## ECONOMICS DEPARTMENT NEWSLETTER

Vol. V, No. 1 March 1982

The economics department will be hosting an Institute on Productivity, Accounting and Economic Growth on April 21. Eight sessions will be presented by members of the economics faculty. The speakers will report and discuss recent economic research that relates to the measurement and analysis of productivity.

Our intention is to share our academic perspective with the practitioners in the business world. We purposely have limited attendance to 100 persons so as to maximize the potential for interaction between the faculty and the participants. Our hope is that this Institute will provide a framework that will stimulate recurring and regular interaction between Boston College economists and members of the business and financial community.

The tuition proceeds from the Institute and any unrestricted grants the department might receive will be used to support economic research at Boston College. The Administration has agreed not to "tax away" our earnings. It is envisioned that research stipends would be offered both to graduate students actively working on their dissertations and to the faculty in the form of summer support.
