignments.

Advanced Clinical Decision-making in Pediatric Primary Care Repsha, Christine L;White, Laura S

Spring 2022

The purpose of this course is to provide an in-depth focus and understanding of the complexities of contemporary pediatrics and the process of diagnostic reasoning directly related to clinical experience. Emphasis is placed on the new morbidities of pediatrics, current research in child development, and the current policies and expectations of primary care pediatrics. This course will provide content specific to pediatrics, teen, and young adult health and development.

Credits: 3

Room and Schedule: None Satisfies Core Requirement: None

Prerequisites: NURS7430; NURS7420; NURS7672; NURS7447

Comments: None Status: Offered

#### NURS755701

Pediatric Primary Care/Advanced Practice Nursing II Mansfield, Kathleen J;St Pierre, Sherri B;White, Laura S Spring 2022

This course builds on NURS 7457. The focus is on management of children with more complex or chronic health problems. Theories and research from nursing and other disciplines are synthesized, with special consideration of the influences of culture and SES on wellness and health care. Students continue in precepted clinical practice (20 hours/week) to develop advanced skills in differential diagnosis and gain increased comfort in managing psychosocial problems. In consultation with preceptors, students make referrals, develop treatment and teaching plans with clients, document accurately, and further develop confidence and competence in the role of pediatric nurse practitioner.

Credits: 6

Room and Schedule: None Satisfies Core Requirement: None

Prerequisites: NURS7672 and NURS7420 and NURS7457 and NURS7450 and NURS7430

#### NURS756201

Primary Care of Adults and Older Adults Theory II DEPT

Spring 2022

The second course focused on primary care of adult/older adult. Analysis/synthesis of nursing and knowledge to guide evidenced-based interventions/outcomes. Intervention strategies, complementary healing modalities, actions responsive to changing health-care delivery systems are explored in relation to outcome indicators that distinguish the APN role addressing commonly occurring nursing problems. Innovative practice models designed to highlight APN leadership and practice. Evaluation of current knowledge to address nurse sensitive indicators is also explored. Interdisciplinary collaborations discussed, especially relating to development of APN led care models promoting health and life transitions of adults/older adults. Measures used to evaluate effectiveness of the APN outcomes are identified.

#### NURS756301

Primary Care Adult and Older Adult/Advanced Practice Nursing II LaPierre, Kellie L

Spring 2022

This second course in the adult-gerontology health practicum series builds upon the knowledge gained in NURS7463. The course continues to apply the clinical reasoning process used to assess, diagnose, and treat common primary care problems and chronic illnesses of the adult-gerontology population considering lifespan, frailty, and socio-cultural influences. Through critically appraising current strategies used to promote the optimal level of being and functioning of adults and older adults, students will be encouraged to develop plans that address gaps in care.

Credits: 6

Room and Schedule: None Satisfies Core Requirement: None

#### NURS757301

Advanced Practice in Community and Family Health Nursing II Marshall, Alison O

Spring 2022

This combined didactic and practicum course continues to integrate the assessment, diagnosis, and management of selected primary health care problems for individuals and families. Building on NURS7473 course content, this course emphasizes management of complex health problems. Students practice 20 hours per week to integrate theory, practice, and research as Family Nurse Practitioners.

Credits: 6

Room and Schedule: None Satisfies Core Requirement: None

Prerequisites: NURS7430 and NURS7420 and NURS7672 Corequisites: None

Cross-listed with: None Frequency: Every Spring Student Level: Graduate Comments: None

#### NURS759201

Advanced Principles for Nurse Anesthesia Practice Emery, Susan A

Spring 2022

This course focuses on selected problems associated with the provision of anesthesia for specialty and emergency surgeries. It explores anesthesia considerations related to the diverse needs of persons across the life span. Special attention is given to the anesthesia needs of the maternity, pediatric, and the aging patient. Content also addresses the specialty areas of acute and chronic pain management and outpatient surgery. Attention is given to patient comfort and safety issues implicit in surgical interventions and anesthesia delivery.

Credits: 3

Room and Schedule: Integrated Science Building 205 M 01:00PM-03:50PM Satisfies Core Requirement: None

#### NURS759301

Nurse Anesthesia II Thomas, Allan C Spring 2022

This course provides the opportunity for students to integrate theory into clinical practice for patients with significant comorbidities undergoing more complex procedures. Anesthetic requirements as dictated by patient assessment, including the surgical procedure are studied in greater depth. Seminar and simulation experiences are sequenced to complement the theoretical content presented in NURS7592, Advanced Principles of Nurse Anesthesia Practice.

Credits: 5

Room and Schedule: Carney Hall 303 M 10:00AM-12:00 Noon Satisfies Core Requirement: None

#### NURS769301

Nurse Anesthesia V Vitale, Caitlin M Spring 2022

This course provides the opportunity for students to complete the competencies required to sit for the National Certification Examination. Critical thinking in complex situations is emphasized as students take more responsibility for anesthetic management. Students continue with both group and independent study one day per week at the college.

Credits: 5

Room and Schedule: Campion Hall 204 M 09:00AM-11:50AM Satisfies Core Requirement: None

Prerequisites: NURS7691 Corequisites: None Cross-listed with: None Frequency: Every Spring Student Level: Graduate Comments: None Status: Offered

#### NURS800701

Direct Entry Child Health Nursing Theory Haze, Nanci J

Spring 2022

This course focuses on the nursing care of children with acute and chronic conditions and their families. The primary focus is on child growth and development in relation to wellness and illness. Relevant theories from nursing and other disciplines, research, and evidenced-based guidelines related to the care of children and families are examined. Person/family-centered approaches to promote, restore, and maintain health are emphasized. Biopsychosocial, cultural, legal, and ethical factors influencing the health and care of children and families are explored.

Credits: 3

Room and Schedule: 245 Beacon Street Room 230 M 10:00AM-12:50PM Satisfies Core Requirement: None  
Prerequisites: NURS8006 and NURS8004 and NURS8005 and NURS8002 and NURS8001 and NURS8003

#### NURS800801

Direct Entry Child Health Nursing Clinical Haze, Nanci J  
Spring 2022

This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for children and families. A primary focus is promoting wellness and family-centered care for children with acute illness and chronic conditions. Through interprofessional collaboration, students implement evidence-based practice to provide high quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision-making to meet the biopsychosocial and cultural needs of children and families from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care for children and families.

#### NURS801001

Direct Entry Childbearing Nursing Clinical Capotosto, Melissa K  
Spring 2022

This clinical course focuses on the application of knowledge and implementation of professional nursing practice in the care of childbearing women and families. The primary focus is on prenatal, perinatal, and postnatal periods. Through interprofessional collaboration, students implement evidence-based practice to provide high quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision-making to meet the biopsychosocial and cultural needs of childbearing women and families from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care for childbearing women and families.

#### NURS871401

Nursing Ethics and Professional Responsibility in Advanced Practice Grace, Pamela J  
Spring 2022

The course prepares advanced practice nurses for ethics leadership within the broader healthcare arena. Links are made among philosophical/theoretical foundations of nursing, ethical theory, and nursing goals. Skills supportive of the ethical decision making of nurses, peers, and the team are developed with in-class opportunities to practice leading ethics rounds and developing ethics education projects. An emphasis is placed on facilitating the interests of current and future patients and society as a professional obligation. Socially derived injustices and professional responsibility to advocate for just healthcare is highlighted along with strategies to influence institutional and health policy on behalf of individual and social good.

Credits: 3

Nursing Leadership in Complex Health Care Settings Sly, Jacqueline R  
Spring 2022

This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based

approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

#### NURS871601

Health Care Policy for Nursing Leaders O'Reilly-Jacob, Monica K  
Spring 2022

This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

#### NURS971601

Healthcare Policy and Social Justice O'Reilly-Jacob, Monica K  
Spring 2022

This course prepares scholars to influence healthcare and related policies in support of social justice. Theories of social justice and other scholarly perspectives are used to explore the interrelationships among health policy and the social, political, and economic determinants of health. Strategies for developing, initiating, analyzing, and evaluating health policies are proposed using students' areas of focus as a basis. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address health policy at the regional, national, and global levels.

NURS971701  
Methods of Advanced Scholarly Inquiry  
Jurgens, Corrine Y;Pados, Britt F;Reid Ponte, Patricia A Spring 2022  
This is the second of four courses to prepare DNP students to conduct an organization  
approved, scholarly inquiry project to improve health services and patient outcomes. Students  
critically evaluate the literature and related information to address a health care problem.  
Scholarly inquiry approaches are presented to enable students to identify a problem, plan  
change to improve a process or outcome, or develop innovative solutions related to health  
care delivery. Upon course completion, there will be a faculty and organization approved DNP  
project charter, which includes the problem, processes, and expected outcomes.

Epidemiology Edmonds, Joyce K Spring 2022  
Epidemiology is the study of the distribution and determinants of health-related states or  
events (including disease), and its methods are used in the control of diseases and other  
health problems in diverse populations. This course introduces basic principles and methods of  
epidemiology and biostatistics. Measures of disease frequency, association and causation, the  
design and analysis of studies, and the potential issues that may arise in these studies are  
addressed. This course prepares advanced practice nurses to engage in inter-professional  
collaboration with the ultimate goal of improving population health.

NURS973001  
Advanced Physiology and Pathophysiology across the Lifespan Delva, Sabianca;Dwyer, Andrew  
A  
Spring 2022  
This course focuses on physiologic and pathophysiologic processes that affect individuals  
across the lifespan. The emphasis is on central concepts of physiology and pathophysiology,  
including genetic and epigenetic mechanisms, immunity, inflammation, cell growth regulation,  
hematopoiesis, and hemostasis. These concepts are then applied in a systematic survey of  
diseases within body systems. Current research, clinical examples, and application to advanced  
nursing practice are incorporated throughout the course.

Pharmacotherapeutics in Advanced Practice Nursing Duprey, Matthew S;Tabloski, Patricia  
Spring 2022  
This course will provide the advanced practice nursing student with the fundamental  
pharmacologic principles necessary to support pharmacotherapeutic decision making in  
collaboration with patients across the lifespan. The interrelationship of physical, psychosocial,  
cultural, pharmacogenomic, economic, ethical, and legal factors will be explored. The student  
will develop evidence-based, cost effective interventions to promote optimal person-centered  
drug therapy. Application of these principles to various real world clinical situations and  
individual responses will be emphasized.

NURS973201  
Advanced Health/Physical Assessment across the Lifespan Connolly, Maureen A;Repsha,  
Christine L;White, Laura S Spring 2022  
This course uses a holistic approach and risk appraisal frameworks as a basis for health  
assessment across the lifespan. Building on knowledge of basic health assessment, the APRN  
student performs comprehensive health histories and physical and mental health  
examinations. Students will incorporate subjective and objective data to evaluate healthy  
individuals and those with acute and/or chronic disease. The course utilizes learning  
laboratory experiences, high-low fidelity simulation, and standardized patients to facilitate  
students' learning. Health promotion, health maintenance and harm reduction concepts are  
emphasized and applied, taking into consideration life circumstances and cultural, ethnic, and  
developmental variations.

Applied Health Statistics: Generalized Linear Modeling Lee, Christopher S  
Spring 2022  
This course focuses on conceptual understanding and application of generalized linear  
modeling to health-related research questions and real-world health data. Students will  
develop skills in the performance and interpretation of techniques such as multivariate linear,  
logistic, gamma and negative binomial regression. This course also will cover common  
functions within generalized linear modeling such as tests of interaction, moderator and  
mediator, as well as multilevel modeling, handling of complex sampling designs and common  
approaches to model selection. Applying health statistics as part of a logical argument is  
emphasized in this course as opposed to detailed knowledge of the underlying mathematics.

Advanced Practice Nursing Role Tabloski, Patricia  
Spring 2022

This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social and professional issues relevant to advanced practice nursing.

Population Health Principles, Program Planning, and Evaluation LaPierre, Kellie L  
Spring 2022

The course focuses on care at the aggregate level and examines the multiple determinants of health. The principles of population health and population health management will be explored. Health promotion theories will be analyzed and evaluated. Building on these theories and epidemiologic principles, students will assess and identify health care needs at the population level. Students will design theory-driven, evidence-based interventions to improve population outcomes. Program planning and evaluation in partnership with community stakeholders will be emphasized.

Adult-Gerontology Primary Care Advanced Practice Nursing I Connolly, Maureen A  
Spring 2022

The first of three in the Adult-Gerontology Primary Care Advanced Practice Nursing series, this course focuses on the promotion of optimal physical, mental, and social health of individuals across the adult-gerontology age spectrum through evidence-based, ethical, reflective practice, leadership, and advocacy. Students utilize patient-centered theoretical, evidence-based, cost-effective, high quality, and safe clinical approaches to the health promotion, disease prevention, and common adult and age-related primary care problems. Emphasis is on assessment, diagnosis, and management of common primary care problems. Primary health conditions are addressed within the context of biopsychosocial, developmental, cognitive, socioeconomic, and cultural factors.

Spring 2022

The final of three in the Family Primary Care Advanced Practice Nursing series, this course focuses on theoretical, evidence-based, ethical, cost-effective, high quality, and safe clinical approaches to the management of complex medical, developmental, psychological, and social issues in individuals and families across the lifespan. Attention will be placed on the care of individuals and families with complex and special health care needs. Advanced clinical decision-making and increasing autonomy in practice are emphasized. Opportunities to demonstrate initiative and leadership in designing, implementing, and evaluating health management and health promotion initiatives are integrated throughout the course.

NURS983201

Advanced Clinical Decision-Making in Pediatrics Repsha, Christine L;White, Laura S  
Spring 2022

This course builds on previous knowledge of diagnostic reasoning and clinical decision-making as it relates to an advanced understanding of human experiences and the complexities of contemporary pediatric primary care. Through faculty-facilitated simulations, seminars, and clinical cases, emphasis is on the process of clinical decision-making and on scholarly and reflective practice. Theories from nursing and other disciplines, research, and policy are synthesized and integrated into advanced pediatric practice. Principles associated with the delivery of safe and high quality care are critiqued. Ethical, legal, global, and social factors are analyzed in relation to current and developing healthcare policy.

Pediatric Primary Care Advanced Practice Nursing II St Pierre, Sherri B;White, Laura S  
Spring 2022

The second of three in the Pediatric Primary Care Advanced Practice Nursing series, this course focuses on management of chronic conditions in pediatric populations. Critical analysis of data, integration of theory, evidence-based, and cost-effective approaches to care coordination are emphasized. The broader health care system, interprofessional collaboration, and influences of neurodevelopment, culture, and social determinants of health are also considered. The leadership role of the Pediatric Advanced Practice Nurse in identifying and addressing barriers to optimal care is integrated throughout the course.

Advanced Psychopharmacology Throughout the Lifespan Petreca, Victor G  
Spring 2022  
This course examines the legal, ethical, and therapeutic role of the psychiatric-mental health nurse practitioner (PMHNP) in prescribing psychotropic medications for individuals with psychiatric disorders across the lifespan. The neurobiology, action of medications that affect the central nervous system, and implications for ethno-psychopharmacology will be explored. Standardized tools to evaluate diagnostic criteria and treatment efficacy will be analyzed. Evidence-based practice principles, collaborative practice models, indications for referral, and monitoring to enhance treatment adherence will be integrated throughout the course.

Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan II Petreca, Victor G  
Spring 2022  
The second of three in the Psychiatric-Mental Health (PMH) Advanced Practice Nursing (APN) series, this course prepares students for the PMH APN role. Knowledge of theoretical frameworks from NURS9837 is applied to assessment, diagnosis, and management of PMH problems. Students hone clinical judgment and communication skills to foster effective therapeutic alliances with patients/families, and facilitate interprofessional collaboration, consultation, and referrals. Topics in crisis management, mental illness prevention, mental health promotion, quality improvement, and case management for diverse populations are explored. A 375-hour supervised practicum provides opportunities for students to develop skills to treat people in diverse PMH clinical settings.

Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan III Marchetti, Carol A  
Spring 2022  
The final of three in the Psychiatric-Mental Health (PMH) Advanced Practice Nursing (APN) series, this course focuses on management of high-risk individuals with complex PMH problems. Special attention is given to the sources and impact of complex PMH problems on individuals, families, communities, and populations, including diverse and disadvantaged groups. Theoretical, evidence-based, cost-effective, high quality clinical approaches, including use of information technology, are integrated into the management of complex PMH problems. During a 375-hour, supervised clinical practicum, students prepare for increasingly autonomous practice to assume APN and leadership roles, in consultation with clinical site preceptors and faculty.

Current Issues in Sexual Health Care Across the Life Span Tappin, Ryan J  
Spring 2022  
Sexual health is a critical component of well-being across the lifespan. Current research reveals that gender and sexual health identity and orientation are key factors in understanding patterns of sexual health behaviors and risks, and experiences of health, wellness, and illness. This course examines current and emerging issues affecting sexual health and strategies to inform clinical practice, including: the nurse-patient relationship and its influence on sexual well-being; health disparities linked to societal stigmas, prejudices, and discrimination; and ways to improve access to quality health care for populations disproportionately at risk for or affected by STIs including HIV/AIDS.

Cardiovascular Physiology and Pathophysiology for Nurse Anesthesia Practice Emery, Susan A  
Spring 2022  
This course builds on basic concepts of the anatomy, physiology, and pathophysiology of the cardiovascular system. A detailed examination of the anatomy and physiology of the heart and circulatory system forms the basis for discussion of common and uncommon diseases of the cardiovascular system. Key components of the history and physical exam together with diagnostic testing inform pre-anesthesia assessment. Anesthetic implications for the patient with cardiovascular system co-morbidities form the basis for the development of an individualized plan of anesthesia care, including the need for specific monitoring modalities.

## Forensics Courses: Fall 2021

FOR5531501

Victimology

Burgess, Ann W;Wood, Jeffrey E Fall 2021

This course examines the wide range of victimization experiences from the perspective of the victim, their families, and society. Crimes to be studied include robbery, burglary, carjacking, assault and battery, rape, domestic violence, stalking, homicide, arson, child sexual abuse and exploitation, child pornography crimes, federal crimes, identity theft, terrorism, and internet crimes. Emphasis will be given to exploring the etiology of trauma, motivational issues of offending, response patterns to victimization, secondary trauma effects of victimization, and community and media response. Class format will utilize cases from the forensic practice of the lecturers.

FOR5531801

Forensic Science I

Burgess, Ann W;Wood, Jeffrey E Fall 2021

Forensic science concepts and principles play a critical role in analyzing crime scene evidence.

This course draws on scientific principles and examines cases where there has been a death, including suicide, accidental, and criminal; and cases where there is a survivor, in which there is a legal and/or ethical component. Specifically, the course applies a case method format to forensic science issues including forensic pathology, clinical forensics, crime victims, computer crime, and equivocal death.

Examining Diversity in Nursing and Health Care Magny-Normilus, Cherlie  
Fall 2021

This course is designed to help students develop foundational insights regarding diversity as an all-inclusive concept with complex intersections. It will focus on the professional nurse as a multifaceted cultural being with a network of identities and group affiliations that serve as both resources and barriers in the development of effective and meaningful patient/family-provider interactions. The primary goals of this course involve identifying sources of difference, deconstructing sociopolitical hierarchies, and recognizing the strengths and challenges inherent in diverse societies. The course will emphasize inclusive leadership strategies for transforming care delivery systems across multiple health care contexts.

HLTH770401

Interdisciplinary Leadership in Palliative Care Bond, Stewart  
Spring 2022

This course emphasizes the role of interdisciplinary palliative care leaders in promoting teamwork and collaboration in coordinating care for individuals and families throughout serious illness, death, and dying. The impact of serious illness, death, and dying on the individual, family, community, and healthcare system are analyzed to inform and promote quality palliative care.

Resource availability and barriers to care across different settings are examined.

Interdisciplinary leadership is explicated with an emphasis on communication, advocacy, ethics, policy development, quality, and safety. Standards of practice, policies, protocols, evidence-based practice and research are applied and evaluated to catalyze palliative care growth and development.

Examining Diversity in Nursing and Health Care Abuelezam, Nadia  
Spring 2022

This course is designed to help students develop foundational insights regarding diversity as an all-inclusive concept with complex intersections. It will focus on the professional nurse as a multifaceted cultural being with a network of identities and group affiliations that serve as both resources and barriers in the development of effective and meaningful patient/family-provider interactions. The primary goals of this course involve identifying sources of difference, deconstructing sociopolitical hierarchies, and recognizing the strengths and challenges inherent in diverse societies. The course will emphasize inclusive leadership strategies for transforming care delivery systems across multiple health care contexts.

