

CODMAN SQUARE

LITTER REMOVAL

BIG BELLY BINS

These bins have proven to increase the amount of trash that ends up in cans and decrease trash on the street.

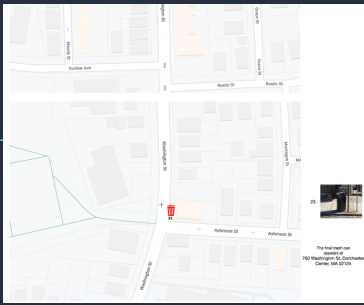

LAVEX RECEPTICLES

These are important for the disposal of cigarette waste, one of the most prominent forms of litter.

INCREASED BIN PLACEMENT

By increasing the frequency at which bins are placed, pedestrians become more likely to put trash in bins instead of on streets.

ADOPT A BLOCK

Residents claim their street under Adopt-A-Block, pledging to maintain cleanliness through regular clean up

COMMUNITY CAMPAIGN

Infrastructural solutions are only effective if the community is engaged and aware of the issue. A campaign could inform citizens and inspire them to take action

LINKTREE

Other ways to involve citizens include giving them access to more resources such as Boston's 311 line or community petitions.

CODMAN MAIN STREETS

Communities that aim to help small businesses succeed. Main Street Organization has connections with city services, to address littering.
