CLINICAL AESTHETICS ADDITIONAL HANDS-ON TRAINING: NEUROTOXINS

Designed for the novice injector: a clinician who has completed an introductory neurotoxins training. This 4 hour hands-on experience allows you to perfect your upper face injection skills under the direct supervision of LexRx NP injectors. This additional training and mentorship opportunity allows you to gain more confidence as an injector and perfect your skill set.

This course includes:

- Managing client visits from start to finish and participating in additional hands-on training and observation in a small group setting
- Injecting and learning at a dedicated “treatment area” for the additional hands-on experience, separate from first time learners
- A 30 minute planning session, 2 hours injection and observation time, and a 30 minute outcomes discussion

Who is eligible to participate?:

- APRNs
- RNs
- BSN students who have clinical experience
- PAs
- MDs
- DOs
- DDSs
- DMDs

***Prerequisite: Completion of a Neurotoxins Training Course**

At the conclusion of this program, participants will be able to:

- Identify FDA approved brands for neurotoxin injection treatments
- Describe the safe steps for selecting clients and prepping for lower face injections
- Demonstrate safe, quality lower face injection process for advanced treatment with neurotoxins
- Describe post-treatment client instructions, adverse reactions and complications, as well as need for follow-up appointments

We highly recommend that students invite their own models: 3 models per 3 hour session. All models should send an email to models@lexrx.co to sign up and be assigned a time slot.

To receive a Certificate of Completion you must complete the hands-on training day and demonstrate a understanding of the content as well as safe injection techniques. You must submit an evaluation form.