# Lynch School of Education and Human Development Counseling, Developmental, and Educational Psychology

## Counseling, Developmental, and Educational Psychology Courses: Summer 2021

APSY215201

Applied Psychology Practicum: Pathways to Purposeful Work and Life Hwang, Dabin  
Summer 2021

Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission from the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office, meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form HERE (scroll down to the Getting Started section).

Family, School, and Society Lewin-Bizan, Selva  
Fall 2021  
Second part of a two-course sequence (APSY1030-APSY1031) that introduces students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes special role of education in linking community resources for an integrated approach to serving children and families.

APSY203201  
Psychology of Learning Miele, David B  
Fall 2021

Discusses classic and contemporary theories of learning and of cognitive development and theories of the relation between learning and cognitive development. Also looks at major studies with children. Compares and contrasts theories along key dimensions on which they vary. Addresses issues and questions that include the following: Is the environment or our biological endowment and innate knowledge responsible for our learning; are babies born with a lot of knowledge or must all cognition develop from scratch; does development precede learning (readiness to learn). Also looks at role of motivational factors, and discusses practical applications of theory and research.

Applied Psychology Practicum: Pathways to Purposeful Work and Life Milot Travers, Alyssa S  
Fall 2021

Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission from the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office , meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of

determining a practicum placement by completing the Practicum Placement form [HERE](#) (scroll down to the Getting Started section).

Social Oppression and Transformation Mc Intyre, Alice E

Fall 2021

Replacing APSY6348 Culture, Community, and Change Restricted to APSY majors or minors .

This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations-- social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

Contemporary Issues in Applied Psychology and Human Development Lykes, M B

Fall 2021

This advanced undergraduate seminar draws from the works of critical, liberation and decolonial psychologists (e.g., Ignacio Martin-Baro, Shose Kessi, Derek Hook, Erica Burman, Joseph Gone) to analyze the conceptions of the child and childhood underlying EuroAmerican developmental psychology. We will explore how normative developmental psychological theories and research position many children and youth (e.g., unauthorized migrants, Indigenous youth, youth in the diaspora, and the impoverished) as different, transgressive, or pathological. Drawing on the narratives and oral histories from minoritized children and youth in the U.S. and in the majority world/global South, we will analyze their stories of the causes of their marginalization as well as their liberatory praxis from the periphery to decolonize discourse, policies and practices grounded in dominant developmental norms of the child and childhood towards a more liberatory applied psychology and human development.

Health Psychology  
Health psychology is the study of how psychology and health interact and influence: health promotion and health risk behaviors, the treatment individuals receive for medical problems, how people cope with stress and pain, and how people behave when they are ill. This course will review these issues across the life course, with special attention to approaches which influence health promoting behaviors and the treatment of illnesses.

Psychology of Work Davila, Alekzander Fall 2021  
Work is one of the central roles in life, encompassing much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically with their communities. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, organizational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and communities, and the ways in which the psychology of work can inform meaning, purpose, and social justice.

Senior Thesis I Whitcavitch-Devoy, Julia Fall 2021  
Registration for this course requires advance approval and the submission of additional paperwork. Students, with the approval of the program coordinator and department chair, may write a thesis during the senior year. In most cases, the thesis involves empirical research, although other scholarly forms may be permitted. Students must meet with a prospective thesis advisor during the junior year to develop a thesis proposal.

Cyber Ecosystem and Cybersecurity Escalante, David J;Rey, Patrick J Fall 2021  
Course provides an overview of Cyberspace, defines the scope of Cybersecurity, and addresses information classification and system compartmentalization. Course includes an appreciation of information confidentiality, integrity, and availability, and covers Cybersecurity architecture,

strategy, services, hardware, software, and cloud services. The course also examines national security issues, critical infrastructure, and the potential for cybercrime and cyber terrorism, as well as the need for corporations to align their security with business needs and consider the threat from malicious employees, contractors, and/or vendors.

Incident Response and Management Haugli, Brian W  
Fall 2021  
Course provides an understanding of the design and development of a Cybersecurity strategy which aligns with private industry and government needs, including incident documentation/analysis, response planning, and the role of a critical event response team (CERT) in determining recovery, managing liability and communications, coordinating with law enforcement, and protecting corporate reputation. Course also examines leadership and the adoption and implementation of a proactive stance through monitoring and responding to internal and external intelligence, including monitoring network traffic, activity logs (SIEM) for data breaches, denial of service (DoS), and integrity events, and outlines the roles of information security operations centers (ISOCs) and network operations centers (NOCs).

Social Issues and Social Policy Morelli, Gilda A  
Fall 2021  
This seminar provides participants with a foundation of knowledge concerning current social policy issues involving children and families in the U.S., with a particular focus on issues related to poverty and disadvantage. Considers how research, politics, and advocacy play a role in the initiation, implementation, and evaluation of policy, and how social policies impact children and families. Seeks to help students explore scientific evidence and social perceptions, and think critically about central social issues and social policies.

Positive Youth Development Lerner, Jacqueline V  
Fall 2021

Applied Developmental Science (ADS) uses research about human development to inform programs and policies pertinent to topics of social importance. Students will integrate readings about and class discussions of ADS theory and research with information about community-based programs. The focus of this class will be a discussion and analysis of the role of developmental research and, in particular from longitudinal research (for example, the 4-H Study of Positive Youth Development), in framing applications (programs and policies) for promoting positive development among youth. In addition to an overview of the theoretical models that are the bases of the PYD perspective, the course will present the work of researchers who have conducted applied developmental studies of adolescents and their ecological settings in order to advance understanding of how individuals and context are involved across the adolescent years in providing a basis for both healthy and problematic development. Organizational Effectiveness: Governance, Risk Management, and Compliancy DEPT  
Fall 2021

Organizational Effectiveness: Governance, Risk Management, and Compliancy. Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals.

This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today's complex world. Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CISO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business.

Theories of Counseling and Personality I Mahalik, James R  
Fall 2021  
First part of a year-long sequence examining personality and counseling theories. To introduce students to major theories of personality in the field of psychology and how theories are applied in constructing counseling and psychotherapy models. Students will focus on humanistic, behavioral, and cognitive personality theories and how they become operationalized in person-centered, behavioral, and cognitive counseling models, respectively. In addition to examining the theoretical foundations, client and counselor dimensions, techniques, and the active ingredients of change for these major models of personality and counseling, students examine how socio-cultural context contributes to client presenting concerns and may be addressed in counseling. Section .01 for Mental Health Counseling students ONLY Section .02 for Mental Health Counseling students ONLY

APSY747001  
Advanced Practicum: Human Development Morelli, Gilda A  
Fall 2021  
Students meet once a week to discuss their required field work (8-10 hours per week) and to relate their field work to psychological theories, research, and applications. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class, and diversities of language, ability, sexuality, etc. Participants will explore strategies for translating this knowledge and experience into resources that enable them to identify future career options. Restricted to ADEP MA students

Participatory Action Research: Gender, Race, Power DEPT

Fall 2021

This graduate seminar introduces students to theoretical and practical issues in the design and implementation of community- and school-based participatory and action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change policies and processes. Ethnographic, narrative, oral history, and visual methodologies are additional resources for understanding and representing the individual and collective stories co-constructed through the research process. Students participate in a community-based collaborative undoing racism workshop and have opportunities for ongoing collaborative work on a site. We reflect collaboratively and contextually on multiple and complex constructions of "gender," "race," and social class in and through these research processes. OPEN TO ALL Ph.D. STUDENTS. MASTER'S LEVEL STUDENTS REQUIRE PERMISSION OF THE INSTRUCTOR.

Credits: 3

Room and Schedule: None

Cognitive-Affective Bases of Behavior Vasilyeva, Marina

Fall 2021

Ph.D. students only. All others must get instructor approval.. This course discusses theories of human development and examines empirical research on cognitive and affective processes underlying behavior. In addressing the cognitive bases of behavior, it explores key mental processes (e.g., attention, memory, problem solving) and constructs (e.g., schemas, heuristics) that have been instrumental in understanding everyday functioning. The socio-affective bases of behavior addressed in the course include emotions, temperament, and self-concept. The students in this course explore fundamental theoretical questions, such as the role of biology and environment in development, and consider practical applications of current theoretical and empirical knowledge concerning the bases of human behavior.

Seminar in Counseling Theory Trantham, Sidney M  
Fall 2021  
Doctoral students in Counseling Psychology only. Deepens students' understanding of psychological theory, and facilitates a life-long journey of integrating theory with practice. Provides knowledge and understanding of traditional and contemporary theories of psychotherapy, and helps students develop a critical perspective that will enable them to evaluate the usefulness of these theories for their clinical work with clients. Class discussions cast a critical eye on the development of the discipline, including its philosophical and contextual roots, and analyze the values inherent in mainstream psychological practice. Considers strengths and limitations of each school, and uses case examples to gain expertise in applying theory to practice.

## Counseling, Developmental, and Educational Psychology Courses: Spring 2022

APSY103001  
Child Growth and Development MacEvoy, Julie P  
Spring 2022

First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

#### APSY203201

Psychology of Learning Cannarella, Amanda M Spring 2022  
Discusses classic and contemporary theories of learning and of cognitive development and theories of the relation between learning and cognitive development. Also looks at major studies with children. Compares and contrasts theories along key dimensions on which they vary. Addresses issues and questions that include the following: Is the environment or our biological endowment and innate knowledge responsible for our learning; are babies born with a lot of knowledge or must all cognition develop from scratch; does development precede learning (readiness to learn). Also looks at role of motivational factors, and discusses practical applications of theory and research.

Credits: 3

#### APSY215201

Applied Psychology Practicum: Pathways to Purposeful Work and Life Liang, Belle Spring 2022  
Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission from the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office , meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form HERE (scroll down to the Getting Started section).

#### APSY221601

Research Methods for Applied Psychology Lewin-Bizan, Selva Spring 2022  
The course prepares professionals in the fields of human development, psychology, and education to understand and design research studies related to applied topics. Students are introduced to fundamental principles of research methodology and learn about different types of research, including quantitative, qualitative, and mixed-method studies. The emphasis is on developing skills that will enable students to comprehend common research procedures, critically evaluate existing research, develop studies to address specific research questions, and communicate the findings clearly and accurately.

APSY224301  
Social Oppression and Transformation Seider, Scott C  
Spring 2022  
Replacing APSY6348 Culture, Community, and Change Restricted to APSY majors or minors. This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations-- social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

APSY229501  
Spirituality, Religion, and College Student Experience James, Michael J  
Spring 2022  
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

Counseling Theories Di Bianca, Michael Spring 2022  
The purpose of this course is to learn about the major counseling theories including basic concepts, advantages and limitations, techniques, and the counseling process. There is also a focus on personal exploration aimed at helping students adopt their own personal theory of counseling. Issues of multiculturalism and client diversity will be integrated into all course content.

APSY324801  
Psychology of Gender Mahalik, James R Spring 2022  
This course examines biological, social, and psychological factors that interact in contributing to men's and women's gender roles. Within the social domain, particular attention will be given to how culture affects the social construction of gender, and how factors such as racism and homophobia interact with societally prescribed norms for men and women. The second half of the class will focus on the effects of gender roles on mental and physical health, social problems like aggression, and issues in education, work, and relationships including family life.

APSY331001  
Contemporary Issues in Applied Psychology and Human Development Henry, Daphne A  
Spring 2022  
This advanced undergraduate seminar draws from the works of critical, liberation and decolonial psychologists (e.g., Ignacio Martin-Baro, Shose Kessi, Derek Hook, Erica Burman, Joseph Gone) to analyze the conceptions of the child and childhood underlying EuroAmerican developmental psychology. We will explore how normative developmental psychological theories and research position many children and youth (e.g., unauthorized migrants, Indigenous youth, youth in the diaspora, and the impoverished) as different, transgressive, or pathological. Drawing on the narratives and oral histories from minoritized children and youth

in the U.S. and in the majority world/global South, we will analyze their stories of the causes of their marginalization as well as their liberatory praxis from the periphery to decolonize discourse, policies and practices grounded in dominant developmental norms of the child and childhood towards a more liberatory applied psychology and human development.

Ed Leadership/Higher Ed Ostrander, Claire M Spring 2022

This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings.

Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings

Inside-Out: Perspectives on Crime, Corrections, and Justice DelSesto, Matthew J

Spring 2022

Most sessions will meet at the Suffolk County House of Correction. Due to the unique nature of this course, registration is by application only. This Inside-Out course is an opportunity for a group of students from Boston College and the Suffolk County House of Correction to exchange ideas and perceptions about crime, corrections, and justice. It is a chance for all participants to gain a deeper understanding of the United States criminal justice system through the marriage of theoretical knowledge and practical experience achieved in meetings throughout a semester. Topics include causes and definitions of crime, criminal justice institutions, myths and realities of prison life, experiences of crime victims, theories of punishment and rehabilitation, and the relationship between crime and community. Most sessions will meet at the Suffolk County House of Correction.

Psychology of Work Davila, Alekzander  
Spring 2022  
Work is one of the central roles in life, encompassing much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically with their communities. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, organizational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and communities, and the ways in which the psychology of work can inform meaning, purpose, and social justice.

Prevention and Intervention Strategies for Children, Families, and Communities Dearing, Eric  
Spring 2022  
This course is designed to provide an overview of key issues that arise in the development, implementation, evaluation, and scaling of prevention and intervention programs that intersect with the field of psychology. Key issues include the challenges and opportunities of research-practice partnerships, the critical role of theories of change, diverse perspectives on evidence, and unintended consequences of good intentions. A variety of exemplar prevention and intervention programs are used to illustrate and analyze these key issues using theoretical, conceptual, and empirical works from psychological science.

Translating the Science of Learning into Practice Laski, Elida V  
Spring 2022  
The science of learning has a tremendous potential for enhancing educational outcomes and job performance. Yet findings obtained in laboratory settings are not easily replicated, expanded, and integrated into applied settings. This course will consider key issues to consider

in translating learning science into practice across diverse contexts. Students will consider examples of how findings from the science of learning have been applied either successfully or unsuccessfully to practice in fields such as education, counseling, design, and business.

Interpretation and Evaluation of Research Littenberg-Tobias, Joshua S  
Spring 2022

This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Organizational Effectiveness: Governance, Risk Management, and Compliancy DEPT  
Spring 2022

Organizational Effectiveness: Governance, Risk Management, and Compliancy. Technical proficiency is not enough to manage business risk. Every potential or identified threat cannot be mitigated, and organizations must choose where to focus their often limited resources to support business goals.

This course focuses on Governance, Risk and Compliance (GRC) as an organizational capability that all organizations require in today's complex world. Topics include understanding the business context of key stakeholders, corporate culture, and organizational risks. Students will understand how GRC capabilities such as enterprise risk management (ERM), compliance management (SOX, ISO, PCI, NIST, etc.) and policy management should work together to build a cohesive strategy within the business context. Students will learn about GRC technology and GRC program management required to support and grow GRC capabilities. Lastly, students will hear from guest lecturers about the roles and responsibilities of the Board of Directors, Risk/Audit Governance Committees, Chief Executives (Chief Information Security Officer (CISO), Chief Risk Officer (CRO), Chief Security Officer (CSO), etc.) and how they rely on GRC capabilities to support the business.

Cybersecurity: The Role of the CISO Leigh, Christopher J  
Spring 2022

Course provides guidance and the necessary skills to lead, design, and frame a business case for investment. Course outlines cost-benefit analysis and return-on-investment (ROI) by utilizing incident analysis, threat, and residual vulnerability analyses to determine and quantify the underlying business parameters. Course also addresses supporting techniques, including benchmarking and normalization, to enable data-based decision-making. Additionally, the course covers executive dashboard design, security metrics, key performance indicators (KPIs), graphics, illustrative techniques, business reach-out, and leadership engagement.

APSY684001  
Cybersecurity: Strategy and Implementation Wilkinson, David  
Spring 2022

Companies must determine how much they should spend on cybersecurity and cyber risk management as well as how these resources should be allocated amongst mitigative functionalities and capabilities. The cybersecurity program must be optimized such that the investment in it provides an attractive return relative to the other investment opportunities the company has. Companies must be able to quantify the return on investment (ROI) for their cybersecurity program to complete the comparison. Calculating the ROI for a cybersecurity program requires that the benefits be calculated in monetary terms and compared to the investment (current expense, capital expenditure and interdepartmental support cost) of providing and supporting the program. If the program is already in place, as most are, then the program should be evaluated in these terms and potential new investments be evaluated on their contributory value to the program overall. Once the goals and resource requirements have been determined, the program must be implemented in the most effective and efficient manner, a process that involves a cybersecurity program architecture, organizational structure, business engagement model, outsourcing strategy and RACI chart (responsibility, accountability, consultancy and informative requirements). In addition, the program must be measured from a performance perspective that requires the identification and monitoring of key performance indicators (KPIs) and regularly reported on.

Neurological and Biological Bases of Behavior Rowley, Amelia  
Spring 2022  
Health professionals work with many clients where biological and neurological factors play a role in influencing or exacerbating psychological problems. This course will touch on a variety of topics in psychology from a biological perspective that will be helpful in clinical practice. Areas to be covered include the basic structure and function of neurons, basic neuroanatomy, cognitive functions, substance abuse, addictions, and psychopharmacology. Discussion of these topics will be approached from a biopsychosocial approach. Students are encouraged to ask questions throughout the lecture to both clarify material and to work toward application of the material to clinical work

Theories of Counseling and Personality II Lewis Harris, Treniece  
Spring 2022  
Second part of a year-long sequence examining personality and counseling theories. Continues introduction to major theories of personality in the field of psychology and how those theories are applied in constructing counseling and psychotherapy models. Focuses on psychoanalytic personality and counseling models as well as critical theory as manifested in the psychology of gender and counseling models that integrate gender into working with clients. Specifically, for each model, students will examine the theoretical foundations developed in its theory of personality, relevant client and counselor dimensions, counseling techniques, and the active ingredients of change that each model uses in bringing about change.

Psychometric Theory II  
Li, Zhushan Spring 2022  
This course continues the examination and application of the principles of item response theory and educational measurement introduced in previous courses. The first section of the course will address the use of a variety of item response theory models for dichotomous and polytomous items. The second section of the course will focus on application of the principles of item response theory to a variety of practical situations and problems commonly encountered in educational testing. In the final section of the course, overarching theoretical and practical issues are addressed and future directions in item response theory are discussed.

Multilevel Regression Models  
O'Dwyer, Laura Spring 2022  
This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

Critical Perspectives on the Psychology of Race, Class, and Gender  
Pieterse, Alex Spring 2022  
Using social and critical psychological frameworks, introduces multiple strategies for thinking culturally about select psychological constructs and processes (for example, the self, family and community relations, and socio-political oppression). Also pays particular attention to race and class as sociocultural constructs important for the critical analysis of the relationships of culture and psychology. Explores the implications of these constructs for intercultural collaboration, advocacy, and action.

Quantitative Research Design in Counseling and Developmental Psychology  
Poteat, Paul Spring 2022  
Doctoral students in Counseling and Developmental Psychology. Others by instructor's permission. This is a year-long course, 1 credit in the fall, 2 credits in the spring. In this year-long seminar, students examine quantitative research designs and application employed in the Counseling and Developmental Psychology literatures, including randomized, nonrandomized, cross-sectional, and longitudinal designs. Students present and critique published research exemplifying specific designs, propose empirical studies that could advance counseling and developmental psychology, and present findings from their own empirical work.

# Educational Leadership and Higher Education

## Educational Leadership and Higher Education Courses: Summer 2021

ELHE710302  
Education Law and Public Policy Scavongelli, Michele G  
Summer 2021

Email [elhe@bc.edu](mailto:elhe@bc.edu) or department permission from the ELHE department. This course addresses the political and legal aspects of the role of education in our democratic society. Provides an introductory survey of public policy issues and laws governing preschool, elementary, secondary, and higher education. Included are such topics as religious freedom, free speech, and due process; the liability of educational institutions and educators; the legal distinctions between private and public institutions; student and parent privacy rights; disability rights; and the promotion of educational equity among all groups regardless of gender, sexual orientation, language, race, religion, ethnicity, or socioeconomic background.

ELHE740801  
Summer Institute WES-CIHE Blanco, Gerardo L  
Summer 2021

This annual symposium offered by World Education Services (WES) and the Center for International Higher Education (CIHE) aims to address questions around the internationalization of higher education and provide a space to discuss implications for institutions worldwide. Over the past decades, international higher education has grown exponentially. The global knowledge economy, the massive movement of students, scholars, and academic programs around the world, the IT revolution and its impact on international teaching and learning have all contributed to a strong feeling of interconnectedness and global citizenship in the higher education community. In many local communities outside of academia, however, an increasing frustration over the lack of benefits from globalization has emerged. This disconnect has resulted in rising nationalism and xenophobia, as manifested in several referenda and elections in the past few years. What does this mean for our policies and strategies for internationalization? What lessons are to be learned from these developments? What are the ethical challenges for international education in this political climate? BC students are eligible to receive credit for attending the conference (June 9-11, 2021). Those wishing to earn credit for participation will be required to submit a 1500-2000 word paper on a topic discussed at the conference. The paper will be due by the end of June.

ELHE770101  
Introduction to Educational Leadership and Change McNeil, Alexandra M  
Summer 2021

Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

Credits: 3  
Room and Schedule: 5/19-8/13, Monday 6:00pm Satisfies Core Requirement: None Prerequisites: E-mail department for permission if course is closed. Corequisites: None

ELHE770501  
Education Policy Analysis Kramer, Jenna  
Summer 2021

This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

ELHE770701  
Leadership for Social Justice Johnson, Lauri D  
Summer 2021

This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

ELHE771101  
Using Data and Evidence for School Improvements Steedman, Peter Summer 2021  
This course prepares leaders to manage initiatives around continuous improvement and data-informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.  
Credits: 3

ELHE772601  
Organizational Theory and Learning Driscoll, William Summer 2021  
Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.  
Credits: 3

## Educational Leadership and Higher Education Courses:

### Fall 2021

ELHE337501

Ed Leadership/Higher Ed Soto, Erica A

Fall 2021

This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings.

Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings

ELHE557001  
Capstone: Adulging Arnold, Karen  
Fall 2021  
Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Most college students in their early 20s feel neither fully adult nor fully competent in the tasks, responsibilities, and behaviors that are traditionally associated with grown-up life. In this class, students will take stock of their journey to adulthood so far and look ahead to what relationships, work, citizenship, and spirituality might look like in post-college life. Readings on the developmental psychology of young adulthood will be paired with popular media, exercises, and reflective writing to help students progress in their own "adulging" as they prepare to negotiate the transition out of college. Students may sign-up for this cross-listed course under UNCP Capstone or through the Lynch School ELHE department.  
Credits: 3

ELHE646001  
Interpretation and Evaluation of Research Littenberg-Tobias, Joshua S  
Fall 2021  
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Strategic Management of Human Capital McMahan, Molly  
Fall 2021  
Proceeding from a discussion of various theories of managing people in organizations, this course enhances management skills and the understanding of how different strategies are most effectively employed in the field of education, particularly Catholic education. To create the conditions upon which others can perform their work effectively, both professional staff and volunteers, one must manage their organizational environment. School leaders have a profound impact on their organizations effectiveness by how they manage faculty, staff, board members, volunteers, external relations, processes and projects. Considering schools are organizations that are complex and changing systems, operated by complex and changing people, this course provides students with a set of tools and enhanced skills for diagnosing and responding to the dynamics of human capital management. The course is designed to increase the understanding of how schools acquire, develop, and maintain high-performing employees. The focus will be managerial in nature and is intended to assist the students to become informed consumers and users of organizational practices. The primary methodology to be learned and applied in this course is organizational analysis, drawing on case studies and one's personal experiences and interactions in a work environment.

Student Affairs Administration Rowan-Kenyon, Heather T  
Fall 2021  
Student affairs professionals in post-secondary institutions contribute to student learning and personal development through a variety of programs and services. This course focuses on the design of campus environments that promote student development and contribute to the academic mission of higher education. Special attention will be given to the history, philosophy, and ethical standards of the student affairs profession, and to the relation of theory to contemporary student affairs practice. In addition, the course will examine how changing forces in the demographic, social, legal, and technological environment of higher education affect fundamental issues in professional practice.

Religion and Higher Education DEPT  
Fall 2021  
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education administration and student personnel development. This course explores the historical, sociological, and cultural dynamics between religion and higher education. Topics include secularism, modernity, and challenges to the integration of faith and intellectual life. Additional topics include: religious pluralism; religion in secular higher education; legal issues surrounding religion and higher education; academic freedom; constitutional matters; modernism, post-modernism, post-secularism and the tensions and opportunities that these cultural/intellectual movements pose for religion and higher learning in a modern, democratic, pluralistic society.

Introduction to Educational Leadership and Change Patterson, Leslie M  
Fall 2021  
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201

Education Policy and Practice Hegseth, Whitney M

Fall 2021

This course provides an overview of educational policy as it plays out in local practice.

Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

Ethics and Equity in Education Miller, Andrew F

Fall 2021

The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

Leadership for Social Justice DEPT

Fall 2021

This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

Internship in Higher Education James, Michael J  
Fall 2021

Restricted to M.A. students in the Higher Education program. A guided practicum experience for students enrolled in higher education programs, the internship requires supervised full or part-time work in a higher education institution or agency. The internship is overseen by program faculty and supervised by a professional administrator at the internship site. The Internship seminar requires the completion of a semester-long project that demonstrates competencies of practice specific to a particular area of administrative expertise and professional skills development related to theory and research in higher education

ELHE790303  
Applying Research in International Higher Education Blanco, Gerardo L  
Fall 2021

This course--provides a framework for a "real world" experience for students interested in international higher education, in combination with an in-depth research project. This combination of practical experience with research gives students an appreciation for the ways that the daily work of different kinds of organizations--higher education institutions, individual programs and offices, policymaking organizations, governmental units, and professional associations--are framed by questions and concerns that require the ability to undertake a significant exploration of information and ideas in order to inform practice.

## Educational Leadership and Higher Education Courses: Spring 2022

ELHE229501

Spirituality, Religion, and College Student Experience James, Michael J

Spring 2022

Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

ELHE337501

Ed Leadership/Higher Ed Ostrander, Claire M Spring 2022

This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings.

Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings

ELHE646001  
Interpretation and Evaluation of Research Littenberg-Tobias, Joshua S  
Spring 2022  
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

ELHE721001

El Encuentro: Immigration and the Response of Catholic Educators Wyttenbach, Melodie  
Spring 2022  
A Boston College report states that approximately 60% of Catholics under the age of 18 are Hispanic. This statistic challenges educators to question, how are our Catholic schools responding to demographic changes and the challenge of educating the next generation of American Catholics? Embracing Ignatian pedagogical designs this course aims to provide Catholic school teachers and leaders an opportunity to encounter immigrant children and families through an immersive educational experience. Participants will come together for prayer, reflection, lectures and discussion prior to and following an immersive experience with the Columban Mission Center (February 17-21, 2019) on the U.S.-Mexico border in El Paso, Texas and Juárez, Mexico. Participants will gather two times prior to the border experience and three times afterward, with final gathering being a symposium on Immigration and the response of Catholic educators. This symposium, which will be the culminating authentic assessment for the course, will be hosted and facilitated by participants for Catholic school educators interested in engaging in further dialogue on this topic. The Roche Center for Catholic Education at Boston College will sponsor the one credit course, including the immersion experience, for students enrolled in the program. The course will be capped at 16 students. For more information please email Dr. Melodie Wyttenbach at wyttba@bc.edu

ELHE730301

Financial Management in Higher Education Zona, John J  
Spring 2022  
The objective of the course is to introduce modern day financial theories and techniques as applied to the management and oversight of colleges and universities in the United States. There is an emphasis on a practical, real-world application across a broad range of specialized topics including endowment management, fundraising, budgeting, long range planning, debt management, financial statement analysis, cash management, resource allocation and risk management. We will examine these topics through the lens of two major shocks to the system that have altered the economic landscape of higher education: the 2008 global financial crisis and more recently, the global pandemic. The tradeoff between risk and return will serve as a common framework for class discussions. We will explore the unique characteristics of higher education institutions and the differences between major research universities and liberal arts colleges. Academic theory combines with executive leadership practice to serve as the underpinning of this course.

ELHE730401

School Finance and Business Administration O'Connor, Michael T; Wyttenbach, Melodie  
Spring 2022  
The financial and business operations of a school are instrumental to the success of students. Often under examined, core concepts in school finance and business management are nuanced, technical, and at times contentious. This class will prepare educational leaders to engage in discourse regarding the key issues in school finance and business management, through the lenses of educational adequacy, equity, efficiency, and liberty. The overarching goal is for educational leaders to be able to debate, craft, and implement school finance and business management policies with an informed understanding of the anticipated implications as well as alternative options. There are tremendous challenges to the conversion of conceptual and theoretical concepts into concrete, actionable financial and business policies for schools. A particular emphasis will be placed on examining these concepts and policies in Catholic schools and opportunities for strengthening the operational vitality of this sector. We will examine these challenges and the proposed solutions, underscoring the strengths and weaknesses of each approach.

College Student Experience: Access, Choice, and Persistence Rowan-Kenyon, Heather T  
Spring 2022  
This course explores the ways in which the higher education community has addressed three basic questions: Who goes to college? What sorts of experiences do students have in college? And, as a consequence of their experiences, who do they become by graduation? The course will familiarize students with the nature and characteristics of the college student population in American higher education, the variety of research methods used to study college students, and some of the many effects and outcomes of college student experiences.

Religion and Higher Education James, Michael J  
Spring 2022  
Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education administration and student personnel development. This course explores the historical, sociological, and cultural dynamics between religion and higher education. Topics include secularism, modernity, and challenges to the integration of faith and intellectual life. Additional topics include: religious pluralism; religion in secular higher education; legal issues surrounding religion and higher education; academic freedom; constitutional matters; modernism, post-modernism, post-secularism and the tensions and opportunities that these cultural/intellectual movements pose for religion and higher learning in a modern, democratic, pluralistic society.

Internationalization of Higher Education Blanco, Gerardo L  
Spring 2022  
Higher education around the world today is increasingly affected by the forces of internationalization. Professionals working in postsecondary education in the United States and elsewhere must have a clear understanding of the range of opportunities and challenges presented by the evolution of this phenomenon. This course has two main objectives. The first is to introduce students to the central issues relevant to the international dimension of higher education in different national contexts. The second objective is to promote students' understanding of the practical implications of internationalization for their own work in higher education administration and/or policy-making contexts

Introduction to Educational Leadership and Change McNeil, Alexandra M  
Spring 2022  
Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201  
Education Policy and Practice Hegseth, Whitney M  
Spring 2022  
This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

ELHE770401  
Ethics and Equity in Education Icin, Eylem B  
Spring 2022  
The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

Education Policy Analysis Kramer, Jenna  
Spring 2022  
This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

Leadership for Social Justice Taylor, Kris A  
Spring 2022  
This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

Instructional Leadership Celli, Lynne

Spring 2022

Instructional Leadership. Introduces students to many of the contested issues in the field of supervision, such as the relationship between supervision and teacher development, teacher empowerment, teacher alienation, learning theories, school effectiveness, school restructuring, curriculum development, and scientific management. Supervision will be viewed also as a moral, community-nested, artistic, motivating, and collaborative activity. Will stress the need for a restructuring of supervision as an institutional process.

Using Data and Evidence for School Improvements Graves, Kenneth E

Spring 2022

This course prepares leaders to manage initiatives around continuous improvement and data-informed inquiry. On one hand, students will develop basic research skills that will contribute to evidence-based school improvement, including action research. On the other hand, students will explore the landscape of supports and barriers to using data and other evidence effectively in schools. In particular, students will explore the role of leadership in: the appropriate use and design of assessments; fostering a positive cycle of inquiry among educators; and the effective use of information systems and other technologies.

Organizational Theory and Learning Geiser, Jill S

Spring 2022

Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand

group- and system-level patterns in "how groups get things done" (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Reflection on Leadership Seminar Information Lowenhaupt, Rebecca J

Spring 2022

The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner. This course also fulfills the requirements for the Master's Comprehensive exam ELHE8100

Seminar on Education Reform Scanlan, Martin K

Spring 2022

This course is for PSAP students only. This interdisciplinary seminar addresses the role of law in education reform and the relationship between law and social science in efforts to promote educational attainment in the nation's elementary and secondary schools. The primary focus will be contemporary education reform issues, including educator quality, access to meaningful opportunity to learn, curriculum control, and student, teacher, administrator, and parental rights. The focus of the course will be inquiry on the role of law in school reform, the limits of law-based education reform, and the consequences of statutory requirements for scientific evidence-based approaches to education programs.

#### ERAL110010

First Year Experience, Reflection, and Action Whitcavitch-Devoy, Julia

Fall 2021

First Year Experience, Reflection, and Action (ERA) is a full-year program whereby students develop attention to the needs of others, respect for context, and an appreciation for their own individual gifts and insights. Through key content material, speakers, design-thinking workshops, applied action projects, presentations, small group discussions, and community engagement work, the year-long LSEHD ERA program facilitates students growth across developmental domains. The ERA program connects first-year LSEHD students directly to mentors, including faculty, graduate students, other junior and senior undergraduates, and their undergraduate dean. ERAs model ensures information about opportunities at BC, as well as, externally, fairly reaches all students, while also providing a sound underpinning of student formation, robust academics, and the occasion for explorations of future and possible selves.

## Learning Engineering Courses: Fall 2021

LREN710101

Introduction to Learning Engineering Kolodner, Janet L

Fall 2021

This course introduces the content and skills needed to thrive as systematic designers of learning experiences, environments, and technologies. It focuses on three themes: (1) how people learn--cognitive processes involved in learning and social, cultural, physical, affective, and other influences on those processes; (2) how to fostering or promote learning--what we know about the help learners need to engage and participate at their best and ultimately to become more knowledgeable and capable; and (3) designing for learners and analyzing those designs--how to apply what you are learning to the design and analysis of learning experiences, environments, and technologies.

LREN712101

Reflective Seminar 1 Kolodner, Janet L Fall 2021

This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the M.A. in Learning Engineering Program. Focus will be on how to be designers of engaging and effective learning experiences. Students will also reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they'd like to develop, and to identify the kinds of responsibilities they'd enjoy taking on in the workplace.

Games for Learning Sidman, Jason G Fall 2021

What can we learn from games about engaging learners and fostering learning? How can games be developed specifically to promote learning? What kinds of things can be learned from games? What does it take to foster learning from games? Some educational games that have been designed in research labs can inform about the answers to these questions. As well, there are many computer games around that can teach us about sustaining engagement, particularly important for understanding deeply and mastering capabilities. In this module, students will engage with and read about a variety of games for learning and, hopefully, develop imagination about what different kinds of games and ways of interacting with games afford with respect to learning and come to recognize aspects of game design that are relevant to designing learning experiences. Your project will be the conceptual design of a game to achieve a set of learning goals of your choice.

Modeling and Simulation for Learning Zhang, Helen Z

Fall 2021

Simulations and computational modeling are popular educational activities that can serve as venues for engaging learners in observations and explorations of invisible processes and phenomena, collecting data and evidence, and constructing and iteratively understanding of mechanisms and processes. This module will engage students in exploring interesting questions such as "What are simulation activities good for?", "What about modeling activities?", "What are the affordances of each and when should each be used?", "What makes some simulations better for some situations and learner groups than others?", and "How can you design modeling/simulations to support desirable interactions?"

Principles of Fostering Learning Laski, Elida V

Fall 2021

This course will introduce students to what the field of psychology has to say about how humans learn. This includes examining the basic cognitive processes involved in learning, and considering how these processes interact with task demands and organization. The course is organized around key principles about learning and cognition which have emerged from empirical work in the fields of cognitive and developmental psychology. Its focus will be to identify practices that can be used to foster learning in different settings and interactions, including approaches such as spaced practice and group discussions.

## Learning Engineering Courses: Spring 2022

LREN710201

Foundations of Learning Technologies Smith, Brian K

Spring 2022

This course explores issues of designing and using technology to support learning. Students will become familiar with the affordances of various technologies and how activities can be structured around those for learners. Course meetings and projects are structured to help students think imaginatively about the ways that technology can contribute to engaging and equitable learning experiences.

Design Studio 2

Kolodner, Janet L; Lachapelle, Cathy P Spring 2022

The Design Studio is the venue for learning how to practice Learning Engineering. Students will learn practices of design thinking and design decision making in the context of a continuing design project begun in Design Studio 1, focused on designing learning experiences for a targeted population of learners that foster learning of targeted learning objectives. The Design Studio will be richly-facilitated and orchestrated as a Cognitive Apprenticeship. Students will work individually or in pairs and also spend time as a Knowledge Building Community sharing what they are designing and the complexities they are facing, providing advice to each other, and reflecting on and articulating what they are learning about designing for learners

Designing Online and Hybrid Learning Experiences Valdez, Keisha

Spring 2022

Face-to-face instruction is often considered the gold standard for learning, the most effective and efficient way to gain new knowledge and skills. But various models of distance education exist, including those powered by networked computing. One challenge for online and hybrid learning environments is designing ways that engage learners as well or better than in-person formats. This module will provide an overview of strategies that learning designers and engineers can use to develop effective and engaging online and hybrid learning experiences. Students will be encouraged to actively consider equity and inclusive practices in learning design.

Reflective Seminar 2 Kolodner, Janet L Spring 2022

This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the M.A. in Learning Engineering Program. Focus will be on knowing targeted learners and the physical, social, and cultural systems they are part of and keeping those criteria and constraints in mind while designing for learning. Students will continue to reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they'd like to develop, and to identify the kinds of responsibilities they'd enjoy taking on in the workplace.

Cognitive Task Analysis Laski, Elida V  
Spring 2022

This course will introduce students to the key conceptual and methodological elements of Cognitive Task Analysis, which can be used to identify the knowledge and skills required for the performance of a complex task. The focus will be on the specification of covert cognitive processes and the integration of those with overt behaviors into a model of task performance. Students will learn knowledge elicitation techniques, such as verbal think aloud protocol, used to uncover the cognitive structures and processes involved in expert performance of a task. Students also will practice generating cognitive models/knowledge representations of tasks relevant to their design area.

LREN730399  
Motivation in Educational Contexts DEPT  
Spring 2022

In this module, we will explore what it means to be motivated and what it is that we want at a fundamental level (i.e., our basic human needs). We will also learn about important theories of achievement motivation from the fields of educational, developmental, and social psychology, as well as empirical research that supports these theories. The contextual focus of the module will be on what motivates students to learn and what kinds of instructional practices and interventions can be employed in order to foster student motivation and engagement.

## Measurement, Evaluation, Statistics, and Assessment Courses: Fall 2021

MESA106001  
Classroom Assessment Lyons, Susan C  
Fall 2021

This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

MESA646001  
Interpretation and Evaluation of Research Littenberg-Tobias, Joshua S  
Fall 2021

This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

MESA866901  
Psychometrics I: Classical Test Theory and Rasch Models Von Davier, Matthias  
Fall 2021  
Presents a study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. General topics include the history of measurement, Thurstone and Guttman scales, classical true-score theory, and item response theory. Specific topics include principles of Rasch measurement, parameter estimation procedures, fit statistics, item banking, and computer adaptive testing.

MESA886401  
Survey Methods in Educational and Social Research Russell, Michael K  
Fall 2021  
This course is designed to familiarize students with the strategies, techniques, tactics, and issues in the development and administration of survey instruments. It will emphasize theoretical, measurement and practical considerations in the development of attitudinal instruments. The development and analysis of data resulting from several types of measurement scales will be covered.

## Measurement, Evaluation, Statistics, and Assessment Courses: Spring 2022

MESA106001  
Classroom Assessment DEPT  
Spring 2022

This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

MESA646001  
Interpretation and Evaluation of Research Littenberg-Tobias, Joshua S  
Spring 2022  
This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

MESA746701  
Evaluation Theory and Research Gates, Emily F Spring 2022  
Evaluation as a professional practice and academic discipline is characterized by variation in perspectives on what evaluation is and how it should be practiced. This course introduces students to evaluation theory, key debates, and research on evaluation in order to develop students as critical, responsible evaluators and evaluation scholars. Evaluation theories are models, approaches, or frameworks that prescribe how and why one should conduct evaluation in a particular way. Debates in the evaluation field center on the following issues: role of evaluation in society, particularly around advancing equity, social justice, and human rights; the relationship between theory and practice; role of stakeholder and public interest values in evaluation and the theory and practice of valuing; what constitutes credible evidence and, particularly evidence of outcomes and impact; influence of politics on evaluation and evaluation on policy-making; what are and should be evaluators? professional competencies and responsibilities; and future of evaluation. Research on evaluation involves conceptual and empirical investigations of theories, methods, and practices in order to better understand and improve evaluation. By the end of the course, students will be familiar with evaluation theories, debates, and research on evaluation and, ideally, strengthen their perspective and sense of responsibility within the evaluation field.

MESA756101  
Evaluation and Public Policy Braun, Henry I Spring 2022  
The course will examine some issues that arise in educational accountability. The purpose is to develop a deeper understanding of the policy issues and a critical appreciation of the relevant methodological strategies. Topics include the establishment and use of state-specific performance standards under NCLB and the quantification of the relative rigor of those standards; the evaluation of school or teacher effectiveness using so-called value-added models; and the policy evaluation of school reform efforts (such as charter schools) using data from large-scale cross-sectional surveys. The latter two topics both involve causal inferences from observational studies.

Large-Scale Assessment: Procedures and Practice Fishbein, Bethany G;Khorramdel Ameri, Lale Spring 2022  
Recommended: ERME7462 and ERME7468. Examines measurement concepts and data collection procedures in the context of large-scale assessment. Considers technical, operational, and political issues in view of measurement concepts, including reliability, validity, measurement error, and sampling error. Covers framework development, instrument

development, sampling, data collection, analysis, and reporting, in relation to both standardized educational achievement tests and questionnaires.

General Linear Models Li, Zhushan

Spring 2022

Addresses the construction, interpretation, and application of linear statistical models.

Specifically, lectures and computer exercises cover ordinary least squares regression models; matrix algebra operations; parameter estimation techniques; missing data options; power transformations; exploratory versus confirmatory model building; linear-model diagnostics, sources of multicollinearity; diagnostic residual analysis techniques; variance partitioning procedures; dummy, effect, and orthogonal coding procedures; and an introduction to structural equation modeling.

MESA886101

Multilevel Regression Models O'Dwyer, Laura

Spring 2022

This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

Dissertation Seminar in Educational Research, Measurement, and Evaluation O'Dwyer, Laura

Spring 2022

1 credit in the fall, 2 credits in the spring This two-semester seminar is designed to assist doctoral candidates in the preparation of a formal doctoral dissertation proposal. All aspects of dissertation development will be discussed (e.g., problem development, human subjects review, final defense). Students will develop and present a series of draft proposals for faculty and student reaction. Depending on the circumstances of the student, an acceptable pre-proposal (Intent) or full dissertation proposal is required for completion of the course.

EDUC620101

Contemporary African American Children's and Young Adult Literature DEPT

Summer 2021

African American writers and scholars began writing specifically for African American children in the early 1900s. They understood the impact literature had on building a positive self-identity for African American children as well as accurately teaching them African American history. This tradition of writing for African American children by African American authors continues. This course will introduce students to contemporary children's and young adult literature written by African American authors. The literature will be situated in the historical context in which it was produced to build a better understanding of the themes and lessons presented in the text. Through discussion and written reflections, students will develop a deeper understanding of the presence and significance of African American children and young adult literature.

EDUC630801

Curriculum Theories, Practice, and Design Peters, William D

Summer 2021

The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

Teaching, Curriculum, and Learning Environments: Global Perspectives Shirley, Dennis L  
Summer 2021  
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

Globalization, Mobility, and Education Agostinelli, Adam V  
Summer 2021  
This course address political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students' opportunities for learning through changes in policies, pedagogies, and curricula.

Preparing the Whole Person for Global Citizenship Kim, Min Jung  
Summer 2021

This course is for graduate students and upper-level undergraduates who are interested in the fields of education and psychology. The course will focus on the development of individuals and their role as global citizens. We will explore the whole person development of adolescents and emerging adults in the digital age—one marked by a participatory culture. We explore these questions while foregrounding the different strategies and methodologies of counseling, developmental, and educational psychology.

Foundations of Bilingual Education Alvarado, Jasmine N  
Summer 2021

Students will be able to walk into any school that offers a bilingual program and/or serves bilingual pupils and identify the type of program in place depending on the specifics of different contexts. In service of this goal, students will explore the following characteristics of language education programs in the U.S specifically: history, models (and key attribute of program types), political contexts, and legal foundations. Students will understand dual

language models, design, and implementation, specifically: competencies, knowledge, and skills of dual language teachers, features of instruction and assessment, and implementation.

## Teacher Education and Curriculum and Instruction Courses: Fall 2021

#### EDUC103001

Child Growth and Development Laski, Elida V  
Fall 2021

First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

The Educational Conversation Higgins, Christopher R

Fall 2021

What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

Reimagining School and Society Peters, William D

Fall 2021

Schooling as we understand it dates to the early nineteenth century, born of and contributing to a period of rapid social change marked by the spread of literacy, the rise of the nation state, and the advent of industrialization. Schooling remains one of the most powerful educational tools ever invented, but how well does it equip us to confront the educational task of today? How will education, in and out of school, need to evolve in light of new technologies and media ecologies, global interconnectedness, health crises, mass migrations, surges of xenophobia, entrenched inequality, climate emergency, and the new "post-truth" political condition?

Teaching, Curriculum, and Learning Environments: Global Perspectives Shirley, Dennis L  
Fall 2021

What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

Learning and Curriculum in the Elementary School Homza, Anne E  
Fall 2021

Students must be registered for EDUC2151 and arrange their schedules to be on-site in a school Tuesday or Thursday.. Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.

Teaching Language Arts Merlino, Michele M  
Fall 2021

Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

Teaching Mathematics and Technology Sohn, Sheila  
Fall 2021

This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

Teaching About the Natural World McNeill, Katherine L  
Fall 2021

This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a "practice" that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

Educational Strategies: Children with Special Needs Scanlon, David  
Fall 2021

This course provides instruction to pre-service teachers interested in learning more about instruction, curriculum, and teaching for children with special needs, with a framework highlighting important educational issues pertinent to their professional development and the realities of teaching. The course emphasizes the complexities of teaching children with individual learning profiles in inclusive settings. Students will examine educational readings and instructional practices through the lenses of curriculum, author voice, and academic tension. Class participants will develop a comprehensive understanding of the historical, legal, and political developments influencing current general and special education practices.

EDUC330801  
Bilingualism in Schools and Communities Paez, Mariela M  
Fall 2021

Successful completion of the courses EDUC 3308 and EDUC 3346 entitles students to receive the Teaching English Language Learners (TELL) certificate from the Lynch School of Education; this course is also part of the Foundation in Education Minor and the Immigration, Education and Humanitarian Studies Minor at Lynch. The goal of this course is to prepare students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the fields of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education. Students will also have an opportunity to build cultural competence skills by learning about diverse communities in the U.S.

Reading and Special Needs Instruction for Secondary and Middle School Students DEPT  
Fall 2021

Develops knowledge of the reading process and how to "teach reading the content areas." Students will develop curriculum and instruction that integrates reading instruction in the content areas, addressing diverse learners. Involves understanding relationship among assessment, evaluation, and curriculum; learning what and how to teach based on student assessments; developing and providing scaffolded instruction that addresses reading comprehension and critical thinking; and integrating reading, writing, speaking, listening, and thinking into content curriculum. Also addresses how to help students comprehend non-printed text.

Inclusive Education Field Observation Scanlon, David  
Fall 2021  
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

Partnering with Diverse Families and Communities in Early Childhood  
Paez, Mariela M Fall 2021  
This course is designed to help early childhood educators establish effective partnerships and reciprocal relationships with diverse families and communities. First, students will learn about models of family involvement and important family developmental processes in early childhood such as attachment, maternal responsiveness, and parenting styles. Second, we discuss important social, cultural, and linguistic characteristics which shape the life of families and children and are relevant for understanding diverse families. Third, we present strategies for supporting and working with diverse families through family, school, and community partnerships. At the end of this course, students will have developed an action plan for working with diverse families in early childhood settings including activities for: collecting and providing information, planning for family involvement in the classroom, establishing reciprocal relationships with families, and collaborating with communities.

EDUC630201  
Secondary and Middle School English Methods Corbitt, Alexander P Fall 2021  
Develops knowledge, skills, and dispositions essential for competent understanding, development, and delivery of effective English Language Arts instruction in a diverse classroom. Addresses educational and literary theory, pedagogy, assessment, evaluation, content, curriculum, media literacy, and sensitivity to and respect for adolescents who come from a variety of cultures, abilities, interests, and needs. Provides knowledge of local, state, and national standards and strategies to help students reach those standards. Encourages risk-taking, experimentation, flexibility, application of theory, and innovation. Good teaching demands open-mindedness, critical reading, writing, and thinking, honest reflection, high expectations, ongoing revision, and commitment to social justice.

EDUC630801  
Curriculum Theories, Practice, and Design Lee, Jieun Fall 2021  
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

 Assessment of Students with Extensive Support Needs Bruce, Susan  
 Fall 2021  
 Pre-practicum required (25 hours). This course addresses formal and informal assessment of students with intensive needs. Students will become familiar with assessments driven by both the developmental and functional paradigms. All assessment activities will be founded on the principle that appropriate assessment goes beyond the student to include consideration of the student's multiple contexts. This course also addresses the IEP, the legal mandates behind the process, and the collaborative role of the teacher, as part of the educational team, during the assessment and report writing processes.

EDUC713101  
Social Justice in Jesuit Contexts Casalini, Cristiano  
Fall 2021  
This is a Graduate-level on-line course. The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according to the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students' knowledge of current practices and stimulating dialogue.

A History of The Jesuits Meehan, Seth M  
Fall 2021  
This is a Graduate-level on-line course.. For nearly five centuries, the Society of Jesus has been one of the most successful and, at times, most controversial religious orders in the Catholic Church. A History of the Jesuits offers an introductory survey to this rich and varied past with particular attention, following the Jesuits' suppression in 1773, to various enterprises and enterprisers in the Americas. The course seeks to answer these questions: What have been the characteristics of the Society of Jesus and its associated works? And how and why have those characteristics remained the same or changed? Complementing the other courses in the Certificate program, the course traces the development, expansion, suppression, restoration, and recent developments of the Society of Jesus by closely examining the historical contributions of significant Jesuits.

Accessible and Inclusive Design Francis, Heather  
Fall 2021  
This survey course focuses on practical considerations regarding inclusive and accessible design. The focus is around guiding principles and key content that learners and designers can apply to their particular area of design. Particular focus is paid to understanding the functional barriers that individuals with disabilities might encounter, how these barriers can be addressed proactively, and why retrofitting designs can be costly and ineffective. After a general introduction to some of the guiding ideas behind inclusion and accessibility, both Universal Design for Learning (UDL) and accessibility are discussed to provide practical paths towards design that is ultimately more effective for all learners

Teaching, Curriculum, and Learning Environments: Global Perspectives  
Shirley, Dennis L Fall 2021  
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

Models and Theories of Instructional Design Jackson, Richard

Fall 2021

Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability.

Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

Curriculum Theories, Practice, and Design Lee, Jieun

Fall 2021

The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

Family and Community Engagement Asselin, Chloe

Fall 2021

The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders—formal and informal—enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school board-community relations. Direct participation in inquiry into school-community activities conducted on-site in schools and neighborhoods will be requirement of the course.

EDUC730801

Designing Learning Environments in a Social and Digital World

Corbitt, Alexander P Fall 2021

In today's society, what counts as knowledge and expertise has changed considering the global shifts in interconnectivity, social interactions, and technology. Previous models of learning focused on knowledge as a collection of facts within curriculum and learning environments helping individuals obtain those facts. However, today technology can enable all individuals to quickly obtain facts.

Instead, expertise requires deep knowledge in which ideas are applied across multiple contexts in particular contexts with people and tools. These shifts in knowledge as well as technological advances have significant implications for how we design curriculum and other learning environments. In this course, we will examine different learning environments as well as various aspects within those environments. For example, we will examine curriculum to evaluate the scaffolds to support student learning, analyze digital learning environments for professional development to support teacher learning and critique video of classroom discourse to examine student interactions and community development. In this course, we will consider the environment both as conceptualized by its designers (the design) and as it is experienced by participants as learning interactions unfold in particular settings (the enactment) to evaluate the effectiveness of those learning environments.

Supervision in Action

Assigned, Dept;Cownie, Charles T Fall 2021

This course is designed as an introduction to research-based clinical supervision models in teacher education. Hands-on application-in action includes observational strategies, collaborative assessment logs, and summative reports as resources for ongoing data collection. Course participants acquire and then apply the Massachusetts Department of Education Pre-service Performance Assessment rubric for coaching and evaluating student teachers, integrating the BC Teacher Education themes that emphasize teaching for equity and social justice. This course is restricted to cooperating teachers in BC Partnership Schools who are supervising a BC student teacher in a full-time practica and to new BC Clinical Faculty.

Advanced Graduate Inquiry Seminar Davis, Cheryl J

Fall 2021

This course is designed for the Lynch School Fifth Year Program students who have successfully completed a licensure program at Boston College. It is designed to build on teacher candidates' experiences with inquiry as stance and expand their skills in conducting classroom-based research that leads to pupil achievement and teaching for social justice in their new license area. The hybrid course is online with one class meeting. A case-study approach is used to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from experiences with students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is EDUC7432 which is taken in conjunction with full-time student teaching (EDUC7420).

Graduate Inquiry Seminar: One Davis, Cheryl J

Fall 2021

The course will coincide with the pre-practicum experience. It is designed to introduce teacher candidates to inquiry as stance and the skills necessary to conduct classroom-based research that leads to pupil achievement and teaching for social justice. The course is designed to help teacher candidates mediate the relationships of theory and practice, pose questions for

inquiry, learn through reflection and discussion, learn from their students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is 432 which is taken in conjunction with full-time student teaching (EDUC7420). In the fall of 2020 this course will be fully online. Part is asynchronous and part synchronous. The synchronous part will be scheduled for 8:00-9:30 pm on the scheduled day of the course. Since this is a 1-credit course, there will be 5 synchronous sessions. The dates of the five synchronous sessions have not been set, but these sessions will occur over the course of the semester (i.e., not five weeks in a row)

Graduate Inquiry Seminar: Two Olivo, Marisa E

Fall 2021

Donovan Urban Scholars must enroll in EDUC432.08. The primary goal of this capstone seminar is to initiate teacher candidates into the practice of teacher research or collaborative inquiry for action.

Collaborative Inquiry for Action is an ongoing, collaborative process of systematic and self-critical inquiry by educators about their own schools and classrooms in order to increase teachers' knowledge, improve students' learning, and contribute to social justice. This final project will be presented at a roundtable presentation at the end of the semester and also satisfies the M.Ed., MAT, MST Comprehensive Examination in Education EDUC8100.

Educating Learners with Disabilities Dalton, Elizabeth M

Fall 2021

This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform.

Universal Design for Learning (UDL) provides the theoretical framework for this course.

Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Teaching Narrative Writing to K-8 Students Brisk, Maria E  
Fall 2021

This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Contemporary Issues and Methods in Literacy Research Proctor, Charles P  
Fall 2021  
This is an advanced graduate seminar designed to support students who are interested in conducting literacy research, particularly in applied educational contexts. This course is meant to introduce and explore literacy research, theory, methodology, with a specific focus on intersections and divergences between developmental and critical literacy research. The course starts by building an understanding of these literacy traditions and moves on to

explores different theories, methodologies, and controversies that have emerged, or are currently emerging, in literacy research more broadly. Both critical and developmental perspectives are highly relevant to applied educational contexts, and an understanding of what they are and what they mean is important for the 21st century literacy researchers.

Participatory Action Research: Gender, Race, Power DEPT

Fall 2021

This graduate seminar introduces students to theoretical and practical issues in the design and implementation of community- and school-based participatory and action research, including a review of theories and practices that have contributed to community-based knowledge construction and social change policies and processes. Ethnographic, narrative, oral history, and visual methodologies are additional resources for understanding and representing the individual and collective stories co-constructed through the research process. Students participate in a community-based collaborative undoing racism workshop and have opportunities for ongoing collaborative work on a site. We reflect collaboratively and contextually on multiple and complex constructions of "gender," "race," and social class in and through these research processes. OPEN TO ALL Ph.D. STUDENTS. MASTER'S LEVEL STUDENTS REQUIRE PERMISSION OF THE INSTRUCTOR.

Contemp Issues: Complexity Theories in Practice McQuillan, Patrick J

Fall 2021

Everything is made up for systems and everything constitutes aspects of other systems. In brief, systems are everywhere. This systemic view is compelling, as nothing stands alone. To understand those connections is to understand how many features of the worlds studied by

educational researchers constitute systemic relationships and complexity theories offers a lens for understanding how systems operate. With the potential of this focus in mind, this course aims to support students in developing an understanding of the analytic power of complexity theories so they can draw on this analytic framework to enrich their own research. Advanced undergraduate students may take course with Undergraduate Dean's permission

EDUC981901

Educational Change DEPT

Fall 2021

This course focuses on the study of change theories and approaches, their application in educational reform, and their impact on teaching and learning. Students examine the history of educational change and consider the forces for and against change in schools and other educational organizations. Each student is expected to conduct a research study of an educational change initiative.

Qualitative Research Methods Lowenhaupt, Rebecca J

Fall 2021

Introduces the foundations and techniques of carrying out qualitative research. Topics include philosophical underpinnings, planning for a qualitative research project, negotiating entry, ethics of conducting research, data collection and analysis, and writing/presenting qualitative research.

Requires a research project involving participant observation and/or interviewing.

EDUC986401

Advanced Qualitative Research DEPT

Fall 2021

Building upon the foundation concepts of qualitative research and initial exploration of an introductory course in qualitative methodologies, this course explores the theoretical, methodological, and analytic implications of conducting qualitative research from differing theoretical perspectives. Key readings include texts on social theory, qualitative methodologies, and exemplar qualitative research from various social scientific fields. Students will distinguish between methodology and methods, analyze data, and produce either a report for a specified audience or a research manuscript for possible submission to an educational research journal.

## Teacher Education and Curriculum and Instruction Courses: Spring 2022

EDUC103001  
Child Growth and Development MacEvoy, Julie P  
Spring 2022  
First part of a two-course sequence (APSY1030 - APSY1031) designed to introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course acquaints students with multiple processes of child development, including physical, social, cognitive, linguistic, and emotional development from birth through adolescence. Both typical and atypical patterns of development will be examined. Students discuss and analyze classic theories, contemporary issues, and key research in child development in view of their application to educational and other applied settings.

Spring 2022

Introduces pre-service teachers to a variety of issues surrounding special education, including its historical development, concepts of disability, the terminology commonly used in the field, and recent trends and practices. Examines legislation pertaining to special education, particularly the Individuals With Disabilities Education Act (IDEA). Assists future educators to understand the process of designing and implementing an Individualized Educational Program (IEP).

The Educational Conversation Casalini, Cristiano  
Spring 2022

What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

Reimagining School and Society Alexander, Jeremy;Higgins, Christopher R Spring 2022  
Schooling as we understand it dates to the early nineteenth century, born of and contributing to a period of rapid social change marked by the spread of literacy, the rise of the nation state, and the advent of industrialization. Schooling remains one of the most powerful educational tools ever invented, but how well does it equip us to confront the educational task of today? How will education, in and out of school, need to evolve in light of new technologies and media ecologies, global interconnectedness, health crises, mass migrations, surges of xenophobia, entrenched inequality, climate emergency, and the new "post-truth" political condition?

Learning and Curriculum in the Elementary School Homza, Anne E

Spring 2022

Students must be registered for EDUC2151 and arrange their schedules to be on-site in a school Tuesday or Thursday.. Introduces students to the profession of education and roles of teachers. Provides understanding of contexts in which education is delivered in multicultural settings and opportunity to gain knowledge and experience about interpersonal, observational, and organization skills that underlie teaching. Faculty and students work together throughout course to examine students' commitment to and readiness for career as a teacher. Introduces essentials of curriculum, teaching, and managing classrooms at elementary (K-6) level and links them to major learning theories for children. Views curriculum, instruction, management, and learning theory from perspectives of current school reform movement and social/cultural changes affecting elementary classrooms and schools.

Teaching Language Arts Merlino, Michele M Spring 2022

Focuses on the teaching and learning of language arts in the elementary grades. Students will be exposed to theoretical approaches to both oral and written language development in addition to teaching methods that support development. In the fall semester, content and approaches related to teaching in English/Spanish bilingual programs will be included. Students will have the opportunity to apply their learning through practical lesson development, and implementation in connection to their pre-practicum placement. Student diversity and its implications for teaching language arts will be an integral theme. Students will draw on their experiences in their prepractica to apply and reflect on learning as they mediate theory and practice.

Teaching Mathematics and Technology Son, Kyunghoon

Spring 2022

This course presents methods and materials useful in teaching mathematics to elementary school children. It analyzes mathematics content and pedagogy from both conceptual and practical perspectives. Emphasis is placed on the interconnections among theory, procedures, and applications that form the framework on which specific mathematics lessons are constructed. It examines the elementary mathematics curriculum through technology resources, addressing the different ways in which technology can be used. Activities include laboratory experiences with concrete models and technology as well as inquiry into the role of the teacher in the school community in the epoch of teaching for social justice.

Teaching About the Natural World Lee, Samuel

Spring 2022

This course is designed to increase confidence, enthusiasm, and knowledge for teaching elementary science. Science can be an essential part of an elementary classroom not only to achieve key science learning goals, but also as a means to engage and motivate students as well as support literacy and mathematics learning. An overarching focus of the course is on the idea that science is a "practice" that includes specific ways of reasoning, communicating, and acting. The course is also designed in partnership with the afterschool program at Gardner Pilot Academy in BPS. For eight weeks during the course, undergraduates will work with elementary students to teach them science and to reflect on how to design more effective science lessons.

Language Learners in Global Perspective DEPT

Spring 2022

This course provides an overview of language learning as a process, language learning in global contexts, and the experiences of second language learners in schools. We will hear from experts at BC and around the world, learning about current trends in and contexts for language learning. There are several central themes that will recur during this course, including: examining theories of learning, with a focus on language learning and language acquisition; the experiences of bilingual learners and bilingual education; language learning and technology in the twenty-first century, including issues of multimodal literacy and digital storytelling; and connections between language learning and identity formation. While interacting with and reading work by experts in the field, we will discuss both local and global settings, exploring how language learning affects heritage language revitalization, bilingualism, indigenous communities, and others. We will discuss how language learning is never a neutral process, but instead happens in social contexts and inevitably shapes identities. We will learn how to facilitate language learning in ways that promote justice, increase empathy, and meet the needs of diverse students. Throughout, we will take a global perspective and consider language learning from multiple points of view.

Reading Difference Differently: Issues of Gender(s) and Sexualities in Youth Literature and Media  
Wargo, Jon M Spring 2022  
With a particular emphasis on issues of gender and sexuality, this class interrogates how contemporary youth literature and media (texts by and about young people) shape and organize difference differently. Examining how textual understandings of youth, gender, and sexuality intersect with other domains of identity (e.g., race, ability, religion), this course explores how criticism, circulation, and reception of innovative storytelling advance new ways to understand childhood and the young adult.

Bilingualism in Schools and Communities Andrade Gonzalez, Paulette R  
Spring 2022  
Successful completion of the courses EDUC 3308 and EDUC 3346 entitles students to receive the Teaching English Language Learners (TELL) certificate from the Lynch School of Education; this course is also part of the Foundation in Education Minor and the Immigration, Education and Humanitarian Studies Minor at Lynch. The goal of this course is to prepare students to participate in increasingly multilingual and multicultural environments in order to better serve bilingual students, families, and communities. Building on theory, research, and practice from the fields of bilingualism, second language acquisition, and education, students will learn about the process of language and literacy development in children and adolescents who are exposed to more than one language, and the social and cultural contexts in which this development occurs. Through the use of case studies and school profiles, students will deepen their understanding of issues in bilingualism and bilingual education. Students will also have an opportunity to build cultural competence skills by learning about diverse communities in the U.S.

EDUC405001  
The Art of Educational Inquiry Ha, Samantha  
Spring 2022  
While education and educational research are often seen as separate activities, transformative education holds that the quest to form ourselves entails asking questions about the nature and direction of our growth. Inquiry is simultaneously an effort to understand, a social intervention, and an art of self-fashioning. This seminar invites students into the art of educational inquiry. Through examination of paradigmatic texts and visits from Lynch faculty members describing their own work, we consider the affordances of major traditions of educational inquiry. Working toward a formal proposal for a scholarly investigation, artistic creation, or public action, students are supported to articulate, deepen, and refine their own driving questions about educational concepts, relationships, practices, institutions, and aims. (Students who take EDUC 4050 in their junior year may wish to develop the work itself as a senior project.)

Senior Inquiry Seminar  
Homza, Anne E;Peters, William D Spring 2022  
This capstone inquiry seminar requires teacher candidates to continue to develop an inquiry stance in their practice through the systematic analysis of teaching and learning in their classroom experiences. Grounded in a theory of teacher education for social justice that encourages practitioners to challenge educational inequities by inquiring into practice, this course advances teacher candidates' skills in planning, delivering, assessing, and analyzing instruction that promotes pupil learning and enhances their life-chances.

Inclusive Education Field Observation Scanlon, David  
Spring 2022  
Open to undergraduate majors in the Morrissey College of Arts and Sciences, the Inclusive Education Minor is offered in the LSOE. The minor is designed to (1) introduce Morrissey College of Arts and Sciences students to the world of disabilities and special education with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of increasingly diverse school populations. Classes address the nature and implications of disabilities and effective practices in special education. The minor consists of six-courses and a zero-credit field observation. Appropriate for those considering a career or further studies in education.

Art and Music in Early Childhood Education Paez, Mariela M Spring 2022  
The main purpose of this course is to encourage early childhood educators to embrace the unique characteristics of young children's artistic and musical expression and appreciation of these experiences. By providing a foundational knowledge of young children's creative thinking and aesthetic development, the course will teach you how to apply effective pedagogical strategies in teaching art and music and how to integrate art and music across the early childhood curriculum. Students will learn how to bridge theory and practice through various readings, recorded lectures, and classroom examples. At the end of this course, you will be able to plan effective process-focused art and music lessons, use various materials and medium for artistic and musical expression, maximize the potential of your classroom resources, and use art and music to promote multiculturalism, diversity, and enhance family involvement.

Science Playing and Learning in the Early Childhood Classroom Paez, Mariela M Spring 2022  
This course is designed to encourage and prepare early childhood educators for planning and implementing engaging and developmentally appropriate science learning experiences (Pre-K-2nd grade). An overarching focus of the course is instilling in students an appreciation for the wonder of science and the world around them. The course is divided into three science content areas: Earth and Space Sciences, Life Sciences, and Physical Sciences. Students will learn how to connect their teaching with new science, technology, and engineering standards. Through interactive activities and discussions including the review of video, science lessons, and research in science education, we will explore key elements and challenges of science teaching and provide a foundation for supporting science learning in the early childhood classroom.

Teachers and Educational Reform McQuillan, Patrick J Spring 2022  
Issues of school reform are constantly in the media--high-stakes testing, charter schools, the Common Core. At the heart of these reforms are teachers and the work they do with students in their classrooms. In this course, students look in-depth at the nature of teaching and learning in schools and classrooms. In particular, the course attends to issues and practices linked to current efforts at educational reform, approaching these matters through active inquiry and experiential enactment of such practices. Focused reflection is also a central component of this class.

EDUC630801  
Curriculum Theories, Practice, and Design Asante, Christian K Spring 2022  
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

Developmentally Appropriate Curriculum in Early Childhood Education Cristello, Karen M Spring 2022  
This course focuses on the development and implementation of curriculum in early education. The Massachusetts Guidelines for Preschool Learning Experiences and the national standards for developmentally appropriate practices will be utilized throughout the semester. This course will highlight each of the curriculum domains (language/literacy, mathematics, science and technology, social studies, health, and the arts) while demonstrating how to build an integrated curriculum in an early childhood classroom. The importance and value of play in the early years will be emphasized, and strategies will be shared to help teacher candidates document student learning.

Classroom Management Cass, Richard J

Spring 2022

ED201 is now EDUC6373. Focuses on observation and description of learning behaviors, with emphasis on examining the relationship of teacher behavior and student motivation. Prepares teachers to analyze behavior in the context of a regular classroom setting that serves moderate special needs students and to select, organize, plan, and promote developmentally appropriate behavior management strategies that support positive learning. Also considers theoretical models of discipline and classroom management strategies, and requires students to propose and develop a rationale for selection of specific techniques for specific classroom behaviors.

Ed Implications/Sensory, Motor, and Health Impairments Miller, Thomas

Spring 2022

This course addresses the impact of physical disabilities on learning. Emphasis is placed on the educational needs of children with cerebral palsy, visual impairment, or hearing loss in combination with intellectual disability. Basic anatomy of the eye and ear are covered along with the common causes of vision and hearing loss. This course prepares teachers to perform functional vision and hearing evaluations and to translate those findings into appropriate classroom accommodations and adaptations. Many children with disabilities have unmet sensory integration needs that influence their behavior and subsequent readiness to learn.

Teaching and Learning Strategies - Moderate Support Needs Scanlon, David

Spring 2022

Not open to non-degree students. EDUC6589 is intended for general educators and EDUC6588 is required for special educators This course is intended to help prospective and experienced special education teachers and other educators a repertoire of skills for teaching students with mild/moderate (high incidence) educational disabilities. Participants will accomplish this goal by making connections among their knowledge of disabilities, special education policy and practices, assessments, education theory, and teaching methods. Students will learn how to develop, implement, and monitor individualized education programs, implement research-based effective intervention practices, and collaborate with others to meet the needs of special education students in inclusive and other educational settings. Successful students will have familiarity and competency with a variety of special education procedures and teaching approaches and specific practices. Appropriate for both elementary and secondary level education. Class sessions will routinely include time to practice skills being learned.

Computer Applications for Educators Kinder, T S

Spring 2022

This is not a course in computer programming. Alternates every other spring with EDUC1128. (EDUC6628 is for graduate students only).. Explores the role of emerging technologies in the context of schools. Course is theoretically grounded in the Project-Based Learning literature. Assignments are hands-on, with emphasis placed on producing tangible artifacts that will serve a practical need.

Specifically, students will develop PowerPoint presentations to evaluate educational software and web-based curricular materials. Also, each student will develop a website featuring his or her teaching portfolio. Course appropriate for all computer skill levels.

EDUC713201  
Discernment and Prayer in the Spiritual Exercises of St. Ignatius Geger, Barton T  
Spring 2022  
This is a Graduate level online course. . A study of the spiritual doctrine of St. Ignatius Loyola as articulated in the text of the Spiritual Exercises, but with reference to other texts such as Ignatius' Testament, letters, and the Constitutions of the Society of Jesus. The focus is how Ignatius' treatment of prayer, discernment of spirits, and discernment of God's will, work together to form a "contemplative in action."

EDUC715801  
Jesuit Pedagogy Casalini, Cristiano Spring 2022  
This is an online course.. This three-credit, graduate-level online course examines the distinctiveness of the Jesuits' approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects—the uniformity and the adaptability—were explicitly supported by the "Ratio studiorum," the Jesuits' foundational plan of studies issued in 1599, which, despite the schools' many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctively Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

Teaching, Curriculum, and Learning Environments: Global Perspectives Shirley, Dennis L  
Spring 2022  
What kinds of education are most needed for a world characterized by spiraling political polarization, increasing economic interdependence, rapid climate change, and a global pandemic like COVID-19? This online course will introduce students to contemporary debates about how educators should teach, what students should learn, and how schools should interact with society. The course is global in scope and will require in-depth study of country cases and failed and successful models of change. International students and U.S. students curious about other countries' approaches to education are strongly encouraged to enroll.

EDUC730201  
Models and Theories of Instructional Design Jackson, Richard  
Spring 2022  
Now well into the twenty-first century, schools struggle with the challenge of offering a high quality education for all learners regardless of race, family status, national origin, language, or ability.  
Increasingly, curriculum is accessed digitally and student work is generated and exhibited using technology tools. The once familiar artifacts of classrooms are rapidly giving way to radically new forms of teaching and learning. Within this context of change, this course reviews the evolution of theories of learning and instruction and then critically examines a range of contemporary models and theoretical frameworks. Learning activities in the course will allow participants to develop their own personalized framework for planning and implementing instruction.

EDUC730301  
Curriculum Theories, Practice, and Design Asante, Christian K  
Spring 2022  
The overarching objective for Curriculum Theories and Practice is to help course participants develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective and equitable curricular organization. To do so, the class explores varied ways of conceptualizing a school curriculum, drawing on insights from major curriculum designers, both past and present, U.S. and international. So students appreciate the ever-evolving nature of effective teaching practices and related school curricula, they will assess their own experiences with educational and institutional change processes writ large. Aiming to help course participants to thrive in the current, volatile educational and political climate, students will consider various approaches to multicultural education, anti-racist education, and inclusion practices that aim to transform the curriculum, attending to the needs of all students and overtly promoting equitable outcomes. In doing so, students will enact alternative strategies for assessment that provide multiple and authentic measures of student learning. Ultimately the course intends to help students consider how school curricula can be structured to promote social justice.

Globalization, Mobility, and Education Rwanamiza, Erasme  
Spring 2022  
This course address political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes in schools, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course asks how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students' opportunities for learning through changes in policies, pedagogies, and curricula.

EDUC730601  
Language Learner in Global Perspective Kim, Deoksoon  
Spring 2022  
This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a social cultural perspective, exploring language learning as embedded in sociohistorically situated activities. We develop and account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can intersect in different ways.

EDUC730701

Global Perspectives on Disabilities and Special Education Dunn, Lori A  
Spring 2022

In the modern world there are many differing perspectives about the significance of disabilities. In this course we examine both "medical model" perspectives on the origin and nature of disabilities, as rooted in the scientific method, and post-modern critical perspectives. Cultural influences on how those perspectives are valued will also be considered. Differing approaches to special education practice--both service delivery systems and interventions--will be critically compared to the thought traditions. The ethics and social value of special education will also be considered.

Graduate Inquiry Seminar: One Olivo, Marisa E Spring 2022

The course will coincide with the pre-practicum experience. It is designed to introduce teacher candidates to inquiry as stance and the skills necessary to conduct classroom-based research that leads to pupil achievement and teaching for social justice. The course is designed to help teacher candidates mediate the relationships of theory and practice, pose questions for inquiry, learn through reflection and discussion, learn from their students and colleagues, construct critical perspectives about teaching, learning, and schooling, and to improve teaching and learning. The second part of this sequence is 432 which is taken in conjunction with full-time student teaching (EDUC7420). In the fall of 2020 this course will be fully online. Part is asynchronous and part synchronous. The synchronous part will be scheduled for 8:00-

9:30 pm on the scheduled day of the course. Since this is a 1-credit course, there will be 5 synchronous sessions. The dates of the five synchronous sessions have not been set, but these sessions will occur over the course of the semester (i.e., not five weeks in a row)

Educating Learners with Disabilities Francis, Heather

Spring 2022

This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course.

Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Teaching Narrative Writing to K-8 Students Macdonald, Elizabeth A

Spring 2022

This is a project-based course where groups of participants will collaborate to develop a writing unit in a genre appropriate for their grade level. Using a genre-based pedagogy informed by systemic functional linguistics, participants will learn what and how to teach non-fiction narratives (Personal and procedural recounts, autobiographies, biographies, empathetic autobiographies, and historical recounts) and fictional narratives. Features of the genres demanded in elementary and middle schools will be learned and practiced. The strong

emphasis on language development distinguishes this approach from others currently used in schools. The approach to teaching guides teachers in ways of apprenticing students to writing that builds confidence and success.

Bilingual Literacy and Literature Proctor, Charles P

Spring 2022

This course is designed to provide pre- and in-service practitioners exposure to contemporary issues, perspectives, and approaches for literacy instruction in bilingual education settings. These bilingual education settings include transitional and dual language bilingual education programs, and we will explore literacy instruction as it pertains within and across these different program models. At its core, the course is designed to model the types of instructional approaches it espouses. The course will be delivered bilingually, in Spanish and English. As such, the language of instruction of the course, as well as expectations for participation, are fluid and variable. The course targets a range of literacy related topics (see instruction in contemporary bilingual education contexts.

Adult Believers in a Postmodern Context Regan, Jane  
Spring 2022  
What are the dynamics that make adults ready and able to live effectively as people of faith in our contemporary postmodern context? What does it mean to be a believer in such a context and how are adults supported in the maturity of faith? Theology, psychology, and education theory all have a contribution to make in addressing these questions. Focused consideration is given to contemporary theories in adult development and adult learning. Attention is given to the implications of this for the parish/congregation, but broader applications are also considered.

Contemporary Issues and Methods in Literacy Research DEPT  
Spring 2022  
This is an advanced graduate seminar designed to support students who are interested in conducting literacy research, particularly in applied educational contexts. This course is meant to introduce and explore literacy research, theory, methodology, with a specific focus on intersections and divergences between developmental and critical literacy research. The course starts by building an understanding of these literacy traditions and moves on to explore different theories, methodologies, and controversies that have emerged, or are currently emerging, in literacy research more broadly. Both critical and developmental

perspectives are highly relevant to applied educational contexts, and an understanding of what they are and what they mean is important for the 21st century literacy researchers.

Spring 2022  
The course will provide a foundation focus on the topic of scholarly writing while also supporting the development of the unique writing needs of participating students. Course readings will explicitly introduce students to text structures and language demands of different genres of scholarly writing in education and other related areas. Assignments will build on the writing that students are already doing in their doctoral programs. Foundational instruction sets the stage of individualized attention to the unique challenges and audience demands of each student's writing focus

EDUC920101  
Discourse Analysis Bottema-Beutel, Kristen M Spring 2022  
Discourse analysis (DA) is a broad field of research which incorporates theory and method from linguistics, anthropology, and sociology, among other disciplines. The common thread across these areas of scholarship is a commitment to studying language in action; to understanding what people do and mean with language, how people interact with language, and what people come to expect with language. Close analysis of language in context can illuminate the processes through which social constructs such as identity, power, and social selves are built. This course will cover the theoretical foundations of DA, in tandem with the methodological implications of each theory. Topics will include Speech Act theory, sequence organization and Conversation Analysis, Narrative Analysis, Classroom Discourse and Critical Discourse Analysis. The course will place an especial focus on the contributions of discourse analytic approaches to understanding educational contexts. Students will be asked to collect, transcribe, analyze, and present their own data over the course of the semester.

Historical and Political Contexts of Curriculum Higgins, Christopher R  
Spring 2022  
Introduces Ph.D. students in Curriculum and Instruction to the major curriculum movements in American educational history by examining the history and implementation of curriculum development on the macro and micro levels of schooling. Focuses on key campaigns and controversies in curriculum theory and practice, using primary source materials to place them within the academic, political, economic, and social contexts that have marked their conceptualization, and change inside and outside of schools.

EDUC972901  
Controversies in Curriculum and Instruction DEPT  
Spring 2022  
Explores contemporary curriculum controversies in American education as well as the ways these are shaped by differing conceptions of teaching, learning, and the purposes of schooling

and by the larger social, historical, political, and cultural contexts in which schooling occurs. The course assumes a broad and encompassing definition of curriculum and the aspects of instruction, assessment, and teacher preparation that have major implications for curriculum. Although the focus of the course is on curricular controversies in K-12 education, controversies related to the curriculum of early childhood education, adult learning, and higher education are also relevant.

## African and African Diaspora Studies Courses: Fall 2021

AADS111001

Introduction to African Diaspora Studies McElwaine, Michelle L  
Fall 2021

A survey of the African continent and the Diaspora that would include geography, history, politics, economics and literature. The purpose of the course is to introduce students to specific historical, cultural, social and political topics related to Africa and the African Diaspora. Because the scope of the course is so vast, we will explore important issues and themes to give students a desire to further pursue more specific classes in African and African Diaspora Studies. Boston College faculty members will be invited to lecture in their area of expertise specific to Africa and the Diaspora throughout the semester.

AADS111401

When Gods Begin Again: Intro to African and African Diaspora Religions Daniels, Kyrah M  
Fall 2021

This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yorùbá and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santería, Brazilian Candomblé, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of African religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

African American History I Miller, Karen

Fall 2021

This two-semester survey examines the history and culture of African-Americans from the pre-colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, the development of Black institutions, and the emergence of protest movements through the Civil War's end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, and civil rights struggles through current consideration of race, class, and gender conflicts.

Black Popular Culture Kizito, Kalembo

Fall 2021

This course may be used to satisfy the Communication major Critical Issues requirement or to satisfy one of three electives required for the Communication major. In this class, we will critically examine the development of black popular culture from blackface minstrelsy in the 1800s to present day. While we will primarily focus on black popular culture in the United States, we will also consider the work of diasporic authors and artists and the international implications of American media. Readings will draw upon theories and concepts in media studies, cultural studies, and rhetoric to center our discussion of black popular cultural texts such as television shows, films, music, poetry, and fashion.

The Underground Press

Ards, Angela Fall 2021

Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. Note to all students: This course is included in CORE - Engaging Differences and Justice. The underground press was a vast network of loosely affiliated newspapers that emerged in the 1950s and 60s when young people asked very hard questions about the meaning of power and the role of the press. The outsider outlets spread through hundreds of communities throughout the nation, ranging from big city weeklies like "The Village Voice" and the Berkeley "Barb" to specialized periodicals representing the Black press, as well as other ethnic newspapers, progressive weeklies, and various conservative perspectives. This course examines the factors that helped pave the way for this journalism of dissent and how this history affects alternative media today.

Music and Social Justice Jacob Dorman, Shannon D Fall 2021

This course examines influential musicians and their artistic endeavors towards the path of social justice, education and awareness, with a special focus on African American musicians and their contribution to the world of entertainment. Emphasis will also be on social movements, activism, industry commodity and the direct correlation between music and society. Students will be encouraged to analyze music through lyrics, and song form; while understanding the historical, political and social climates surrounding these artistic ventures. The conclusive expectation of this class is that students understand the significant impact of music on a global scale and be mindful that it is a powerful tool that can be utilized to educate, inspire, create awareness and unite humanity.

Community Service Research Seminar Haider, Maheen  
Fall 2021

Students should contact the Thea Bowman AHANA and Intercultural Center to obtain permission to register.. CRP is a two-semester program that offers leadership, research, and public policy training for students interested in working with communities of color in Massachusetts. In the fall, students will participate in a seminar to study the process of community-based research and its methodologies and begin to design a research proposal for an independent study with a faculty advisor for the spring semester research project. The seminar will also include a lecture series, in which academic researchers and community professionals will discuss their current work and experiences on issues related to four research- interest communities.

AADS229001  
Gospel Workshop  
Jacob Dorman, Shannon D Fall 2021

This class will examine Black gospel music with an emphasis on choral music and oral traditions that capture the Black experience in America from a historical, socio-political and multicultural standpoint. The syllabus and repertoire is reflective of the great faith tradition that is an integral part of black culture; in that it includes the breadth of musical expression in the Black worship experience. Students will analyze the importance of Black gospel music and its vital role in shaping global music trends. Spirituals, traditional gospel, contemporary gospel, as well as religious music of the European tradition will be reviewed closely from a historical and musical standpoint. The class will comprise of equal parts lecture and practicum (Voices of Imani Gospel Choir). The latter half compromising of the practicum (VOI) will help students engage in practical learning of songs explored in the lecture, consequently accomplishing the age old institution of oral tradition in Black history.

Credits: 1  
Room and Schedule: None Satisfies Core Requirement: None  
Prerequisites: All students are welcome regardless of music theory/reading skills, vocal skills and religious/cultural background. Students can take the course for credit one semester, and this will require joining the Voices of Imani Gospel Choir for that semester...

AADS230001  
The Walking Dead Adkins, Amey  
Fall 2021

What happens when we die? Historically, the conditions of death in America have never been equal or just for all, but do visions of an afterlife resolve the inequities of lived experience? With Orlando Patterson's pronouncement of the black slave and social death in mind, this course examines the way a theological vision of "the damned" informs everything from racialized injustice and incarceration, to sovereignty and Zombie anxiety in the American conscience.

Bringing together philosophy, theology, and critical race theory, we will consider how constructions of death, memory, eternity, and the Other speak to the ethics of a life "well-lived."

AADS240001  
Ifa: an Indigenous African Literary & Divinatory System McElwaine, Michelle L  
Fall 2021

This course dives into the sacred oral literature of an Indigenous West African thought system known as Ifa. We will explore the structure of the verses and the divinities who feature there. An in-depth reading of several stories will provide cultural context for major themes such as the concepts of personhood and character, predestination, the role of women, and respect for nature. We will also discuss four divination systems that arise out of Ifa.

AADS241101  
U.S. Civil War and Reconstruction Valencius, Conevery B  
Fall 2021

A hundred and fifty years ago, one part of the United States declared its independence as a separate nation. It almost succeeded. Why did Southern whites seek to secede and how did other Americans resist? What were the legacies of war, emancipation, and Reconstruction? We will investigate how agriculture, racial slavery, economics, environments, foreign relations, naval war, field tactics, and free and enslaved Americans shaped this wrenching upheaval. Through historical accounts, images, music, and discussion, we will explore the causes of the Civil War of 1861-1865, its military and social course, and its consequences for a bloodied and re-made Union.

AADS244201  
African Politics Honig, Lauren Fall 2021

This course examines key questions and debates in the study of politics in Africa. Why and when is ethnicity salient in elections? If state boundaries in Africa are largely colonial creations, why are they so resilient? Why are some countries more prone to civil war? What is the relationship between elections and democracy? How do historical legacies impact contemporary politics?

The goal of this course is to provide students with analytical tools to understand a number of questions that are of interest to contemporary politics in Africa. Using the methodologies of comparative politics, we will examine both broad cross-national patterns and focused case studies in this class.

Black and Popular: Speculative Fictions by Black Writers Frederick, Rhonda  
Fall 2021

This course asks: what do discussions of contemporary social issues look like when depicted in popular literatures written by writers of African descent? What is the benefit of fictionalizing these issues in genre literatures? Students address these questions by examining the forms of "speculative fictions" (specifically thriller, science fiction/fantasy, and mystery/detective) as well as urban romance to determine how each represents concerns of twentieth/twenty-first century black peoples in the U.S., Canada, Jamaica, and Martinique. Our focus on these genres' explorations of race, class, culture, incest, social engineering, and intimate relationships is complemented by socio-historical studies of these issues and countries.

AADS248201  
Introduction to African American Literature Curseen, Allison S  
Fall 2021  
This course surveys African American literature from its early-American beginnings to its present. While different semesters may organize around different motifs, the course endeavors to introduce students to major periods (e.g., The Harlem Renaissance); key players (e.g., W.E.B. DuBois); and recurring tropes (e.g., the trickster) conventions (e.g., call-and-response), and themes (e.g., movement-and-constraint) in Black literature. Examining both a range of literary genres and a range of artistic, political, and popular texts, the course emphasizes African American literature as interdisciplinary and inseparable from the history and culture of both a dynamic black diaspora and a diverse and complicated America.

AADS248701  
Race and Identity in African American History Miller, Karen  
Fall 2021  
This course examines and engages readings that reflect a variety of approaches to questions of racial identity and "American-ness" over time. Textual materials have been selected to illustrate both historical and literary treatments of "race" and "identity" within the context of the United States. How do individuals become conscious of themselves as "racial" beings and as national citizens? How do racial identities comport with other identities? How does racial identity influence or color one's sense of self and relations with others within and outside of one's race? How, ultimately, does race impact the study and writing of history over time?

Languages of Africa Owusu, Augustina Fall 2021  
Introduction to the languages in Africa. 2000 of the worlds 7000 languages are spoken in Africa, making it one of the most linguistically diverse continents. Students will learn about the phonetic, phonological, morphological, syntactic, and semantic features of African languages, and their contributions to modern linguistic theory, with special focus on features such as click consonants and noun class systems found in no other parts of the world. The course also explores historical and typological issues in the classification of African languages, and the linguistic consequences of the continents history of colonialism and high migration. No previous knowledge of any African language is presupposed, but students should have taken at least one previous course in Linguistics.

Vodou Not Voodoo: Media Distortions & Lived Religion in Haiti Daniels, Kyrrah M  
Fall 2021  
This seminar offers a deep dive into Haitian religion and culture. Historically, the media has misrepresented Haitian Vodou as a tradition of zombies, poison, and "voodoo dolls." In reality, Haitian Vodou is a religion based on principles of healing, balance, and ancestral devotion. Students will analyze media portrayals such as The Princess and the Frog and Lovcraft Country as well as "pop" journalism to understand how they reinforce racist stereotypes of Haitian traditions. Students will also examine real Vodou ethnographies by scholar-practitioners, addressing 21st century issues like gender and queerness, Protestant conversion, Haitian ancestral gifts, and Euro-American initiates. Ultimately, students will learn how to discern the differences between the media's distortions and the reality of Vodou as an African-derived religion today.

## African and African Diaspora Studies Courses: Spring 2022

AADS111001

Introduction to African Diaspora Studies McElwaine, Michelle L  
Spring 2022

A survey of the African continent and the Diaspora that would include geography, history, politics, economics and literature. The purpose of the course is to introduce students to specific historical, cultural, social and political topics related to Africa and the African Diaspora. Because the scope of the course is so vast, we will explore important issues and themes to give students a desire to further pursue more specific classes in African and African Diaspora Studies. Boston College faculty members will be invited to lecture in their area of expertise specific to Africa and the Diaspora throughout the semester.

When Gods Begin Again: Intro to African and African Diaspora Religions McElwaine, Michelle L  
Spring 2022

This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yorùbá and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santería, Brazilian Candomblé, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of Africana religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

Introduction to Caribbean Writers Frederick, Rhonda

Spring 2022

The Caribbean, merely viewed through the lens of colonial history, often does not reflect the diversity and complexity of the region. From a colonial perspective, therefore, the Caribbean is both "known" and "unknown." Our work for this course compares and contrasts versions of the region by examining colonial histories and current literary traditions. We will pay particular attention to the ways oppositional cultures and identities manifest in Caribbean literature. Themes of this course include: colonialism, History/histories, gender, geography ation, sexuality, class, and culture. Varied texts and media will assist in our interpretations of the Caribbean and its diaspora.

Music and Social Justice Jacob Dorman, Shannon D Spring 2022

This course examines influential musicians and their artistic endeavors towards the path of social justice, education and awareness, with a special focus on African American musicians and their contribution to the world of entertainment. Emphasis will also be on social movements, activism, industry commodity and the direct correlation between music and society. Students will be encouraged to analyze music through lyrics, and song form;

while understanding the historical, political and social climates surrounding these artistic ventures. The conclusive expectation of this class is that students understand the significant impact of music on a global scale and be mindful that it is a powerful tool that can be utilized to educate, inspire, create awareness and unite humanity.

We Wear the Mask Daniels, Kyrach M Spring 2022

In acts of mourning and in times of celebration, in solemn rites of passage and in elaborate performance, we decorate our faces and adorn our bodies. This course introduces students to the diversity of African and African Diaspora ritual arts traditions. We take a comparative approach to study traditions of masquerade in initiation ceremonies, street festivals, carnivals, and funerary rites of the Black Atlantic. Employing a material culture approach, we explore particularly "festive" sites such as the sacred city of Il-If, Nigeria, which hosts festivals nearly 360 days of the year, a Caribbean carnival-capital in Jacmel, Haiti, and New Orleans traditions of Mardi Gras Indians and jazz funerals. Students will gain concrete skills in visual art analysis, research, and writing, becoming versed in the fields of art history, religion, anthropology, and museum studies. By the end of this course, students will gain familiarity with various definitions of parade, masquerade, funeral, and carnival, and analyze the role of masks and art implements in private ritual ceremony as well as public festival. In this way, students will develop a deeper understanding of the intricate relationship between sacred arts and religious ceremony.

Gospel Workshop

Jacob Dorman, Shannon D Spring 2022

This class will examine Black gospel music with an emphasis on choral music and oral traditions that capture the Black experience in America from a historical, socio-political and multicultural standpoint. The syllabus and repertoire is reflective of the great faith tradition that is an integral part of black culture; in that it includes the breadth of musical expression in the Black worship experience. Students will analyze the importance of Black gospel music and its vital role in shaping global music trends. Spirituals, traditional gospel, contemporary gospel, as well as religious music of the European tradition will be reviewed closely from a historical and musical standpoint. The class will comprise of equal parts lecture and practicum (Voices of Imani Gospel Choir). The latter half compromising of the practicum (VOI) will help students engage in practical learning of songs explored in the lecture, consequently accomplishing the age old institution of oral tradition in Black history.

Focus on Civil Rights: The Montgomery Bus Boycott Miller, Karen

Spring 2022

This course dissects the 382-day bus boycott by Montgomery, Alabama's black residents. Though not the first protest of its kind, it introduced two iconic figures to the national stage: Martin Luther King, Jr. and Rosa Parks. Four simple questions provide the foundation for the class, but the answers are unexpectedly complicated: What "law" did Parks violate? Why did Montgomery's black residents rally around Parks' 1955 arrest? How did Rev. King become the boycott's "voice" and "face," even though he was a relative newcomer to the city? How did this lengthy boycott change Montgomery's black community in the short term?

This course will examine violence and other resistance, focusing on the legal and extra-legal strategies by disadvantaged ethnic minorities challenging de jure and de facto discrimination based on race, color, national origin, and/or ancestry. This course will be of special interest to students interested in social justice and those considering post-graduate legal studies.

Theories of Culture and Identity Kizito, Kalemba  
Spring 2022

Difference is a fact of the human condition. What do we learn about ourselves and Others in relational encounters marked by difference? Differences can divide communities, societies, countries and perpetuate violence and suffering. Yet, if faced with courage, integrity, and inquiry, these same differences can lead to authentic connections that benefit individuals and their societies. Effective communication requires study and practice, intense intellectual focus, and genuine emotional exploration. \*\*Satisfies the required theory course in the Communication major\*\*

AADS448201  
Ghana and the U.S.: Historical and Cultural Connections Miller, Karen  
Spring 2022

The course examines selected historical and cultural intersections between Ghana, West Africa, and the United States. We explore "African" and "American" components of African American identity through course readings, film, and lectures that focus on four connected areas: slavery/slave trade, civil rights/independence movements, emigration/immigration, and identity/cultural exchange. Ghana is uniquely situated for such comparative study because of its recurring presence in the unfolding of African American history, including its roles as inspiration to Martin Luther King, home to scholar W.E.B. DuBois, haven to African American emigrants, and producer of the kente cloth many wear.

Vodou Not Voodoo: Media Distortions & Lived Religion in Haiti Daniels, Kyrah M  
Spring 2022

This seminar offers a deep dive into Haitian religion and culture. Historically, the media has misrepresented Haitian Vodou as a tradition of zombies, poison, and "voodoo dolls." In reality, Haitian Vodou is a religion based on principles of healing, balance, and ancestral devotion. Students will analyze media portrayals such as The Princess and the Frog and Lovcraft Country as well as "pop" journalism to understand how they reinforce racist stereotypes of Haitian traditions. Students will also examine real Vodou ethnographies by scholar-practitioners, addressing 21st century issues like gender and queerness, Protestant conversion, Haitian ancestral gifts, and Euro-American initiates. Ultimately, students will learn how to discern the differences between the media's distortions and the reality of Vodou as an African-derived religion today.

Capstone: Growing Up Ethnic in America Sarr, Akua

Spring 2022

In this seminar students will read writing that depicts a variety of experiences but suggest that what constitutes an American identity is far from settled. Ethnic difference has a profound effect on personal and social understandings of what it means to be an American. As we discuss the literature, students will be expected to share their own personal narratives of growing up-- stories of race, ethnicity, class, gender, faith, and nationality--and what it means to be American. Some of the writers we will read include: Jhumpa Lahiri, Amy Tan, Louise Erdrich, Chang Rae- Lee, Sherman Alexie, Sandra Cisneros, Junot Diaz, Edwidge Danticat, Mat Johnson, and Ta-Nehisi Coates.

Humanitarianism in Africa

Hagan, Ampson Spring 2022

Human suffering amid socio-economic underdevelopment, structural and political crises, and "natural" disasters have long defined the predicament of Africa in relation to the rest of the world, as have the many humanitarian efforts to address that suffering. This course will explore these humanitarian endeavors, what types of politics they reproduce, and what the constant humanitarian focus on Africa contributes to assumptions and notions of "Africa" and "Africans". This course will engage these themes by analyzing concepts such as "secularism," "development," "aid," and "white savior complex" in the context of (post)colonial Africa, through ethnographic and historical research of specific case studies.

Senior Seminar: Theorizing the Diaspora Adkins, Amey

Spring 2022

This course explores the discourses of diaspora by taking into account the origins, various meanings, multiple dimensions, cultural iterations, and restrictive limitations of the term. How does "the practice of diaspora" translate in different forms of cultural work such as music, film, and literature? How has diaspora shifted in the age of globalization? How can we use diaspora as an analytical tool for reading from a critical perspective? We will consider closely how diaspora is theorized, practiced, and represented in various forms of cultural production. Therefore we will be taking an interdisciplinary approach reading across genre, medium, and disciplines.

## Art History Courses: Fall 2021

ARTH110101

Art: Prehistoric to Middle Ages Craig, Kenneth M  
Fall 2021

A fundamental course for understanding the visual arts in the Western World: painting, sculpture, and architecture. Major monuments in the history of art will be discussed in historical and cultural context beginning with Paleolithic cave art through the art of the medieval period. This course will examine some of the ancient material from an archaeological perspective, but its main emphasis will be on style and meaning in art. Assignments will include museum visits and the study of significant works of art in Greater Boston.

Art and Archaeology of Homer and Troy Hofman, Gail L  
Fall 2021

Homer's Iliad describes a "Trojan War." Until Schliemann's excavations of a fortified site in Turkey suggested a real Troy and further work in Greece revealed a brilliant Bronze Age civilization, most thought Homer's story pure fiction. This class investigates archaeological sites such as Troy and Mycenae, Bronze Age shipwrecks, a Late Bronze Age "Pompeii," and the artistic evidence for objects and practices described by Homer in order to separate historical truth from elements either invented by the poet or adopted from his own time and reinvented by Hollywood.

Mysteries and Visions: Early Medieval Art Marquardt, Janet  
Fall 2021

This course will illuminate the art of the so-called Dark Ages, from about 200 A.D. to around the year 1000 A.D. We will begin with the art of the waning classical world where, in addition to the burgeoning imagery of early Christianity, one finds the magico-religious art of the mystery cults of Cybele, Mithras, and Isis. We will look at the art of Byzantium, as well as that of Celtic-Early Christian Ireland, and go on to a study of the Carolingian renaissance. The last part of the course will be devoted to the apocalyptic millennial art of tenth century Spain.

ARTH225801

Modernism and the Avant-Garde, 1900-1945 Lotery, Kevin  
Fall 2021

In this introductory course we will unpack some of the crucial episodes in art of the first half of the twentieth century, including Italian Futurism and manifesto writing, Dada and the invention of the readymade, the "marvelous" in Surrealist painting and photography, De Stijl and the pursuit of abstraction, the Harlem Renaissance and cross-disciplinarity, and revolutionary Mexican Muralism. We will explore how these avant-gardes sought to break down the barrier between the making of art and the making of life itself, inventing ways of sliding art into the everyday lives of people on the street, at home, and in the factory. Why, these artists ask again and again, must art be siloed in privileged gallery spaces that uphold repressive models of gender, class, and race? What new utopian futures are opened up when these spaces are negated or left behind?

The City of Rome Polt, Christopher B Fall 2021

What was a normal day like for ancient Romans? What did they see, hear, and do while going about their lives? How did those things change as Rome shifted from a Republic to an Empire and as their city became caput mundi ("Head of the World")? In this course we will reconstruct the lived experiences of Romans by examining Rome's urban spaces through art, architecture, artifacts, and texts. Along the way, we will explore: public buildings, mundane and monumental; recreation (baths, theaters, arenas); civic infrastructure (aqueducts, sewers, roads); economy and commerce (shopping, harbors, slavery); gender and sexuality (domestic spaces, brothels); religion (temples, sacrifices, funerals); and other topics as appropriate.

ARTH334201  
Age of Rembrandt DEPT  
Fall 2021

In the seventeenth century the prosperous Dutch middle class became passionate art collectors. Wealthy merchants and tradesmen, and even butchers and bakers, bought art of the highest quality and displayed it proudly in their homes and shops. The artists living in the Netherlands responded by producing wonderful genre pictures, landscapes, still lifes and portraits as well as religious and mythological pictures for this, the first free market in the history of art. Among the artists we will study are Rembrandt, Jan Vermeer, Frans Hals.

ARTH334401  
Venetian Art and Architecture Leone, Stephanie  
Fall 2021

Until its end in 1797, the Republic of Venice, called "La Serenissima" (the most serene), occupied a unique position on the Italian peninsula and, even today, it remains a distinctive city. This character of otherness, called "Venezianità," derived from its geographic location, topography, history, society, economy and culture and resulted in art and architecture that differed from, but at times dovetailed with, the visual arts of other major Italian cities. This course will study the art and architecture of Venice from the Byzantine church of San Marco (eleventh century) to the fall of the Republic (1797), with a particular focus on the Renaissance (fifteenth-sixteenth centuries) that produced many of its major artists: Giovanni Bellini, Titian, Veronese, Tintoretto, Pietro and Tullio Lombardo, Palladio, and others. Intermediate-level art history course with advanced readings and research project. Meets Renaissance/Baroque requirement for Art History Majors.

ARTH431401  
The Materials of Art and their Conservation Newman, Richard  
Fall 2021

Preservation of a (traditional) work of art requires understanding the materials of which it is made up, their condition, determining a course of treatment, then carrying out a treatment. In this seminar, means by which the materials of art can be understood (historical documents and examination in a conservation lab) will be explored. A major focus will be on how conservators determine the 'state of preservation' that is the desired outcome of a particular treatment (which is rarely how the work of art looked when it was newly created). Other topics are conservation controversies (including cleaning of the Sistine Chapel), 'authenticity' (and authentication) of works of art, and preservation of art that may include highly perishable materials, digital media, or performance. Although some of the subjects are technical, no background in college science is required.

## Art History Courses: Spring 2022

ARTH110101

Art: Prehistoric to Middle Ages Sloutsky, Lana Spring 2022  
A fundamental course for understanding the visual arts in the Western World: painting, sculpture, and architecture. Major monuments in the history of art will be discussed in historical and cultural context beginning with Paleolithic cave art through the art of the medieval period. This course will examine some of the ancient material from an archaeological perspective, but its main emphasis will be on style and meaning in art. Assignments will include museum visits and the study of significant works of art in Greater Boston.  
Credits: 3  
Room and Schedule: Devlin Hall 117 TuTh 03:00PM-04:15PM Satisfies Core Requirement: Arts Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Every Fall

ARTH110201

Art: Renaissance to Modern Times Craig, Kenneth M;Crowley, Destiny Spring 2022  
This is the fundamental course for understanding the visual arts: painting, sculpture, and architecture. The major monuments in the history of art will be discussed in their historical and cultural context beginning with the Renaissance in Europe down to the art of our own time. The emphasis will be on style, materiality, and meaning in art. The class meets for two slide lectures per week. Assignments will include museum visits and study of significant works of art in Greater Boston.

ARTH172001

Animals in the Moral Imagination: Art and Empathy Burns, Jennifer L Spring 2022  
This is an Enduring Questions course and is open to FRESHMEN only. . In this course, we will examine the presence of non-human animals in the history of art, starting with the early modern period in Western Europe and continuing into the present. We consider a series of cases, each of which represents a different "use" of animals by human artists. Yet, as strong visual presences with their own weight and substance, these fully-realized animal figures can draw us into new perspectives, as we ask: what are these animals experiencing? how do they see us? what do they want, call for, and demand? Our goal is to interpret these presences as an opening, from which we can articulate a counter discourse to modern Western philosophical narratives of human separation from, and superiority to, the other animals who inhabit the earth with us.

ARTH220501

Early American Art Anderson, Asher Spring 2022  
In this course we will look at art and visual culture made in what is now the United States from ancient times to around 1800. We will consider visual material representing diverse experiences, including Native American art before and after contact with Europeans; depictions of early European settlements; and art, architecture, and material culture from the colonial, Revolutionary, and early national periods. Throughout, we will ask what it means to be American both in the past and in our own time. As much as possible, both independently and as a group, we will study works of art in person at the Museum of Fine Arts, Boston, the Peabody Essex Museum, and elsewhere.

ARTH220601

Art and Myth in Ancient Greece Hofman, Gail L Spring 2022  
An introduction to the visual representation of the Greek gods and goddesses and to the artistic depiction of the primary cycles of Greek legends (e.g., the Trojan War and heroes such as Herakles, Perseus, and Theseus). This course focuses on how specific visual attributes serve to identify mythological characters and how the development of narrative in Greek art helped to relate their stories. Inquiring into the use of mythological imagery to decorate temples, cult statues, and vases used primarily for the symposium (male drinking parties), we will consider the functions of mythological imagery within Greek society.

ARTH221001

We Wear the Mask Daniels, Kyrrah M Spring 2022

In acts of mourning and in times of celebration, in solemn rites of passage and in elaborate performance, we decorate our faces and adorn our bodies. This course introduces students to the diversity of African and African Diaspora ritual arts traditions. We take a comparative approach to study traditions of masquerade in initiation ceremonies, street festivals, carnivals, and funerary rites of the Black Atlantic. Employing a material culture approach, we explore particularly "festive" sites such as the sacred city of Il-Ife, Nigeria, which hosts festivals nearly 360 days of the year, a Caribbean carnival-capital in Jacmel, Haiti, and New Orleans traditions of Mardi Gras Indians and jazz funerals. Students will gain concrete skills in visual art analysis, research, and writing, becoming versed in the fields of art history, religion, anthropology, and museum studies. By the end of this course, students will gain familiarity with various definitions of parade, masquerade, funeral, and carnival, and analyze the role of masks and art implements in private ritual ceremony as well as public festival. In this way, students will develop a deeper understanding of the intricate relationship between sacred arts and religious ceremony.

ARTH221501

Art of the Gods: Sacred Arts of the Black Atlantic Daniels, Kyrrah M

Spring 2022

This comparative course examines ritual arts traditions of the Black Atlantic world, with particular emphasis on regions such as Benin, Nigeria, Congo, Haiti, Cuba, and Brazil. Employing art historical methods and a material culture approach, students will be introduced to sacred implements of the gods featured in myths and origin stories, tools of divination and birthing/initiation rites, masks of masquerade and carnival traditions, sacred bundles/pots for healing ceremonies, ritual devices to invoke spirits of nature, and mortuary arts that honor ancestors and the dead. Ultimately, this course will reveal sacred arts as a foundational component of African and African Diaspora religions and material culture traditions.

Imagination and Imagery: Later Medieval Art Marquardt, Janet

Spring 2022

This course will look at the symbolism and the multiplicity of meanings in works of art from the Romanesque and Gothic worlds. We will study the various artistic styles of architecture, sculpture, and painting of the period, all the while treating the art in its intellectual and social context. We will pay particular attention to the new ways medieval men and women envisioned space and time, as well as God and nature.

ARTH223201

Northern Renaissance Art Craig, Kenneth M

Spring 2022

Painting in the Netherlands and in Germany in the fifteenth and sixteenth centuries. Emphasis will be on the style and the meaning of the great works of the masters of Northern Renaissance art such as Jan van Eyck, Hieronymus Bosch, Pieter Bruegel, and Albrecht Durer. We will discuss how the Renaissance in Northern Europe is different from the Italian Renaissance and what influences it absorbed from the Italians. We will consider the importance of printed pictures in this era when books and broadsheets assumed such a crucial role.

Modern Architecture Orwig, Timothy T Spring 2022

This course is an overview of the history of architecture in the Modern era, from its eighteenth- and nineteenth-century roots until the present day. Students will examine architecture, urban design, landscape design, and other allied fields such as art history, interior design, and engineering. The course will consider vernacular and commercial design as well as the roles of architects, artists, and patrons. Important issues include the effects of the Industrial Revolution and the rise of the skyscraper, national and international stylistic trends and movements, manufacturers, international exhibitions, and public and critical reaction. Satisfies Core requirement for Arts.

Nineteenth Century Art Taube, Isabel

Spring 2022

An introduction to European and American art of the late eighteenth century to 1900. We will investigate the connections between art and contemporary developments, from the Industrial Revolution to globalization. The course will cover such artistic movements as Neoclassicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Artists will include David, Goya, Turner, Monet, Van Gogh, and Rodin. We will look at their materials and techniques, and we will consider how they represented the issues animating their time: gender, race, class, technology, and power.

ARTH226701

Saltbox to Skyscraper: American Architecture Orwig, Timothy T

Spring 2022

This course examines the history of buildings, landscapes, and urban growth in the United States, from early Native American and European contact to the present. Themes studied include topology, materials and technology, style and movements, the emergence of the architectural profession, and specific social contexts such as culture, gender, race, class, and ethnicity. Students will examine how the built environment is linked to climate, geography, and imaginations of the natural world, and influenced by politics, religion, economy, internationalism, and the definition of national and regional identity. Finally, because of the important role of Boston in American architectural history, the course will use Boston as a lens to understand American architectural history. Satisfied Core requirement for Arts.

Artists and their Writings Kearney, Anne D

Spring 2022

Conducted in French. In this course, students will study French culture through some key artists of the turn of the nineteenth century. The course will explore the rapport between their visual work, their writings (or writings about them) and their lives. The artists studied will be Van Gogh, Gauguin, Matisse, Picasso, Rodin, Camille Claudel, Cézanne. We will look at the evolution of their work in conjunction with their biographies, reading extracts from their letters or pronouncements on art and life.

After Genghis Khan: Art and Architecture in Iran and Central Asia Fetvacı, Emine F

Spring 2022

This course will examine the Mongol invasions of the thirteenth century and their effects on artistic production in Iran and Central Asia up to the early sixteenth century. Students will learn about the art and architecture of the Ilkhanid and Timurid dynasties, two of the most innovative and dynamic artistic traditions of the Islamic world, and heirs to the traditions of Genghis Khan's Mongol Empire. We will explore the use of art and architecture in the promotion of ideology and empire formation, cultural exchange across the Asian continent, the interaction between nomadic and sedentary populations and the merging of Turko-Mongolian and Persian cultural identities.

ARTH440801

From the Studio to the Street: The History of Japanese Photography Cushman, Carrie

Spring 2022

This course will examine the history of modern Japan through the lens of photography, beginning in 1848, when the first camera was imported via Nagasaki and continuing through to the present day. Throughout its history, photography has been a powerful medium for addressing the most challenging issues facing Japanese society, from the country's rapid push towards westernization in the nineteenth century to rebuilding from the ashes of the Asia Pacific War in the twentieth century. Along with the iconic works, movements, and publications from the history of Japanese photography, this course will address topics such as the efficacy of photography in advertising and propaganda, the contribution of the camera industry to the postwar economic boom, the active circles of amateur photographers in Japan, and the ascendance of the Japanese photobook around the world. Students will receive a

cultural history of modern Japan while learning to analyze the multifarious uses of the photographic medium through time. This class will make use of the rich resources related to Japanese photography in the Greater Boston area, culminating with a trip to view an installation by the contemporary photographer Komatsu Hiroko on view at the Davis Museum at Wellesley College.

General Biology

Annunziato, Anthony T;Seyfried, Thomas N Fall 2021

Designed for non-science majors who desire an introduction to cell and molecular biology, this course is also suggested for students who may be interested in the Biology major but lack sufficient preparation to enroll directly into BIOL 2000. Topics include the chemistry of life; biological membranes; cellular metabolism; cell structure; cell division; DNA replication/RNA transcription; protein synthesis; genetics/evolution. Lectures include discussions of the scientific method and current applications of biological investigations. Note: this course does not fulfill any requirement for the biology major, biochemistry major, or the pre-medical program.

Anatomy and Physiology 1 Nelson, Lisa M

Fall 2021

This course lays the foundation for the understanding of human anatomy and physiology. The first portion of the course covers cellular and molecular aspects of eukaryotic cell function:

basic chemistry, macromolecules, cell structure, membrane transport, metabolism, gene expression, cell cycle control, and genetics. The course continues with the study of several organ systems.

Beginning with the Integument, which is followed by the Skeletal and Muscular Systems, and ending this first semester with the Nervous System. The cellular and molecular basis for the functions of these systems is an integral element of this portion of the course.

BIOL171001  
Microbes and Us: Exploring Nature and the Human from a Microbiology Perspective Momeni, Babak  
Fall 2021

This is an Enduring Questions course and is open to FRESHMEN only. You must take ENGL1730 with this course. How does pairing the study of the natural sciences with the humanities help us discover the nature of human life? How do scientific understandings of basic life forms enlighten our understanding of the human? How do humanistic understandings shape our comprehension of the natural world? This course explores these questions by drawing parallels between the human behaviors and those of the minutest of living forms--microbes. Pairing microbiology with literary, philosophical, and critical readings allows humanistic and scientific disciplines to converse: what does each mean by life? What does it mean to be social? How are humans both alike and different from other creatures? We will ask how other life forms explain our existence and how an expanded scientific understanding results in new definitions of the human.

Credits: 3

BIOL204001  
Investigations in Molecular Cell Biology Lab Jensen, Kari;Warner, Douglas M  
Fall 2021

A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.

Credits: 3  
Room and Schedule: Higgins Hall 263 MW 12:00 Noon-12:50PM Satisfies Core Requirement: None

BIOL220001  
Microbiology for Health Professionals Dunn, Mary K  
Fall 2021

This course is a study of the basic physiological and biochemical activities of bacteria and viruses. Emphasis will be placed on virulence factors and the mechanism by which a variety of microorganisms and viruses establish an infection. The use of anti-viral drugs and antibiotics, the host immune response to microbial infection, and the effectiveness of various vaccination strategies will also be discussed.

Credits: 3

BIOL230001  
Biostatistics DaCosta, Jeffrey M Fall 2021

This course will introduce biology students to the basic statistical techniques that are used in conducting biological and medical research. The course is divided into four parts: (1) descriptive statistics (averages, variability); (2) probability and probability distributions (basic probability theory and the binomial, poisson, and normal distributions); (3) statistical inference (parametric and non-parametric tests); and (4) relationships between variables (simple and multiple regression). Students will become familiar with a standard statistical analysis software package and will critique actual research papers.

BIOL303001  
Introduction to Physiology Kenaley, Christopher P Fall 2021  
This course is intended for Biology, Psychology, and Biochemistry majors and students in the pre-medical program seeking a broad overview of human physiology. This course will offer a comprehensive exploration of fundamental life systems with a primary emphasis on human physiology. The chemical and physical processes common to all living organisms, including hemodynamics, respiration, circulation, acid/base regulation, synaptic transmission, kidney and muscle function will be discussed. Also included are related topics on development of the organism and functional aspects of the immune system in host defense strategies.  
Credits: 3

BIOL304001  
Cell Biology Burgess, David R  
Fall 2021  
This course is designed to provide students with a strong foundation in the molecular biology of the cell. Topics covered in the course include cellular biochemistry, regulation of gene expression, subcellular organization, regulation of the cell cycle, membrane trafficking, cell-substrate interactions, cytoskeleton, cancer, and cell signaling. It serves as excellent preparation for more advanced courses in cell biology, molecular biology, developmental biology, and genetics.  
Credits: 3  
Room and Schedule: Higgins Hall 300 TuTh 12:00 Noon-01:15PM Satisfies Core Requirement: None

BIOL314001  
Experimental Methods in Organismal Biology Kenaley, Christopher P  
Fall 2021  
Organismal biology is the study of living systems of all scales that shape the structure, function, ecology, and evolution of individual organisms. Experiments that elucidate how organisms respond to biotic and abiotic environmental stimulus over broad time scales--from changes in behavior to adaptation--are crucial to understanding biological diversity. In this course we'll explore the concepts and analytical tools that frame experimental research in organismal biology. Through group projects and active learning exercises, students will first make hypotheses concerning how organisms respond in time, space, and behavior to changes in environment and then design experiments and instruments that produce data to evaluate these hypotheses. Topics covered will include reconstructing phylogenetic history and the evolution of organismal form and function, evaluating form-function relationships, and the correlates of spatial and temporal distribution of organisms. In addition, the development of an analytical toolbox--specifically, learning the principles of data science and statistical analysis--is a central theme of this course.  
Credits: 3

BIOL405001  
Evolution and Development McMenamin, Sarah K  
Fall 2021  
We see incredible biodiversity on earth, and biologists are now learning how some of this diversity emerges. The field of Evolutionary Development (Evo Devo) asks how development can be modified during evolution to produce the incredible variation observed in Nature. How are animal body plans formed, and how can those plans be changed? How do developmental processes constrain adaptive changes in multicellular organisms? What genetic pathways has evolution targeted to modify phenotypes? The course will address these and other fundamental questions through readings, discussion, and case studies. Students will be introduced to the diversity of multicellular organisms and their evolutionary history, and some of the methods and interpretations of modern developmental, molecular, and evolutionary biology.  
Credits: 3

Virology  
Eberhard, Jeremy J Fall 2021  
This course will consider eukaryotic DNA and RNA viruses that are important in human disease. Basic principles of virus structure, host cell entry and the molecular biology of virus life cycles will be considered in the context of infectious disease. Viruses to be examined include Influenza, cancer-related viruses such as the Human Papilloma Virus, HIV, and emerging viruses such as Ebola and the hantaviruses. The host immune response to viral infection and the effectiveness of various vaccination strategies will also be discussed.

BIOL420001  
Introduction to Bioinformatics Clote, Peter G  
Fall 2021  
Bioinformatics is an emerging field at the intersection of biology, mathematics, and computer science. It harnesses the power and speed of computers to analyze the molecules essential for life. This introductory course requires that students have a basic understanding of molecular biology, genetics, and the Internet, but it does not require extensive background in mathematics or programming. Students will learn bioinformatic tools from the public domain, public databases, and simple programming tasks in PYTHON.  
Credits: 3

BIOL422001  
Research in Molecular Cell Biology Dunn, Rebecca K  
Fall 2021  
An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on the phenotypes and branched proteins that results from induced expression of ubiquitin-like proteins in budding yeast.  
Methods taught may include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, metal chelate chromatography, SDS-PAGE, and Western blotting. This course is ideal for students who desire a solid introduction to research in molecular/cellular biology through practical training.

Fall 2021  
In this course, students will explore and compare the form and function of representative members of the five vertebrate classes. Evolutionary similarities and differences in form and function will be investigated, as will both the selective pressures, and non-selective constraints that have contributed to vertebrate structure. The course will conceptually integrate vertebrate anatomy with developmental biology, evolutionary biology, and ecology, and will provide skills valuable to careers in a range of biological disciplines, including molecular cell biology, medicine, evolutionary biology, and ecology.

BIOL432001  
Developmental Biology Hake, Laura E  
Fall 2021  
Developmental biology is in the midst of a far-reaching revolution that profoundly affects many related disciplines, including evolutionary biology, morphology, and genetics. The new tools and strategies of molecular biology have begun to link genetics and embryology and to reveal an incredible picture of how cells, tissues, and organisms differentiate and develop. This course describes both organismal and molecular approaches, which lead to a detailed understanding of  
(1) how it is that cells containing the same genetic complement can reproducibly develop into drastically different tissues and organs, and (2) the basis and role of pattern information in this process.  
Credits: 3  
Room and Schedule: Higgins Hall 225 TuTh 01:30PM-02:45PM Satisfies Core Requirement: None

BIOL480201  
Research in Evolutionary Genomics DaCosta, Jeffrey M  
Fall 2021  
This course will provide hands-on training in the collection and analysis of genome-scale data from non-model organisms. Students will learn good laboratory practices while preparing samples for next-generation DNA sequencing, which will be run in the department's core sequencing facility. Students will also learn basic Linux/Unix computational skills and several bioinformatics tools that will be applied in managing and analyzing the massive amounts of data generated by this sequencing technology. Through data analyses and reviews of the primary literature, students will gain exposure to modern methods in phylogenetics and population genetics. This course is recommended for students interested in advanced topics in genomics, bioinformatics, and evolution. BIOL3150 and BIOL4200 recommended.  
Credits: 3

BIOL483001  
Research in Molecular Biology Lab Fofana, Ismael B  
Fall 2021  
Satisfies the advanced experience requirement for the Biology major.. An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on environmentally-mediated gene expression in the organism *Pseudomonas fluorescens*. Methods taught include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis-driven research in molecular biology through practical training.

BIOL489001  
Investigations in Cellular Re-Programming Connolly, Timothy J  
Fall 2021  
Induced pluripotent stem cells, iPSCs, are cells that can be generated from adult cells such as skin fibroblasts. Once generated, iPSCs can be directed to differentiate into any cell and offer exciting models for disease research. This laboratory course will teach students the techniques used to reprogram adult murine fibroblasts into pluripotent stem cells and their subsequent differentiation into cardiac and neuronal lineages. Resulting cell lines will be characterized using molecular and cell biology techniques and students will work to create novel cellular disease models to progress particular disease research.

BIOL501001  
Nobel Prize Winning Research in Medicine or Physiology Burgess, David R  
Fall 2021  
In this course we will discuss primary research literature in the fields of cell and developmental biology that have led to the award of the Nobel Prize. Each student will select a primary paper cited by the Nobel Foundation as justification for the award together with a supportive current review on the topic and present the background information to the class. The primary paper will be discussed at the following class period, with all students having defined responsibilities for discussion of the figures and data.

BIOL504001  
Topics in Developmental Biology McMenamin, Sarah K  
Fall 2021  
The field of molecular developmental biology asks: How do molecules and cells coordinate and function to produce organisms? How can these processes be modified in the context of disease and evolutionary change? With the goal of better understanding current research in the field of developmental biology, we will read primary literature focusing on a variety of techniques (molecular, cellular, genetic, biochemical) and numerous systems (tissue culture, mouse, fly, frog, zebrafish, and others). The course will focus on developing students' ability to

comprehend and critically evaluate recent primarily literature, present scientific perspectives, and actively participate in scientific dialogue.

BIOL507501

Emerging Therapeutics Nystuen, Arne M

Fall 2021

This course will focus on novel therapeutic technologies. The first gene therapy has been approved in the U.S. following decades of development. Furthermore, many more gene and cell therapies are in development. The process of therapeutic development will be covered. New technologies will be discussed as well as the results of preclinical and clinical trials. Topics will be presented by the instructor and students and discussions will follow. Students will select their topics for presentation with direction and final approval from the instructor. We will develop presentation skills throughout the course.

Credits: 2

Room and Schedule: Higgins Hall 465 M 04:30PM-06:30PM Satisfies Core Requirement: None

Prerequisites: BIOL2000 and additional course work in molecular cell biology. Biochemistry and Physiology recommended.

BIOL509501

Topics in Advanced Cell Biology Rappoport, Joshua

Fall 2021

Through the analysis of classical and cutting-edge primary research papers and review articles this course will highlight significant advances in cell biology. The course will include lectures that will provide detailed and nuanced understanding of particularly relevant areas in cell biology, as well as student led presentations and critical analyses of individual research papers. Topics to be discussed include the following: The Secretory Pathway, Endocytosis and the Endocytic Pathway, Cell Adhesion, Cell Migration, Signal Transduction, The Cytoskeleton, The Nuclear Pore Complex, and the Cell Cycle. The course will also highlight important technologies and methodologies responsible for advances in cell biology, as well as how developments in cell biology have led to breakthroughs in areas ranging from biotechnology to medicine.

BIOL513001

Environmental Disruptors of Development Hake, Laura E

Fall 2021

Satisfies the advanced experience requirement for the Biology major.. More than 100,000 chemicals are manufactured and may end up as environmental pollutants. Some have toxic effects at high concentrations and protection plans are already in place. However, embryonic, fetal, or neonatal exposure to low "safe" levels of numerous pollutants can (1) induce subtle changes in developmental programs regulated by steroid hormones; (2) increase the reproductive, immune, metabolic, or cognitive disorders; and (3) increase the risk of adult-onset disorders (breast cancer, prostate cancer, diabetes, reduced fertility). This course will examine experiments regarding Environmental Endocrine Disruptors and consider how this work is important in the development of regulatory policy.

Credits: 3

BIOL542001

Cancer As A Metabolic Disease Seyfried, Thomas N

Fall 2021

Satisfies the advanced experience requirement for the Biology major. This seminar will review evidence showing that impaired cellular energy metabolism is the defining characteristic of nearly all cancers regardless of cellular or tissue origin. In contrast to normal cells, which derive most of their usable energy from oxidative phosphorylation, nearly all cancer cells become dependent on non-oxidative substrate level phosphorylations to meet energy demands.

Evidence will be discussed supporting a general hypothesis that all hallmarks of cancer including genomic instability and metastasis can be linked to impaired mitochondrial function.

A view of cancer as a metabolic disease will impact approaches to cancer management and prevention.

Credits: 3

BIOL545001

Advanced Lab in Cell Imaging Judson, Bret

Fall 2021

This course satisfies the advanced experience requirement for biology majors.. This course will survey the various visualization techniques and instruments used by scientists and biomedical researchers: light microscopy, confocal, electron microscopy, super-resolution, and image processing. Students will discuss the experimental use of these techniques and instruments as described in the primary literature. The laboratory component will focus on becoming familiar with the instrumentation that we have available at Boston College. The course will culminate in individual projects of the students choosing utilizing equipment that we have in the laboratory.

BIOL991101  
Doctoral Continuation  
Hoffman, Charles Fall 2021  
All students who have been admitted to candidacy for the Ph.D. degree are required to register and to pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation.  
Credits: 0  
Room and Schedule: By Arrangement Satisfies Core Requirement: None Prerequisites: Permission of Department Corequisites: None

## Biology Courses: Spring 2022

BIOL132001  
Anatomy and Physiology 2 Mott, Devin  
Spring 2022  
This course is a continuation of BIOL1300/1310, with a primary emphasis on the physiology of the major body systems. Systems studied in this course include the sensory, endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems. While the physiological functions under normal conditions are emphasized, relevant disease or dysfunctional conditions are also discussed.  
Credits: 3  
Room and Schedule: Higgins Hall 300 TuTh 12:00 Noon-01:15PM Satisfies Core Requirement: None  
Prerequisites: None Corequisites: BIOL1330 Cross-listed with: None  
Frequency: Every Spring, Every Summer Student Level: Undergraduate Comments: None Status: Offered

BIOL132002  
Anatomy and Physiology 2 Mott, Devin  
Spring 2022  
This course is a continuation of BIOL1300/1310, with a primary emphasis on the physiology of the major body systems. Systems studied in this course include the sensory, endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems. While the physiological functions under normal conditions are emphasized, relevant disease or dysfunctional conditions are also discussed.  
Credits: 0  
Room and Schedule: 245 Beacon Street Room 214 M 04:00PM-04:50PM Satisfies Core Requirement: None  
Prerequisites: None Corequisites: BIOL1330 Cross-listed with: None  
Frequency: Every Spring, Every Summer Student Level: Undergraduate Comments: None Status: Offered

BIOL132003  
Anatomy and Physiology 2 Mott, Devin  
Spring 2022  
This course is a continuation of BIOL1300/1310, with a primary emphasis on the physiology of the major body systems. Systems studied in this course include the sensory, endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems. While the physiological functions under normal conditions are emphasized, relevant disease or dysfunctional conditions are also discussed.  
Credits: 0  
Room and Schedule: 245 Beacon Street Room 214 M 05:00PM-05:50PM Satisfies Core Requirement: None  
Prerequisites: None Corequisites: BIOL1330 Cross-listed with: None  
Frequency: Every Spring, Every Summer Student Level: Undergraduate Comments: None Status: Offered

BIOL132004  
Anatomy and Physiology 2 Mott, Devin  
Spring 2022  
This course is a continuation of BIOL1300/1310, with a primary emphasis on the physiology of the major body systems. Systems studied in this course include the sensory, endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems. While the physiological functions under normal conditions are emphasized, relevant disease or dysfunctional conditions are also discussed.  
Credits: 0  
Room and Schedule: Higgins Hall 265 W 04:00PM-04:50PM Satisfies Core Requirement: None

Status: Offered

BIOL144001  
Sustaining the Biosphere Hake, Laura E  
Spring 2022

Environmental problems and their solutions occur at the intersection of natural systems and the human systems that manipulate the natural world. The course will provide students with an integrated understanding of human systems that affect nature. Topics will include climate, air and water pollution, economics and urbanization, food and agriculture, population growth, biodiversity, waste management and health and toxicology. Sustainability, personal responsibility and a proactive approach to involvement in solutions to current environmental crises will be emphasized. This course is designed for students who are not majoring in biology or biochemistry.

Credits: 3  
Room and Schedule: Higgins Hall 310 MW 01:00PM-01:50PM Satisfies Core Requirement:  
Natural Science Prerequisites: None  
Corequisites: None Cross-listed with: None Frequency: Periodically

BIOL148001  
Pathogens and Plagues Dunn, Mary K  
Spring 2022

In recent history, never has microbiology been more upfront and more important. As we continue to navigate through the Covid-19 pandemic, it is increasingly important to better understand not only viruses and vaccines, but a broader view of microbes and their impact on society and public health. This course will look at ancient epidemics such as the Plague and TB, the ongoing HIV epidemic and the more recent spillovers leading to outbreaks of Ebola and the current pandemic with Sars2 (Covid-19). In addition to lectures on the biological aspects of microbes and epidemics, classroom discussion will include topics such as rising antibiotic resistance, the anti-vax culture and the intersection of science and politics. This is a discussion-based course and students will participate in a semester-long group research project to be presented to the class. This course satisfies the Natural Science Core and is designed for non-biology majors.

Credits: 3  
Room and Schedule: Higgins Hall 260 TuTh 12:00 Noon-01:15PM Satisfies Core Requirement: Natural Science  
Prerequisites: None Corequisites: None Cross-listed with: None Frequency: Every Spring

BIOL200001  
Molecules and Cells Dunn, Rebecca K Spring 2022

Foundational course required for Biology majors that introduces students to living systems at the molecular and cellular level of organization. Topics introduced in this course include basic cellular biochemistry, gene regulation, cellular organization and metabolism, and cell signaling and genetics.

Credits: 3

Room and Schedule: Higgins Hall 300 MWF 11:00AM-11:50AM Satisfies Core Requirement: Natural Science  
Prerequisites: CHEM1109 may be taken concurrently or equivalent or permission of the department.  
Corequisites: None Cross-listed with: None  
Frequency: Every Fall, Every Spring Student Level: Undergraduate Comments: None  
Status: Offered

BIOL200002  
Molecules and Cells Hake, Laura E Spring 2022  
Foundational course required for Biology majors that introduces students to living systems at the molecular and cellular level of organization. Topics introduced in this course include basic cellular biochemistry, gene regulation, cellular organization and metabolism, and cell signaling and genetics.  
Credits: 3  
Room and Schedule: Fulton Hall 511 (Auditorium) TuTh 10:30AM-11:45AM Satisfies Core Requirement: Natural Science  
Prerequisites: CHEM1109 may be taken concurrently or equivalent or permission of the department.

BIOL204001  
Investigations in Molecular Cell Biology Lab Warner, Douglas M Spring 2022  
A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.  
Credits: 3  
Room and Schedule: Higgins Hall 263 MW 12:00 Noon-12:50PM Satisfies Core Requirement: None

#### BIOL304001

Cell Biology Laslo, Mara L Spring 2022

This course is designed to provide students with a strong foundation in the molecular biology of the cell. Topics covered in the course include cellular biochemistry, regulation of gene expression, subcellular organization, regulation of the cell cycle, membrane trafficking, cell-substrate interactions, cytoskeleton, cancer, and cell signaling. It serves as excellent preparation for more advanced courses in cell biology, molecular biology, developmental biology, and genetics.

Credits: 3

BIOL403001  
Deep Sea Biology Olins, Heather C Spring 2022  
Roughly 80% of habitable space on this planet is in the ocean below 1000 meters where sunlight never reaches. In this course we will dive into this rarely visited habitat that occupies the majority of our biosphere. We will take an interdisciplinary approach, as studying the deep requires the integration of geology, chemistry, ecology, physiology, and engineering. We will investigate fundamental aspects of biology such as how organisms adapt to challenges posed by their environment. Students will also gain an appreciation for how much of the planet remains unexplored and learn how scientists study the inaccessible ecosystems of the deep.  
Credits: 3  
Room and Schedule: Higgins Hall 263 MW 03:00PM-04:15PM Satisfies Core Requirement: None

BIOL413001  
Ecology in a Changing Climate Olins, Heather C  
Spring 2022  
In the midst of widespread global climate change, Earth's biodiversity faces multiple synergistic threats. Climate change, habitat loss, pollution, over extraction, and invasive species threaten all species on Earth including our own. The tools of Ecology can help to understand these threats.  
Advances in science and modeling enable us to make predictions about future climate and ecosystem conditions, but these predictions have their limitations. Focusing solely on climate models and predictions of future scenarios and biodiversity loss can lead to feelings of hopelessness and desperation. To work towards an equitable, sustainable future for all species on Earth (including sapiens) we need to learn about positive visions for the future, we need to be able to critically assess potential solutions, we need to examine examples of effective solutions, and we need to consider the roles we each can play in bringing about a positive future. In this course we will do these things together. Over the course of the semester, each student will integrate technical scientific literature, a diverse set of views and perspectives on how we interact with the natural world around us, and personal reflection to create an individual plan of action.  
Credits: 3  
Room and Schedule: Higgins Hall 263 MWF 10:00AM-10:50AM Satisfies Core Requirement: None

BIOL425001  
Population Genetics Clote, Peter G Spring 2022  
In molecular evolution, random events such as pointwise DNA mutations and chromosomal rearrangement events (inversion, reciprocal translocation) create genetic variation in a diploid population that undergoes selection of the fittest to survive. This course describes mathematical models, both deterministic and stochastic, that provide a theoretical foundation for understanding modern genetics. The types of questions we'll address include the following. In a large population, how do haplogype frequencies change both in the presence and absence of selection and restricted migration? What is linkage disequilibrium and how is it measured? In situations of a population bottleneck, caused for instance by limited environmental resources, what is the probability that a particular allele will become fixed in the population, and what is the expected time until fixation? What is the coalescent? In addition, some original research papers will be presented.  
Credits: 3  
Room and Schedule: TuTh 01:30PM-02:45PM Satisfies Core Requirement: None  
Prerequisites: BIOL3150. Working knowledge of probability and statistics or approval from the instructor Peter Clote

BIOL429001  
Medical Biochemistry and Metabolism Altindis, Emrah  
Spring 2022  
The increasing knowledge about the metabolic pathways has deepened our understanding of human disease. Using studies from recent research and review articles, we will cover a variety of domains in the first half of the semester. These topics include insulin signaling/resistance, regulation of metabolism by different regulatory pathways and endoplasmic reticulum stress.

We will also investigate important regulatory hormones including incretins, leptin and adiponectin and the tissue at the center of obesity, adipose tissue. Based on this foundation, we will focus on metabolic impairments in different human diseases. Specifically, we will be reading from the primary literature and from other relevant sources (e.g., review articles) on metabolic syndrome, pancreas function/dysfunction, type 2 diabetes, type 1 diabetes, gestational diabetes, MODY and obesity. After we complete this section, we will focus on the link between metabolic diseases and other important diseases including cancer and neurological diseases/dysfunction. Lastly, we will study the effects of racism and inequities in society on human health. At the end of the course, the students will develop a deep understanding of basic mechanisms in metabolic disease. This course is based on active teaching/learning principles and the instructor will be the guide on the side, rather than sage on the stage. Thus, the students are expected to actively participate in Discussions in each class.

BIOL435001

Biological Chemistry Meyer, Michelle M Spring 2022

This course is designed to introduce biology and biochemistry majors to the subject with an emphasis on understanding the biochemical principals that are crucial to biological function at the molecular, cellular, and organismal levels. The material includes: (1) the structure and chemistry of biomolecules, including amino acids, proteins, lipids, carbohydrates, and nucleic acids; (2) the key metabolic pathways and enzymology involved in the synthesis/degradation of carbohydrates; and (3) the cycling of energy through biological systems. Reference will be made to alterations in biochemical structures, processes, and pathways that relate to specific diseases.

BIOL440001

Molecular Biology Annunziato, Anthony T Spring 2022

This course will explore the structure, function, synthesis, and interaction of nucleic acids and proteins. The mechanisms involved in maintaining cellular genetic and epigenetic information, and in reading this "code" to generate specific patterns of gene expression, will be studied in detail. Topics include classic and newly-developed techniques for studying macromolecules; biotechnology; the functional organization of chromosomes; protein folding and modifications; DNA replication, repair, and supercoiling; RNA synthesis and processing; translation and the levels of gene regulation. Literature from the foundational investigations that led to our understanding of these processes and the current research in these areas will be presented.

BIOL451001  
Cancer Biology Taghian, Danielle Spring 2022

The onset of cancer occurs through a multi-step process that is accompanied by the deregulation of fundamental cellular processes, including cell cycle control, apoptosis, and angiogenesis. This course will provide an overview of the molecular and cellular changes associated with these processes and with the initiation, progression, and metastasis of tumors. Topics covered will include tumorigenesis, tumor viruses, oncogenes, tumor suppressor genes, genomic instability, and the current treatments for cancer. The class will draw on textbook and primary literature readings to enrich the current view of this complex disease.

BIOL483001  
Research in Molecular Biology Lab Fofana, Ismael B  
Spring 2022

Satisfies the advanced experience requirement for the Biology major.. An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on environmentally-mediated gene expression in the organism *Pseudomonas fluorescens*. Methods taught include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis-driven research in molecular biology through practical training.

Credits: 3  
Room and Schedule: Higgins Hall 570 TuTh 02:00PM-05:00PM Satisfies Core Requirement: None

BIOL487001  
Research in Molecular Genetics Lab Hoffman, Charles  
Spring 2022

Satisfies the advanced experience requirement for the Biology major. The fission yeast *Schizosaccharomyces pombe* is an important model organism for the study of intracellular processes such as cell cycle control, transcription, DNA replication, chromosome maintenance, and signal transduction. This laboratory will involve original molecular genetic research using *S. pombe* that involves concepts related to forward genetics and gene manipulation. This course is recommended for students interested in pursuing graduate studies or careers in biomedical research.

Credits: 3

BIOL501001  
Nobel Prize Winning Research in Medicine or Physiology Burgess, David R  
Spring 2022  
In this course we will discuss primary research literature in the fields of cell and developmental biology that have led to the award of the Nobel Prize. Each student will select a primary paper cited by the Nobel Foundation as justification for the award together with a supportive current review on the topic and present the background information to the class. The primary paper will be discussed at the following class period, with all students having defined responsibilities for discussion of the figures and data.  
Credits: 2  
Room and Schedule: Stokes Hall 1035 M 03:00PM-04:50PM Satisfies Core Requirement: None  
Prerequisites: BIOL3040 or Permission of Department Corequisites: None  
Cross-listed with: None Frequency: Every Fall

BIOL506001  
Recombinant DNA Technology Hoffman, Charles  
Spring 2022  
This course will describe the theory and practice of recombinant DNA technology and its application within molecular biology research. Topics will include the cloning of genes from various organisms, plasmid construction, transcriptional and translational gene fusions, nucleic acid probes, site-directed mutagenesis, polymerase chain reaction, and transgenic animals. The goal of the course is to make the research-oriented student aware of the wealth of experimental approaches available through this technology.  
Credits: 3  
Room and Schedule: Higgins Hall 310 TuTh 10:30AM-11:45AM Satisfies Core Requirement: None  
Prerequisites: BIOL2040 and additional coursework in molecular cell biology (such as BIOL3040, BIOL4140, or BIOL4400) or genetics (BIOL3150, BIOL3190, or BIOL4170) or instructor permission.  
Corequisites: None Cross-listed with: None Frequency: Every Spring Student Level: Both  
Comments: None Status: Offered

BIOL507101  
Microbial Community Ecology Momeni, Babak  
Spring 2022  
Polymicrobial communities can cause harmful infections as pathogens or facilitate food digestion as resident microbiota. They also have industrial applications for waste remediation or biofuel production. We will examine examples of microbial communities with implications in health, environment, or industry. The course surveys relevant ecological theories and covers current tools and methodologies used for characterization and analysis of microbial communities.  
Credits: 2  
Room and Schedule: Higgins Hall 552 W 01:00PM-02:50PM Satisfies Core Requirement: None  
Prerequisites: BIOL 2010 and 2014; BIOL 414 and a statistics course recommended.  
Corequisites: None  
Cross-listed with: None Frequency: Every Spring  
Student Level: Both Comments: None Status: Offered

BIOL507102

BIOL507501  
Emerging Therapeutics Nystuen, Arne M Spring 2022  
This course will focus on novel therapeutic technologies. The first gene therapy has been approved in the U.S. following decades of development. Furthermore, many more gene and cell therapies are in development. The process of therapeutic development will be covered. New technologies will be discussed as well as the results of preclinical and clinical trials. Topics will be presented by the instructor and students and discussions will follow. Students will select their topics for presentation with direction and final approval from the instructor. We will develop presentation skills throughout the course.  
Credits: 2  
Room and Schedule: Higgins Hall 465 M 04:30PM-06:30PM Satisfies Core Requirement: None  
Prerequisites: BIOL2000 and additional course work in molecular cell biology. Biochemistry and Physiology recommended.
